February-06-15

To Whom it may Concern

The Aiviq HTO met with the Environment Canada Seabird team on February 4, 2014  
As we do each year, We support their plans to research seabirds this summer and plans for future  
years in Hudson Strait. To Conduct surveyys. We look forward to working with the seabird group  
and helping them to fine local peoples as part of the summer surveys. We also support plans to  
Build a small research station on Mill Island in 2015 with the help of Environment Canada and  
the Canadian Hight Arctic research station program.

Sincerely,

*Qavaroak Qatsiya*

Aiviq HTO
