Dear Captain Andrew Ngo,

Re: Land Use Permit #N2016J0006
Type of Operation: Campsite
Location: Resolute Area, Baffin, NU, NTS

Enclosed is your copy of Land Use permit number N2016J0006 authorizing your project as described in your application, dated January 26, 2016.

Your application has received a wide distribution to the Nunavut Planning Commission, the Nunavut Impact Review Board, other Federal departments, Government of the Nunavut departments, communities in the area of your operation and concerned Inuit groups.

The issuance of this permit indicates that as a result of Nunavut's environmental screening process, the potentially adverse environmental effects that may be caused by your proposal are mitigatable with known technology and are not significant. The terms and conditions in the permit will, in our opinion, provide the necessary protection to the environment.

Please ensure that you adhere to the operating conditions, along with the Archaeological Palaeontological terms and conditions, annexed to your permit. If you have any questions or require further clarification, please contact Karen McIntyre at (867) 975-4283.

Sincerely,

Nicholas Kavanagh

Species At Risk in Nunavut

This list includes species listed on one of the Schedules of SARA (*Species at Risk Act*) and under consideration for listing on Schedule 1 of SARA. These species have been designated as at risk by COSEWIC (Committee on the Status of Endangered Wildlife in Canada). This list may not include all species identified as at risk by the Territorial Government.

- a) Schedule 1 is the official legal list of Species at Risk for SARA. SARA applies to all species on Schedule 1. The term “listed” species refers to species on Schedule 1.
- (b) Schedule 2 and 3 of SARA identify species that were designated at risk by the COSEWIC prior to October 1999 and must be reassessed using revised criteria before they can be considered for addition to Schedule 1.
- (c) Some species identified at risk by COSEWIC are “pending” addition to Schedule 1 of SARA. These species are under consideration for addition to Schedule 1, subject to further consultation or assessment.

Schedules of SARA are amended on a regular basis so it is important to periodically check the SARA registry (www.sararegistry.gc.ca) to get the current status of a species.
