## PROJECT SCOPE:

The proposed “Baffin Island Spinel Research” project is located within the Qikiqtani (South Baffin) region, approximately 90 kilometres (km) from Iqaluit. The Proponent intends to conduct collect rock samples at eight localities in order to understand the geological conditions leading to formation of mineral spinels, and the potential for gem deposit exploration in Southern Baffin Island. The program is proposed to take place during a two week period in August 2016. The scope of this proposed project as identified by the NIRB includes the following undertakings, works or activities:

- Collect rock samples
- Sampling sites to be access by helicopter, boat or on foot
- Temporary set-up of field camp
- Use of ATV or other mechanized vehicles

Please visit the NIRB’s public registry online at the link above and look up NIRB File No.: 16YN016 to access all project information, maps, and public comment forms.

## REQUEST FOR COMMENTS

**You are invited to provide the NIRB with your comments regarding whether the proposed project is:**

- likely to arouse significant public concern and, if so, why;
- likely to cause significant adverse ecosystemic or socio-economic effects and, if so, why;
- likely to cause significant adverse impacts on wildlife habitat or Inuit harvest activities and, if so, why;
- a type where the potential adverse effects are highly predictable and can be prevented/managed appropriately with known technology.

Parties are also invited to recommend any specific mitigation measures they feel would be appropriate, and to bring any other matter of importance related to this project proposal to the NIRB’s attention.
