**Importance:** High

Please find below the responses to your questions.

Johann

Hi Johann,

1) Equipment to be used to transport the camp, tent frames and building materials to the camp site. Snow conditions permitting, we will use snowmobiles and komatiks to move tents, tent frames and the rest of camp materials. Otherwise, we will use boats on Greiner Lake, since the camp will be close to shore, as well as ATVs

2) Fuel to be used for the setting-up of the camp site.  
We will not use any fuel for setting up the camp, as this will be done manually. Fuels used during the functioning of the camp are described in our project proposal and spill contingency plan (please see application)

3) Length of time it would take to set-up the camp.  
Approximately 5 days

4) Will personnel be transported back daily during the set-up of the camp?  
Yes

5) Total number of crew that will be hired?  
3-4 locals hired through EHTO

Thank you,

Sophia Granchinho (ፖለቲከኛ), MSc., EP Manager, Impact Assessment/ፖለቲከኛ, ፖለቲከኛ/ፖለቲከኛ
