### 5. a) Summary of Operation (Describe purpose, nature and location of all activities.)

Refer to Section 22(2)(b) of the *Territorial Land Use Regulations* (Use last page of form if necessary.)

AEM wants to use a winter access up to the exploration projects Parker Lake, Peter Lake and Fox Lake, from the Meliadine project and from Baker Lake. The main access will pass near the exploration projects and would join them via spur winter accesses. The accesses will be located, for the most part, on the access already authorized to M&T Enterprises LTD company by the NIRB decision 15RN010, by the land use permit 2015X00112 (Crown land) and the land use permit KVRW11F04.

Please see "main application document" for additional information.

b) Please indicate if a camp is to be set up (Use last page to provide details.)

No camp is planned to be set up under this application.

### 6. Summary of potential environmental and resource impacts

(Describe the effects of the proposed program on land, water, flora and fauna and related socio-economic areas.)  
(Use separate pages if necessary.)

With the management plans submitted with this application and the methodology associated to the use of winter roads (passing directly on the ice and snow, without dozing or scrapping of the soil), the impact on the land, water, flora and fauna are expected to be low.

14. Period of Operation (Includes time to cover all phases of project work applied for, including restoration.)

This winter access will be used between January and May. No restoration is expected to be required as the tracked tractors

(Challenger) will pass directly on the ice and snow without dosing or scraping of the soil. An estimation of 30 trips annually is planned to be done with the tracked tractors to service these projects that are at the first stage of exploration.

15. Period of Permit (Up to two years, with maximum of one year extension.)	Start Date	Completion Date
2 years	(2017+01+01)	(2019+01+01)
