To Whom It May Concern:

The Hamlet of Pond Inlet is writing this letter in support of the NIRB Screening Application submitted by Advisian for our Small Craft Harbour Project.

The Hamlet has the capacity to provide municipal services to the project (in particular potable and non-potable water, waste water collection and treatment, waste disposal, fuel supply and storage, as well as temporary housing in the form of hotel rooms for approximately 20 personnel).

The Small Craft Harbour Project can operate and source rock from the quarry located southeast of the lagoon for its construction. As part of the project we will receive ownership of a constructed road out to the quarry site after termination.

This project will bring many benefits to the Hamlet of Pond Inlet. In addition to the new harbour we have a new quarry for rock and gravel production along with an all-weather road for access to the this quarry.

If you have any questions please do not hesitate to contact me at the Hamlet of Pond Inlet Office – 867-899-8934.

Sincerely,

Nicole Monchamp
