Avatiliriniqmut Ayurhauingit:

All steps will be taken to cause no environmental damage towards land, water, flora and fauna. Adventure Canada will follow guidelines of AECO (Association of Arctic Expedition Cruise Operators). For more details on these guidelines please visit <http://www.aeco.no/guidelines/> . In addition, Adventure Canada will consult with it's team of Marine Biologists, Botanist, Birers, Inuit Guides and other knowledgable staff when finalizing their Zodiac activities in order to preserve and protect the areas we visit.

With the number of passengers (198) and Zodiacs in the water (approx. 18-20 at a time) there is the potential or stress on the wildlife we are visiting. As noted before, we will follow all guidelines set in place by AECO. We will comply with the Guidelines for Seabird Colony viewing for cruise ships set out by Environment Canada, the Canadian Wildlife service Guidelines for Visting Seabird Colonies. We will follow federal and local guidelines set out for whale watching in Ninginganik area. We will also follow any recommendations set forth from the communities, and the Hunters and Trappers Organization. There will be no storage, refuelling, disposal or transport for fuel waste within the sanctuaries and wildlife area. We will also ensure that all Marpol regulations are followed. In addition to this, we will educate all passengers on proper behaviour when viewing wildlife. All of our staff are also charged with monitoring behaviour at all sites we visit. Adventure Canada will also monitor all fuel consumption and use during our Zodiac cruises and ensure that all waste and fuel is removed in accordance to Marpol Annex I, IV and V. We also monitor the behaviour of the wildlife and will alter course if the behaviour of any of the wildlife changes. We want to minimize our effect on the wildlife and will make all appropriate measures to do so.
