# QANURITTUT

**Tukihiannaqtunik havaariyaumayumik uqauhiyun**

Qablunaatitut: Summary of Activities and Rationale – Diving & Snorkeling For diving Adventure Canada wishes to carry out Scuba diving and snorkelling activities during the 2018 season in conjunction with the Sedna project. All divers will have advanced certification, and appropriate certifications for cold water diving such as dry suit certifications as per Adventure Canada's criteria. Safety of divers and sites are an utmost importance. The decision to dive will be based on the Dive Master, Expedition Leader and Captain each day depending on favourable wind, weather and ice conditions. They will assess to determine best dive location in area for safety. All dive/snorkel's will be logged and recorded by Dive Master. With a maxim of 16 divers in total. Additional equipment: Oxygen Tank for divers, 16 tanks with 10.94 liters each For all dive sites the following protocol will be followed; •Before the dive all divers/snorkelers will have a full safety and site briefing with Dive Master. •Another safety/dive briefing will also occur on Zodiac just before entering the water. •Prior to divers entering the water, an electronic or manual sounding will occur to determine depths. •Oxygen and First Aid kit will be readily available. •A recall device will be in each Zodiac at all times, along with a throw line. •Diver Delay Surface Marker Buoy's will be used per buddy team. •There will be a bear monitor (with firearm) at each dive site to keep watch for potential polar bear threat. •There will be no more than 8 divers/snorkelers in the water per Dive Master. •Two Dive Masters will be running the operation to ensure safe and professional diving/snorkeling. •All divers will dive in buddies. •Warm water in coolers will be kept in Zodiac Possible CWS Dive & Snorkel Spots Prince Leopold Island, 74°04'30N 89°58W Proposed dates: Tuesday, August 7, 2018, Bylot Island - Cape Hay 73°46'2.14N 80°17'33.68W Proposed dates: Thursday August 9, 2018 Diving/snorkeling at the site will be based on the decision of the Expedition Leader, Captain and Dive Master. The site will be based on good visibility and safety within the location. All rules and regulations as per CWS guidelines and recommendations will be followed. The integrity and safety of the CWS site will be of utmost importance. The depth of the dive will not exceed 60 feet at this site to ensure safety. There will be no more than 8 divers/snorkelers in the water per Dive Master. With a maximum of 16 divers. Each diver will have a single tank, with dry suite and will be in the water no-more than 45 minutes. Dive flags will be used at site of dive to ensure safety and the dive site will not be close to any other boat traffic area with passengers visiting the site. ROV may be used for filming purposes. Potential environmental impacts and mitigation measures. There is the potential of disturbance or stress on the wildlife. We have strict criteria and mitigation in place to ensure all divers have experience to minimize the potential harm to the underwater world. This would include items such as proper awareness of buoyancy. In addition, all diving will be from a Zodiac and there will be no shoreline disturbance. Measures to avoid dangerous wildlife encounters For diving, there will be a bear monitor (with firearm) at each dive site to keep watch for potential polar bear threat. There will be no more than 8 divers/snorkelers in the water per Dive Master. A recall device will be in each Zodiac at all times, along with a throw line.

Uiviititut: N/A

Cape Hay - Proposed Dive Site 73°46'34.11N 80°37'28.91W	Tourism Activities	Marine	We have brought people to this site for many years. We generally offer a Zodiac Cruise via Zodiac with 10 people in each Zodiac. An average of 18 - 20 Zodiacs in the water at one time. In addition to our normal activities mentioned above, we would like to offer diving / snorkelling.	N/A	Pond Inlet
Tay Bay - Proposed Dive Site 73°29'36.21N 80°45'19.94W	Tourism Activities	Marine	We have brought people to this site for many years. We generally offer a Zodiac Cruise via Zodiac with 10 people in each Zodiac. An average of 18 - 20 Zodiacs in the water at one time. We are also working with Parks Canada to land at Tay Bay. In addition to our normal activities mentioned above, we would like to offer diving / snorkelling.	There are some Archaeological sites that Parks Canada is aware of and will manage on land. As the diving will not enter from the shore side this is not applicable.	Pond Inlet
Prince Leopold Island - proposed dive site	Tourism Activities	Marine	We have brought people to this site for many years. We offer a Zodiac cruise or ship cruise. Zodiacs cruise will carry 10 people with an average of 18-20 Zodiacs in the water at one time. We will also follow all regulations set forth by CWS, Enviro. Canada, NIRB and recommendations from communities.	N/A we are not landing. Unaware of underwater archaeology at this site.	Resolute Bay

## Avatiliriniqmut Ayurhautingit:

All steps will be taken to cause no environmental damage towards land, water, flora and fauna. Adventure Canada will follow guidelines of AECO ( Association of Arctic Expedition Cruise Operators). For more details on these guidelines please visit <http://www.aeco.no/guidelines/> . In addition, Adventure Canada will consult with it's team of Marine Biologists, Botanist, Birers, Inuit Guides and other knowledgeable staff when finalizing their Zodiac activities in order to preserve and protect the areas we visit.
