Dear Mia,

Thank you for the follow-up. I have responded to your questions below.

Sincerely,
Jim Schaefer

Subject: NIRB 18YN025: Follow Up

Good morning Jim,

My name is Mia Otokiak, I am a Junior Technical Advisor and I have taken over Talia's NIRB Screening File No.: 18YN025.

As I review your online application I have a few follow up questions:

- Will you be doing daily transportation to and from Ekalluk River or will you be dropped off at the start of your project and picked up at the end of your project?

We will be dropped off at the start of the project and picked up at the end.

We

- You indicate under Water Consumption that you will use a bucket to retrieve water at the Ekalluk River but you do not indicate the Daily Amount in m3 (cubic metre)

I estimate our daily water consumption at 0.050 cubic metres per day.

I

- What type of equipment (measuring stick, hammer, etc.) will you be using throughout the proposed project?

We will be using a 100-metre measuring tape, a hammer, a camera, and a 1 x 1 metre frame (a quadrat, to measure vegetation).

Please feel free to email me back if you need assistance or if you have any questions. Please be advised to cc info@nirb.ca in all future correspondence.

Best regards,

Mia Otokiak
