**Objet :** [EXTERNAL] RE: NIRB 125349: Application accepted for Agnico Eagle's "Whale Cove Area, Exploration Projects" Project Proposal

Hi David

I am the Technical Advisor at NIRB that has been assigned your Whale Cove Area Exploration project proposal.

Can you please confirm if, similar to the Huckleberry Project,

- Drilling will be both on-land and on-ice? **Yes**
- Trenching will be bedrock exposition by overburden removal? **Yes**
- Waste /sewage incineration would be with a dual chamber incinerator? **Yes**

Also, will there be an airstrip constructed at one of the four new exploration sites, or will the airstrip at Huckleberry serve this project as well? **No airstrip planned to be constructed. For the new areas, the Otter could land on the ice or directly on the tundra, if suitable places are available and if it is needed.**

And, will the transport of material and equipment during the winter with the Challenger tractors be coordinated with transport to the Huckleberry sites? i.e., will loads be shared, or will each project have its own dedicated Challengers? **It will be the same Challengers that will service the different areas. Material and equipment transport between the areas will occurred.**

Thank you,  
Shanley

05-Jun-2018

Dear David Frenette,

Please be advised that the Nunavut Impact Review Board (NIRB or Board) is acknowledging the receipt of Agnico-Eagle Ltd.'s (Agnico Eagle) "Whale Cove Area, Exploration Projects" project proposal.

The NIRB will now commence an internal completeness check of this project proposal prior to initiating a screening assessment pursuant to section 87 of the Nunavut Planning and Project Assessment Act. You will be further advised once a screening assessment has been initiated or should additional information be required by the Board.

Best regards,

Cassel Kapolak  
Environmental Administrator
