AFFILIATION: Advisian

TITLE: Geotechnical and Environmental Baseline Studies – Pond Inlet Small Craft Harbour Development

### OBJECTIVES OF RESEARCH:

The Pond Inlet Offset Plan consists of two components, the Monitoring Program and the Research Program. The goal of the Monitoring Program is to assess the habitat characteristics within the footprint of proposed Project. In future years, after construction of the facility, this will be compared to the habitat provided by the boulders/rocks that are a component of project design for shoreline protection. Rocks provide multi-dimensional habitat where marine organisms can find refuge in the spaces between them. The goal of the Research Program is to investigate the primary prey species of Arctic char in Eclipse Sound in the waters surrounding the proposed small craft harbour.

### TERMS & CONDITIONS:

The holder of the licence will be bound by the terms and conditions of the Nunavut Impact Review Board Screening Decision Report and the Department of Culture & Heritage archaeological sites terms and conditions. These terms and conditions will form part of this licence

### DATA COLLECTION IN NU:

DATES: September 01, 2018-September 30, 2018

LOCATION: Pond Inlet

Scientific Research License 02 056 18R-M expires on December 31, 2018

Issued at Iqaluit, NU on June 13, 2018
