Qablunaatitut: Marine Based Scientific Research: This is a low impact study using a vessel of opportunity. The research group is made up of 2 University graduate students and two Canadian pleasure yacht adventurers. The total voyage is from July 28 to August 26, 2018. The work involves a 4 day stop at Croker Bay in a 40 sailing boat for bathymetric & oceanographic surveys. Cruise ends for 2 students at Gjoa Haven, where they will fly back to the US, while Canadian vessel will proceed through the passage. Alternative fly out locations includes Pond Inlet and Resolute. Location: Qikiqtani Region [Croker Bay and Northwest Passage Transit]

Miscellaneous Project Information

7/12/2018 Additional details request: As the Canadian vessel approaches the Northwest Passage the Canadian Captain will assess the ice conditions to determine if the 2 Americans can be checked into the country in a navigable open port. If conditions do not permit stopping in Pond Inlet then the Canadian Captain will call the proper authorities to provide arrival Passport information and details for checking in the 2 Americans. All aboard are familiar with this process. The 2 Americans are planned to depart from Gjoa Haven and fly back to the US around the 25th of August. If ice conditions do not allow the 2 Americans may depart from a different ice free harbor town such as Resolute or Pond Inlet. The two Canadians will continue on through the Northwest Passage keeping to the Canadian Coast Guard mandatory 24 hour position check in and departure from Canadian waters. The two Canadians continue through the Northwest Passage to International waters and then Alaska.
