FOX-M, Main site	Site Cleanup/Remediation	Crown	FOX-M was built in the 1950's as one of the Distant Early Warning Line (DEW Line) radar sites. In the 1980's, the DEW line in Canada evolved into the North Warning System (NWS). FOX-M was modernized as part of this transition. Over the years, the Prime Mission of the radar sites remains unchanged: to detect airborne objects within the Arctic surveillance area.	Two previously recorded sites occur in the vicinity of FOX-M. The recorded locations of both of these sites place them well off of the site facilities.	Hall Beach, Nunavut, is 3 km north of FOX-M by road.

Nunavut Imaligiyyit Katimayit	Water licence 3BC- FOH0919	Active	2009-09-10	2019-08-31
Nunavut Imaligiyyit Katimayit	Water licence number to be determined. This licence is to replace 3BC-FOH0919. Dates are estimates only.	Not Yet Applied	2019-03-31	2029-03-31

Project transportation types

Transportation Type	Qanuq Atuqtauniarmangaa	Length of Use
Air	Transportation to the site is by commercial aircraft. Helicopter and fixed wing aircraft are used to access adjacent sites	
Water	Transportation of bulk materials, drygoods and fuel to the site is completed by ship.	
Land	Travel around the site is by pick-up truck. Heavy equipment is used as required.	

Project accomodation types

Permanent Camp

SECTION D4: Vessel Use

SECTION E1: Offshore Survey

SECTION E2: Nearshore Survey

SECTION E3: Vessel Use

SECTION F1: Site Cleanup

The North Warning System Owice (NWSO) occasionally has arequirement to remediate spills on-site. Given the ewortinvolved, landfarming impacted soil will only be consideredwhere it is the best option for remediating a spill (e.g. treating the soil from a large spill instead of shipping it off-site for treatment).See the attached document Annex A3 - FOX-M Landfarm Plan.pdf for details.
