Subject: NIRB 16EN062: North Arrow Minerals "Mel Project" project proposal

Hi Mike,

I was looking through you application and would like to know if North Arrow Minerals has a Waste Management Plan that includes any protocols for the incinerator use (i.e. waste segregation, recycling of materials etc.).

In addition, is it possible to provide the type of Incinerator being used, frequency of use (once a day, once a week?).

I will have the application returned to you with this clarification request.

Thank you
Jaida
