Hi Junotta,

Thanks for this! In regards to the incinerator. The ECCC has recommended that the proponent “...use an approved incinerator for the disposal of combustible waste.” My question is, what classifies as an ‘approved’ incinerator? It wasn’t exactly clear in the Environment Canada technical sheets on waste incineration. We submitted a brochure for a model we are currently looking into, but I’m not sure if it meets the requirements. The model we are looking at is about the largest that can fit inside of the aircraft (de Havilland Twin Otter).

Thanks,
Mike
