TITLE: Polar Knowledge Canada (POLAR) Camp on Greiner Lake, Cambridge Bay

### OBJECTIVES OF RESEARCH:

In the winter months of early 2019, the two structures of the POLAR camp will serve as emergency shelters for both POLAR staff, and Cambridge Bay community members. Starting in May 2019, the POLAR camp will be prepared for the start of the summer field season by checking and fixing the possible damage to the existing structures that may have occurred during the winter. In June, the summer field season activity will start in the camp. All-season individual tents will be installed in the camp. A fridge, a freezer as well as a stove will be installed in the ft Weatherhaven. POLAR will continue a range of field research activities, and a number of visiting research scientists, their graduate students, as well as northern students will come to Cambridge Bay to conduct this research. Most of these research activities, as well as the deployed scientific instrumentation are on the northern shore of Greiner Lake in the IMA. For safety and convenience, some researchers will be stationed in the camp near these research and monitoring sites.
