

Type de demande :	Amendment
Type de projet:	Mineral Exploration
Date de la demande :	4/4/2019 1:49:45 PM
Period of operation:	from 0001-01-01 to 0001-01-01
Autorisations proposées:	from 0001-01-01 to 0001-01-01
Promoteur du projet:	Agnico-Eagle Ltd., David Frenette Agnico Eagle Mines Ltd. 765 chemin de la mine Goldex Val-d'Or Qc J9P7G4 Canada Téléphone :: 819-874-5980, Télécopieur ::

DÉTAILS

Description non technique de la proposition de projet

Anglais: Snow Mineral Property: Agnico Eagle Mines Limited prepared the present application to obtain land use authorizations permitting mineral prospection activities and geophysical surveys on the expanded “Snow” mineral property. This new property is located between approximately 55km and 80km mostly southwest of the Whale Cove Hamlet and is contiguous to the Snow property where exploration activities have already been authorized by NPC decision 148849 and NIRB decision 17EA068. For this area, workers are planned to be accommodated at the Huckleberry exploration camp and from there, will be transported to the exploration areas using a helicopter. Activities are planned to start in summer 2019 and continue annually.

Français: La propriété minérale Snow: Les Mines Agnico Eagle Ltée. a préparé cette application dans le but d'obtenir les autorisations requises afin de conduire des travaux de prospection et de géophysique sur une nouvelle propriété minérale. Cette nouvelle propriété se situe approximativement de 55km à 80km au sud-ouest de la communauté de Whale Cove et est contigüe à la propriété Snow originale où des activités d'exploration ont déjà été autorisés par le NPC via la décision 148849 et par le NIRB via la décision 17EA068. Pour ce secteur, les travailleurs sont prévus être logés au camp d'exploration Huckleberry d'où ils seront transportés en utilisant un hélicoptère. Ces travaux sont prévus débuter à l'été 2019 et se poursuivre annuellement.

Personnel

Personnel on site: 5

Days on site: 10

Total Person days: 50

Operations Phase: from 2018-07-15 to 2025-09-30

Activités

Emplacement	Type d'activité	Statut des terres	Historique du site	Site à valeur archéologique ou paléontologique	Proximité des collectivités les plus proches et de toute zone protégée
Snow expansion	Mineral Exploration	Inuit Owned Surface Lands	Mineral exploration area, newly staked.	Archaeological assessment was conducted in 2018 on a part of the Snow property. Assessment will continue according to the level of exploration activities planned in the area.	Whale Cove is located between 55km and 80km of the property.
Snow expansion	Mineral Exploration	Crown	Mineral exploration area, newly staked.	Archaeological assessment was conducted in 2018 on a part of the Snow property. Assessment will continue according to the level of exploration activities planned in the area.	Whale Cove is located between 55km and 80km of the property.

Autorisations

Indiquez les zones dans lesquelles le projet est situé:

Kivalliq

Autorisations

Organisme de régulation	Description des autorisations	État actuel	Date de l'émission/de la demande	Date d'échéance
Kivalliq Inuit Association	Land use licence	Not Yet Applied		
Indigenous and Northern Affairs Canada	Land use permit	Not Yet Applied		

Project transportation types

Transportation Type	Utilisation proposée	Length of Use
Air	Transport from the Huckleberry camp site or from the Whale Cove Hamlet will be done using an helicopter.	

Project accomodation types

Autre,

Utilisation de matériel

Équipement à utiliser (y compris les perceuses, les pompes, les aéronefs, les véhicules, etc.)

Type d'équipement	Quantité	Taille – Dimensions	Utilisation proposée
Helicopter	1	1500kg	To transport material and workers

Décrivez l'utilisation du carburant et des marchandises dangereuses

Décrivez l'utilisation de carburant :	Type de carburant	Nombre de conteneurs	Capacité du conteneur	Quantité totale	Unités	Utilisation proposée
Aviation fuel	fuel	20	205	4100	Liters	Helicopter use

Consommation d'eau

Quantité quotidienne (m3)	Méthodes de récupération de l'eau proposées	Emplacement de récupération de l'eau proposé
0	No use of water is requested by this application.	

Déchets

Gestion des déchets

Activités du projet	Type des déchets	Quantité prévue	Méthode d'élimination	Procédures de traitement supplémentaires
Mineral Exploration	Déchets combustibles	100kg	Transport to Meliadine Mine or Huckleberry Exploration camp site for disposal.	NA
Mineral Exploration	Déchet dangereux	205L	Transport to Meliadine Mine or Huckleberry camp site for segregation and temporary storage.	Transport to a southern facility for recycling or safe disposal.

Répercussions environnementales :

With the limited level of activity proposed, the impacts are planned to be limited and highly predictable. The application of the conditions from the different authorizations will reduce potential impacts at a minimum.

SECTION G1: Well Authorization

SECTION G2: Onland Exploration

SECTION G3: Offshore Exploration

SECTION G4: Rig

SECTION H1: Vessel Use

SECTION H2: Disposal At Sea

SECTION I1: Municipal Development

Description de l'environnement existant : Environnement physique

This expansion of the mineral property is located both, on IOL and Crown Land and is contiguous to the Hudson Bay.

Description de l'environnement existant : Environnement biologique

An assessment of the area would be done should a future development is planned (example: mining).

Description de l'environnement existant : Environnement socio-économique

The property is located in the area located between 55km and 80km of the Whale Cove community.

Miscellaneous Project Information

Identification des répercussions et mesures d'atténuation proposées

Potential impact on the caribou will be reduced by applying mitigation measures described in the management plans and by the respect of the conditions associated to the authorizations required to perform the exploration activities. Potential impact related to hydrocarbon spills will be limited with the application of the best practices and the use of the Spill Contingency and Response Plan.

Répercussions cumulatives

The proposed activities are planned to be low scale, but a future development (example: mining) would have to be assessed by an environmental impact study.

Impacts

Identification des répercussions environnementales

		PHYSICAL	Designated environmental areas	Ground stability	Permafrost	Hydrology / Limnology	Water quality	Climate conditions	Eskers and other unique or fragile landscapes	Surface and bedrock geology	Sediment and soil quality	Tidal processes and bathymetry	Air quality	Noise levels	BIOLOGICAL	Vegetation	Wildlife, including habitat and migration patterns	Birds, including habitat and migration patterns	Aquatic species, incl. habitat and migration/spawning	Wildlife protected areas	SOCIO-ECONOMIC	Archaeological and cultural historic sites	Employment	Community wellness	Community infrastructure	Human health
