**COMMENT FORM FOR NIRB SCREENINGS**

The Nunavut Impact Review Board (NIRB) has a mandate to protect the integrity of the ecosystem for the existing and future residents of Nunavut. To assess the environmental and socio-economic impacts of the project proposal, NIRB would like to hear your concerns, comments and suggestions about the following project proposal application:

<b>Project Proposal Title:</b> <b>Community Access Trail</b>	
<b>Proponent:</b> <b>Hamlet of Naujaat</b>	
<b>Location:</b> <b>Kivalliq Region</b>	
<b>Comments Due By:</b> <b>May 28, 2019</b>	<b>NIRB #:</b> <b>19PN003</b>

**Indicate your concerns about the project proposal below:**

<input type="checkbox"/> no concerns	<input type="checkbox"/> traditional uses of land
<input type="checkbox"/> water quality	<input type="checkbox"/> Inuit harvesting activities
<input type="checkbox"/> terrain	<input type="checkbox"/> community involvement and consultation
<input checked="" type="checkbox"/> air quality	<input type="checkbox"/> local development in the area
<input checked="" type="checkbox"/> wildlife and their habitat	<input type="checkbox"/> tourism in the area
<input type="checkbox"/> marine mammals and their habitat	<input type="checkbox"/> human health issues
<input type="checkbox"/> birds and their habitat	<input type="checkbox"/> other: _____
<input type="checkbox"/> fish and their habitat	_____
<input checked="" type="checkbox"/> heritage resources in area	_____

**Please describe the concerns indicated above:**

**Air Quality:** Dust mitigation and monitoring during and after construction should be completed to ensure safety for all vehicles and to document any adverse effects on local wildlife or water.

**Wildlife:** The road needs to be built to “animal friendly” standards with slopes of no less than 4:1 and no large boulders that would create a barrier to animal movement.

**Heritage Resources:** The road route must ensure that the minimum distances from Archaeology site are being adhered to. The diagram with locations of Archaeology Sites shows several sites in very close proximity to the road.

**Do you have any suggestions or recommendations for this application?**

- 1) Add the number and type of small trucks with portable fuel tanks to the project equipment list.
- 2) The use of a water truck as part of the on-going road maintenance should be given consideration.
- 3) Dust mitigation and monitoring during and after construction should be completed to ensure safety for all vehicles and to document any adverse effects on local wildlife or water.
- 4) Include ARD and ML testing on all road materials.
- 5) Complete a study that documents the potential impacts of wind direction on snow accumulation along the proposed road route.
- 6) Involve the Naujaat HTO in monitoring the hunting related traffic on the proposed road.

8. Comment Form Distribution

Do you support the project proposal? Yes  No  Any additional comments?
