AFFILIATION: Department of Fisheries and Oceans

TITLE: Kitikmeot Region Marine Science Study

OBJECTIVES OF RESEARCH:

We aim to focus our sampling aboard the R/V Martin Bergmann in the Finlayson Islands, Coronation Gulf, Bathurst Inlet and if time and weather allow, into Queen Maud Gulf and Icebreaker Channel. While conducting oceanographic work in these regions, we also plan to sample the Tree River, Hood River, Burnside River, and Western River using the small aluminum support boat on the R/V Martin Bergmann to sample from the river mouth and into the tidal estuary. The Coppermine River and estuary will also be sampled with the support of local platforms in Kugluktuk. We plan to conduct focussed studies of tidal straits at the Finlayson Islands and within Bathurst Inlet. For work carried out within the Finlayson Islands and within the vicinity of Cambridge Bay, we also plan to use the R/V Jennie Pierre as a support vessel, aiding with mooring deployments and oceanographic sampling as needed. Our focus for 2019 will be the continuation of work carried out in 2017 & 2018.
