| <p>Do you have any suggestions or recommendations for this application?</p> <p>Section 7 of the Marine Mammal Regulations (Fisheries Act) prohibits the disturbance of marine mammals. Generally, disturbance is interpreted as disruption to an animal's normal life processes, resulting from intentional human activities (e.g., to pursue, accompany, overtake, encircle, approach repeatedly, hunt, disperse, drive or herd individuals or groups of marine mammals). This applies equally to divers, kayaks, motor boats and aircraft. Disturbance response thresholds vary among individuals, species and locations.</p> <p>Aircraft should maintain a minimum altitude of 500 m over marine mammals when surveys are not taking place</p> <p>DFO recommends that watercraft should survey the area for Marine Mammals to avoid disturbing them. If marine mammals are encountered, and remain in the area, effort should be made to avoid disturbing them by rerouting, slowly navigating around their location at a reduced speed and maintaining their distance. The watercraft should not accelerate within 800 m of whales and 250 m for other marine mammals. The marine mammals should not be approached, in general, within 100 m for common species and 400 m for Species at Risk. Please see the</p> | | | | | | | | | | | | | | | | | | | |
