NUNAVUTI AVATILIKIYIN KATIMAYIN

NIRB'S 2018 EVALUATION of the MELIADINE GOLD MINE PROJECT

Indicator	Rating	Comments
Air Quality	Needs Improvement	<ul style="list-style-type: none"> • Agnico Eagle began applying dust suppressant (calcium chloride) to the entire length of the AWAR beginning July, 2018. Results of the 2018 dustfall analysis indicated lower dust deposition than 2017 results. • Agnico Eagle to update the Incinerator Management Plan. • Monitoring of NO2 and SO2 to include the CAAQs as per ECCC recommendation.
Terrestrial Environment	Satisfactory	<ul style="list-style-type: none"> • Some concerns raised regarding ARD potential of waste rock used for construction materials. • A timeline for construction of waste rock facilities to be provided by Agnico Eagle.
Hydrogeology and Hydrology	Satisfactory	<ul style="list-style-type: none"> • Agnico Eagle to provide year-over-year comparison of actual volumes of water reporting to water retaining structures, and measured concentrations for water quality parameters with FEIS predictions in Annual Report.
Aquatic Environment	Good	<ul style="list-style-type: none"> • Inadequate summary in 2018 Annual Report of project-related effects on water and sediment quality. • Potential recommendation for Proponent to improve trend analysis and comparison to FEIS predictions in Annual Report.
Wildlife and Wildlife Habitat	Needs Improvement	<ul style="list-style-type: none"> • To date, Agnico Eagle has not met the objectives of terms and conditions 46, 48 and 105 regarding implementation of the Hunter Harvest Survey. Signed a MOU with Kangiqliniq HTO. • Effectiveness of carnivore deterrents and mitigation measures to be reviewed (i.e. fox mortalities exceeding FEIS predictions). • Monitoring and mitigation for caribou in the TEMMP may require improvement to comply with term and condition 44.

[illegible]

NIRB'S 2018 EVALUATION of the MELIADINE GOLD MINE PROJECT

Indicator	Rating	Comments
Birds and Bird Habitat	Satisfactory	<ul style="list-style-type: none"> One bird mortality incident was unreported in 2018, however Agnico Eagle has determined a path forward with ECCC on reporting of bird mortalities. Agnico Eagle to update the TEMMP to accurately reflect monitoring objectives of bird surveys.
Marine Environment/ Wildlife	Good	<ul style="list-style-type: none"> Marine Mammal and Seabird Observer Report – surveys to not appear to follow ECCC seabird survey protocols. Agnico Eagle has committed to improving training for the shipping company.
Socio-Economic	Good	<ul style="list-style-type: none"> 2017-Inadequate reporting on programs and monitoring plans and a lack of reporting regarding consultation with the public and other key stakeholders (including those related to road access and the hunter harvest survey). Updates to Socio-Economic Closure plan may be required to meet term and condition 91. Inuit Employment does not meet objectives of IIBA.
Other	Satisfactory	<ul style="list-style-type: none"> 2017-Ineffective application of the road management plan and public awareness of the importance of the rules of the road. Agnico Eagle has made effort to increase emphasis on road safety and met with Rankin Inlet regarding rules on the AWAR. Signage to be updated on bypass road.
Accidents/ Malfunctions	Satisfactory	<ul style="list-style-type: none"> Increased occurrence in 2017 of spills caused by ‘human error’. Agnico Eagle has identified and rectified some deficiencies contributing to fuel spills and implemented secondary containment in high risk areas. The Proponent has also made effort to improve spill response training. Agnico Eagle has committed to improve its spill reporting from 2018.

[illegible]

Thank You – Matna!
