## 3

The map shows the Klamath River estuary with various islands and bays. A red line outlines the study area. A box highlights the area shown in the inset map.

The top photograph shows the research station situated on a rocky, elevated shoreline. A large, calm body of water, likely the Bering Sea, stretches out in the background, bordered by steep, forested mountains. A small boat is visible in the distance. The station itself is a small, white, rectangular structure with a solar panel mounted on a tripod-like stand next to it. The bottom photograph shows the interior of the station. Two people are seated on blue benches. The person on the left is wearing a red jacket and is looking down at something in their hands. The person on the right is wearing a green jacket and is looking out of a circular porthole. The interior is compact and functional, with various equipment and storage items visible.

## 7

The collage consists of four vertically stacked images. The top image is a close-up of a brown starfish resting on a white plate. The second image is a video frame showing a rocky seabed with a starfish and a scallop. The third image shows a man in a boat holding a large white fish. The bottom image shows a boat on a frozen body of water with people and equipment.
