QANURITTUT

Tukihinnaqtunik havaariyaumayumik uqauhiuyun

Qablunaatitut: A few years ago we started studying the possibility of operating a ski touring, cat-skiing and heli-skiing operation northwest of Clyde River. The area is located on Ayr Lake and west in the mountains. Last spring we tested a camp in the same area. Now, we would like to apply for a land lease and permits for ski camp operation. The location is 70 degrees, 26 minutes, 26.5 seconds North and 69 degrees, 49 minutes, 50 seconds West. Clients arrive in Clyde River, they are transported to the camp via helicopter or snow mobile. Clients spend a week at the camp ski touring. Transportation up the mountains is done with a helicopter, the snowcat or on foot depending on the wishes of the clients. The camp will operate from early April to mid-May, including build-up and take down times. The area is crown land not IOL. We have support from the community. We have an outfitting permit for the area. We are not using wildlife in the area, in four years of flying and skiing in the mountains and glaciers we have not see any caribou or polar bears , if we were to see wildlife we will not use the helicopter or vehicles to approach the animals. After we have got approval from NPC we will go through the process of applying for a Federal Crown Land lease.

Uiviititut: N/A

Inuktitut: I have attached a translated Inuktitut document outlining our plans for the season 2020 in the project documents.

Inuinnaqtun: N/A

Personnel

Personnel on site: 20

Days on site: 50

Total Person days: 1000

Operations Phase: from 2020-03-25 to 2020-05-13

Environmental monitoring site	Ikulalaaqtun iqqakuuvaluin	1 garbage bag/day	All camp garbage is packaged and transported to Clyde River..	N/A
Environmental monitoring site	Anaagun (inuin anaaguin)	20 people/day	Our lodge is equipped with exterior outhouses. The outhouses have a custom containment which maintains all the human waste. The human waste is frozen and dumped serval kilmters way rom the camp. The toilet paper is separated and brought to the municipal dump of Clyde River.	Additional Treatment Procedures all the toilet paper and non human waste, is separated from the human waste and then burnt at the dump in Clyde River.

Avatiliriniqmut Ayurhautingit:

The largest environmental impact foreseen from our project would be a fuel spill on the lake. We have taken precautions and will have fuel containment around our barrels and pump stations. We will also have fuel pads for fuel drips or smaller fuel leaks on the snowmobiles or piston bully. When we leave the site at the end of our operational season, we leave the location exactly how it was when we arrived. No garbage or human waste left behind. All garbage is packaged and returned to Clyde River.

Qanurittuq Ittunik Avatinga: Avatingalluanga

We are not in the proximity of any protected areas, heritage sites, archaeological sites or sensitive wildlife area or wildlife migration trails. The camp is located on a glacial moraine.

Qanurittuq Ittunik Avatinga: Inuuhimayunut Avatinga

The only wildlife we have seen, is a couple foxes and polar bear tracks. No birds have been sighted. We do not fish or pour contaminants, into the lake. The ground is rock and ice where we operate.

Qanurittuq Ittunik Avatinga: Inungit-maniliurutingit Avatinga

The community of Clyde river does not hunt in the area, as there is no caribou. Land and resource use in the area is zero, we operate in the high mountains and glaciers. We do not interfere with subsistence harvesting or local trapping.
