Emily: Licence type is still Type B.  
Thanks  
Bhabesh

Emily

The initial Licence has the following Components;

1. Pump station at Char Lake
2. Intake from Char lake to Signal Hill water Plant
3. Water treatment Plant at signal Hill
4. Utilidor system- water line and sewer line
5. Macirator system.
6. Proposed new wastewater treatment Plant

Licence type was type B.

During Amendment :

1. New Pump station at Signal Hill: Construction stage
2. Upgrade of existing water treatment plant: Construction stage
3. Upgrade of intake line: construction is complete
4. Upgrade of Utilidor system-Water line and sewer line: Construction is complete
5. Existing Macirator unit: As it is
6. Proposed new wastewater treatment Plant- design stage

This is also type B and existing now.

Water Board 's new regulations;

If water extraction volume is more than 300 cubic meters per day or storage volume is 60,000 cubic meters annually, the water licence will be considered as Type A.

Today, we need to satisfy this criteria and changing the Type B to Type A.

These have nothing to do with the number of infrastructure.

So I do not know why you want to send the application back.

Please visit your NIRB file of screening this project may be 2 yrs. Ago.

If you have any question, please call me or talk to Karen of Water Board for more clarification.

Hope this helps.

Thanks.

Bhabesh Roy, P.Eng.

Hello Bhabesh,

I am returning your application to you as it will require clarification of the provided information.

Because the NIRB was triggered to screen your project proposal due to the Type A water licence we will actually need to include all new and updated infrastructure that will occur with this change in water licence, as well as all the activities that will occur with this update.

To help clarify exactly what these activities are we will need clarification on the points addressed in the Appendix A of the Information Request #2 (NIRB File No.: 328381)

The application should be returned shortly for you to update.

Please let me know if you have any questions

Best Regards,

**Emily Koide**
