all fuel at the Lodge is in Containment cells
so the answer is yes, it is in a bermed area.
hope this clarifies it
Thank you, aziz
have a lovely weekend.

Hi Aziz and Nansen,

There is secondary containment and spill management information in your original application. If the fuel storage/use will be contained under this please let me know and I can carry forward with your application.

Thanks,

Emily Koide

Subject: 15TN012: Additional Information Request for "Arctic Haven Runway Overlay" Project Proposal

Hello Aziz,

Thank you very much for your resubmission of the “Arcitc Haven Runway Overlay” project proposal application.

Could you please further describe any secondary containment for storage and transfer of fuel from the 205L drums to the equipment.

As well the NIRB has an Oil Spill Contingency Plan, dated 2015, for the Arctic Haven Lodge on file. If this plan applies to the current amendment for the runway extension could you please update, if needed, and submit to the Public Registry. If not could you please submit an Oil Spill Contingency Plan.

Thank you very much,

Emily Koide
