

Pond Inlet Marine Infrastructure - Consultation Activities

Agency/Stakeholder	Method	Date	Topic
Mittimatalik Hunters and Trappers Organization	Meeting	14-Jun-2016	Baseline studies, research permits.
Hamlet of Pond Inlet	Council Meeting	14-Jun-2016	Baseline studies, research permits.
Hamlet of Pond Inlet	Council Meeting	15-Sep-2016	Introduction to Project and team, update on funding, design concepts, community concerns/issues/feedback.
Mittimatalik Hunters and Trappers Organization	HTO Design workshop	16-Sep-2016	Concentrated on gaining an understanding from HTO members of the current conditions for accessing water and ice in Pond Inlet and the HTO members' specific needs for a small craft harbour. Ideas for design options. Wind direction and strength, sedimentation, currents, seasonal changes to ice, water and ice access, and current boat traffic and ramp use.
Mittimatalik Hunters and Trappers Organization	HTO Follow up Design Workshop	24-Nov-2016	Focused on obtaining feedback from the HTO members on concept options that had been developed based on the information obtained during the first design workshop. The workshop allowed HTO members to see how their input had been directly considered in the design of the concept options and provide their feedback on a preferred option. IQ and local information was noted during discussions on topics such as: changes to ice and access once the harbour is built, construction schedule, land use/plant harvesting around the quarry site and fishing areas.
Hamlet of Pond Inlet	Council Meeting	24-Nov-2016	Project update, follow up to introduce design concepts based on feedback received from last visit.
Shoreline Residents	Focus group workshop	25-Nov-2016	Construction impacts, design options, haul road.
