TITLE: Kitikmeot Sea Science Study

OBJECTIVES OF RESEARCH:

If travel to Nunavut is permitted in the summer of 2021, we aim to focus our sampling aboard the R/V Martin Bergmann in the Finlayson Islands, Coronation Gulf, Bathurst Inlet, Queen Maud Gulf, and Icebreaker Channel, and if time allows, travelling into Chantry Inlet (St. Roch and Rasmussen Basins). While conducting oceanographic work in these regions, we also plan to sample the Tree River, Hood River, Burnside River, and Western River using the small aluminum support boat on the R/V Martin Bergmann to sample from the river mouth and into the tidal estuary. The Coppermine River and estuary will also be sampled with the support of local platforms in Kugluktuk. We plan to conduct focused studies of tidal straits in Icebreaker Channel, around the Finlayson Islands, and within Bathurst Inlet. Our focus for 2021 will be the continuation of work carried out from 2017-2019, and as such, our planned sampling, instruments, and techniques are the same as in our original permit
