Hi again,

Thank you for the information.

Just like on the NIRB Application, we will need to know the fuel type, number of containers, container capacity, total amount, and units of the fuel being stored on board.

Please be advised to cc info@nirb.ca in all future correspondence.

Thank you for taking the time!

Best regards,

Mia Otokiak

Hi there,

We will not have any hazardous waste on the vessel. We will have some diesel on board for the vessel and gasoline for a zodiac. I have included some of my colleagues who might be able to clarify on these details further.

Thank you

I am the Junior Technical Advisor assigned to your NIRB Screening file 20YN019.

I have reviewed your application materials and just have one thing to clarify before moving on:

1. In the Non-Technical Summary it is stated that “Our project will not involve human or animal experimentation, tissue or data”, but it is also stated that both benthic invertebrates and fish data will be collected. Please clarify.

Thank you for taking the time.

Best regards,

Mia Otokiak

Hello again Jesslene,

Just as another follow up, will there be any fuel or hazardous waste stored on the vessel during the life of the project?

Thank you for taking the time.

Best regards,

Mia Otokiak
