**Re: Opportunity to address comments received regarding the Pennsylvania State University's "Tree River Geoscience Project 2022" Proposal**

Dear Jesse Reimink:

On December 15, 2021, the Nunavut Impact Review Board (NIRB or Board) received a referral to screen the Pennsylvania State University's (PSU) "Tree River Geoscience Project 2022" proposal from the Nunavut Planning Commission (The Commission). On January 27, 2022, the NIRB circulated a public notice of the screening for this project, inviting interested parties to provide comments directly to the NIRB.

On or before February 7, 2022, the NIRB received comments from the following interested parties:

- *Government of Nunavut – Department of Environment (GN – DOE)*
- *Crown – Indigenous Relations and Northern Affairs Canada (CIRNAC)*
- *Fisheries and Oceans Canada (DFO)*

All comment submissions received by the NIRB relating to this project proposal can be accessed from the NIRB's online public registry at [www.nirb.ca/project/125646](http://www.nirb.ca/project/125646).

Recognizing most of the comments received that are seeking clarification on activities which are not within the scope of the research activities, the NIRB would like to provide the Pennsylvania State University with an opportunity to provide further detail specific logistics related to parties' comments, prior to the Board rendering its determination for this screening assessment.:

- Regarding concerns about potential impacts from low level flying, as the project proposal requires transport to sample locations by float plane, but airplane operations is not managed by the research team, the NIRB requests that the Proponent provide confirmation from the contracted company that the following is in place:

- A spill plan for refuelling of the aircraft;
- Whether low-level flying will be restricted to landing and take-off;
- Provide a basic wildlife protocol which would outline the actions to be taken in the presence of wildlife; and
- Provide a timeline for consultation with the Kugluktuk Hunters and Trappers Organization which will be required to secure the necessary research licence from the Nunavut Research Institute.

The NIRB respectfully requests that a response be provided directly to the NIRB by **February 16, 2022**. If PSU determines that the time required to supply a written response is significantly greater than one (1) week, the Board requests written notification and an anticipated date for submission be provided as soon as possible.

Please send any forthcoming submissions directly to the NIRB at [info@nirb.ca](mailto:info@nirb.ca), or through the online public registry at [www.nirb.ca](http://www.nirb.ca).

If you have any questions or require additional clarification, please contact the undersigned directly at (867) 983-4622 or [motokiak@nirb.ca](mailto:motokiak@nirb.ca).

Sincerely,

Mia Otokiak  
Junior Technical Advisor  
Nunavut Impact Review Board
