

Demande de la CNER faisant l'objet d'un examen préalable #125677 Baker Lake Landfarm

Type de demande : New

Type de projet: Site Cleanup/Remediation

Date de la demande : 3/28/2022 11:01:57 AM

Period of operation: from 0001-01-01 to 0001-01-01

Autorisations proposées: from 0001-01-01 to 0001-01-01

Promoteur du projet: Sulaimon Ayilara

DÉTAILS

Description non technique de la proposition de projet

- Anglais: The proposed site for the landfarm is in Latitude 64.315, Longitude -96.020912 and (UTM) Zone 15 (Lot 1, Block 55, Plan 3512) at the back of PPD existing Oil Facility, away from the Hamlet of Baker Lake environmental pollution. The landfarm will be designed to hold 5000 CU.M. of contaminated soil for a maximum period of 4 years and decommission thereafter within the five years period allotted.
- Français: Le site proposé pour la ferme est à la latitude 64.315, longitude -96.020912 et (UTM) zone 15 (lot 1, bloc 55, plan 3512) à l'arrière de l'installation pétrolière existante de PPD, loin de la pollution environnementale du hameau de Baker Lake. Le landfarm sera conçu pour contenir 5000 CU.M. des sols contaminés pendant une période maximale de 4 ans et déclassement par la suite dans le délai de cinq ans imparti.
- Inuktitut: Δσ尼迪児रંબ મેળું ચાંગામું નોંચ 64.315, જર્લિં -96.020912 ફ્લાન (UTM) જોન 15 (માં 1, મેન્ડીં 55, લેન્ડલાન્ડ 3512) જે વિસ્તાર ડાબાનીં અનુભાવ કર્યું છે એવું અનુભાવ કર્યું છે કે 5000 કુન્ડામીં કર્યું છે. મેળું નોંચની પાંચ વર્ષથી અધિક હતી તો એવી વિસ્તાર નથી આપ્યું.
- Iniunnaqtun: Δσ尼迪児રંબ મેળું ચાંગામું નોંચ 64.315, જર્લિં -96.020912 ફ્લાન (UTM) જોન 15 (માં 1, મેન્ડીં 55, લેન્ડલાન્ડ 3512) જે વિસ્તાર ડાબાનીં અનુભાવ કર્યું છે એવું અનુભાવ કર્યું છે કે 5000 કુન્ડામીં કર્યું છે. મેળું નોંચની પાંચ વર્ષથી અધિક હતી તો એવી વિસ્તાર નથી આપ્યું.

Personnel

Personnel on site: 10

Days on site: 30

Total Person days: 300

Operations Phase: from 2022-08-31 to 2026-08-31

Activités

Emplacement	Type d'activité	Statut des terres	Historique du site	Site à valeur archéologique ou paléontologique	Proximité des collectivités les plus proches et de toute zone protégée
Baker lake Landfarm	Site Cleanup/Remediation	Commissioners	Propose landfarm will be at back of Existing PPD Oil Facility in Baker Lake where all contaminated soil will be remediated for environmental protection against hydrocarbon.	The location is not an archeological site, no history of physical remains of past human activities.	Site is protected and away from the Hamlet of Baker Lake environmental pollution and hazard.

Engagement de la collectivité et avantages pour la région

Autre,

Utilisation de matériel

Équipement à utiliser (y compris les perceuses, les pompes, les aéronefs, les véhicules, etc.)

Type d'équipement	Quantité	Taille – Dimensions	Utilisation proposée
Loader	2	N/A	For excavating gravel for the landfarm construction.
Excavator	1	N/A	For moving gravel
Dump truck	1	N/A	To move soil into landfarm
ZoomBoom	1	N/A	To move heavy materials to site

Décrivez l'utilisation du carburant et des marchandises dangereuses

Décrivez l'utilisation de carburant :	Type de carburant	Nombre de conteneurs	Capacité du conteneur	Quantité totale	Unités	Utilisation proposée
Diesel	fuel	1	200	200	Liters	200
Contaminated soil	hazardous	2	3000	6000	Cubic Meters	3000

Consommation d'eau

Quantité quotidienne (m3)	Méthodes de récupération de l'eau proposées	Emplacement de récupération de l'eau proposé
200	All contaminated water will be treated with our water treatment plant already on the Baker Lake site.	All water will be discharge after meeting all discharge criteria as per Environment Canada and Nunavut Water Act before discharge after treatment.

Déchets

Gestion des déchets

Activités du projet	Type des déchets	Quantité prévue	Méthode d'élimination	Procédures de traitement supplémentaires
Landfarm	Dangereux	6000	Soil remediation inside the landfarm	Addition of fertilizer to impacted soils for remediation process.
Landfarm	Dangereux	6000	Fertilizer will be added into soil for treatment. Estimated 4tons of fertilizer will be use for treatment.	All gravel will be supply by Baker Lake Construction Limited. Gravel types are Class A, 3/4 sizes,

Répercussions environnementales :

ENVIRONMENTAL CONSIDERATIONS - PPD have a working water treatment plant on site of Baker Lake and all impacted water generated from the contaminated area around the landfarm will be treated and proper discharge criteria before release to the environment. Materials are in place to appropriately contain all contaminated water from leaching the landfarm which include the diversion of water and leachate to a suitable lined retention pond where it can be recycled over the landfarm materials to maintain moisture content. It should be noted that PPD initiated this control system during summer operations.

Description de l'environnement existant : Environnement physique

PPD Tank Farm Baker Lake, NU with Location GPS - (Lat./Long) = Latitude 64.315, Longitude -96.020912

Description de l'environnement existant : Environnement biologique

Landfarm will be constructed with a strong HDPE liner engineered with gravel and fence gate around for human and wildlife interference protection.

Description de l'environnement existant : Environnement socio-économique

Existing PPD Oil facility presently provides fuel (Diesel and gasoline) to the Baker Lake community for energy to homes and offices. Soil contamination during gasoline spill of 2021 must be remediated inside the landfarm and thereby became necessary.

Miscellaneous Project Information

Baker Lake Landfarm Construction Material, Equipment All material needed includes – liner HDPE, Geotextile cloth for underneath the liner. All equipment needed includes – Loader, Excavator, Zoom Boom, Dump truck and Packer. Where to get gravel to build this landfarm? If so, how are you going to get the material to the site; Answer - All gravel will be supply by Baker Lake Construction Limited in the Hamlet. They are al readily available in the community and will be supply by the local contractor Baker Lake Construction Limited. List all the heavy equipment you will be using for this project; Answer – Heavy equipment needed includes Loader, Excavator, Zoom Boom, Dump truck and Packer. Materials to be used to build the landfarm can be filled in the Material Use for example: Answer - All material needed includes liner HDPE, Geotextile cloth for underneath the liner. • Types of gravel and how much approximately - Answer - Class A gravel type, $\frac{3}{4}$ size and approximately 5000 cubic meters of gravel to be use. • List all materials to construct the lined landfarm; - Answer - All material needed includes liner HDPE, Geotextile cloth for underneath the liner. • Fence for the land farm; - Answer - Yes, the landfarm will be fence round to avoid wildlife and unauthorized person inside the landfarm. • Fertilizer is going to be used, how much are you going to be using approximately - Answer - Fertilizer usage is presently on sealift with NEAS and we will use estimated 4 tons of fertilizer.

Identification des répercussions et mesures d'atténuation proposées

Baker Lake Landfarm requires the appropriate safeguards for the protection of human health and fence will be built around it. The potential for uncontrolled emissions, such as volatile organic compounds (VOCs), leachates and odours and any other adverse effects from treatment, needs to be considered on a site-specific basis according to the nature of the contamination and the conditions of the site. The landfarm will be located 2.5km from the Hamlet of Baker Lake, therefore no emissions reaching the general population. All operational procedures including Personal Protective Equipment (PPE) and methodology are outlined within the Operation and Maintenance Plan associated with this

landfarm. If properly operated every year, the risk of emissions affecting the general population or landfarm personnel is significantly decreased (EPA 2014).
