

**North Baffin Questionnaire Mitigating Strategies – s3.6.6/s3.7.7: Has the applicant planned to minimize the negative effects of its activity on the environment?**

While in the field, we will operate on the principle of “leave no trace”. This means that all waste/fuel/equipment used or generated during our field operations will be carried back with us to PCSP Resolute for proper storage and/or disposal. We will ensure that all waste material or fuel will be stored in the proper containment vessels to ensure no leak or chance of spill into the environment. We will ensure our sampling is as minimally invasive to the natural environment as possible. This means we will make the smallest number of drill/coring holes possible to leave the site as pristine a condition as possible once we leave.
