

Small Volume Fuel Spill Prevention Plan

- Ensure all fuels are properly labeled.
- Store, dispense, and/or use hazardous substances in a way that prevents releases.
- Provide secondary containment when storing fuel in bulk quantities.
- Maintain good housekeeping practices for all chemical materials on site.
- Perform routine/daily checks of the fuel storage area.

Small Volume Fuel Spill Response Plan

Spill Response Equipment

Garbage Bags

1 – Shovel

20 – Absorbent pads

1 box – Nitrile Gloves

Spill Response Plan

1. Make sure area is safe for entry and the spilled liquid does not pose an immediate threat to health and safety of responder.
2. Check for hazards (flammable material, noxious fumes, cause of spill).
3. If possible, stop the source of spill (plug hole, upright the container, shut off valve) following all health and safety procedures.
4. Prevent spill from entering any meltwater using absorbent or other spill response material as necessary or as directed by Workplace Hazardous Material Information System (WHMIS) and Safety Data Sheets (SDS).
5. If spilled material has entered any meltwater streams notify PCSP personnel.
6. Lay down absorbent pads on spill area.
7. Use a shovel to clean up spilled material/absorbent (do not flush area with water), including snow surrounding and underneath the spill area.
8. Dispose of cleaned material/absorbent in garbage bags for disposal as hazardous waste.
9. Notify person in charge of camp.
