QANURITTUT

Tukihiannaqtunik havaariyauyumayumik uqauhiuyun

Qablunaatitut: SWAN HELLENIC's, Maltese flagged small cruise vessel SH VEGA will be making the following Arctic cruises in 2022: Kangerlusuaq, Greenland to Kangerlusuaq, Greenland from September 09, 2022 to September 25, 2022. Kangerlusuaq, Greenland to Halifax, Canada, from September 25th, 2022 to October 10th, 2022. The vessel specializes in luxury adventure cruising and carries a maximum of 152 passengers and 120 crew members. The passengers are predominately North American and European nationals and the crew are a mix of nationalities. During this cruise, the vessel will be stopping at various locations in Nunavut. These locations can be found on the attached itinerary and map. Approximately 6 to 10 Zodiacs would be transporting passengers between the cruise vessel and shore at one time. No more than 100 people would be ashore at one time. This number can be reduced if required. The exact locations where the activities will take place in each area is unknown. The locations in each area will be determined by the Expedition Leader and Captain based upon weather and ice conditions and the presence of wildlife. Once passengers are landed ashore, they will be able to explore the location they are visiting in small groups. They will be assisted by crew members who are trained guides and naturalists that will provide safety guidance and information on the environment. The information supplied is specific to each location and is made in an effort to afford protection and conservation of the locations visited. Passengers will be instructed on where they should go, what to avoid and what is and isn't acceptable so as to avoid causing damage to any sites or to the environment they are visiting. The utmost care will be taken to provide an informative and positive experience without disruptive consequences. Crew members will also be stationed to provide a Polar Bear watch for passenger safety. Any firearms these crew will carry will be properly documented with the Canadian Border Service Agency (CBSA). Passenger and crew member involvement at these remote ports of call is meant for the purpose of personal interest and the activity undertaken will be confined to sightseeing only. No flora, fauna, soil, artifacts, remains or other material will be disturbed or collected for research purposes. As well, no structures will be erected and no equipment or other debris will be left ashore. SH VEGA is a cruise vessel providing adventure tourism opportunities to its passengers and is not a research or education vessel.

Uviititut: Le petit navire de croisière SH VEGA, battant pavillon maltais de SWAN HELLENIC, effectuera les croisières suivantes dans l'Arctique en 2022:Kangerlusuaq, Groenland à Kangerlusuaq, Groenland, du 09 septembre 2022 au 25 septembre 2022. Kangerlusuaq, Groenland à Halifax, Canada, du 25 septembre 2022 au 10 octobre 2022. Le navire se spécialise dans la croisière d'aventure de luxe et transporte un maximum de 152 passagers et 120 membres d'équipage. Les passagers sont principalement des ressortissants nord-américains et européens et l'équipage est un mélange de nationalités.Au cours de cette croisière, le navire s'arrêtera à divers endroits au Nunavut. Ces emplacements se trouvent sur l'itinéraire et la carte ci-joints.Environ 6 à 10 Zodiacs transporteront des passagers entre le navire de croisière et la rive en même temps. Pas plus de 100 personnes seraient à terre en même temps. Ce nombre peut être réduit si nécessaire. Les endroits exacts où les activités auront lieu dans chaque zone sont inconnus. Les emplacements dans chaque zone seront déterminés par le chef d'expédition et le capitaine en fonction des conditions météorologiques et de la glace et de la présence d'animaux sauvages.Une fois que les passagers seront débarqués à terre, ils pourront explorer l'endroit qu'ils visitent en petits groupes. Ils seront assistés par des membres d'équipage qui sont des guides et des naturalistes formés qui fourniront des conseils de sécurité et de l'information sur l'environnement. Les informations fournies sont spécifiques à chaque emplacement et sont faites dans le but d'assurer la protection et la conservation des sites visités. Les passagers seront informés de l'endroit où ils doivent aller, de ce qu'ils doivent éviter et de ce qui est acceptable et de ce qui ne l'est pas afin d'éviter de causer des dommages aux sites ou à l'environnement qu'ils visitent. Le plus grand soin sera pris pour fournir une expérience informative et positive sans conséquences perturbatrices. Les membres d'équipage seront également stationnés pour assurer une surveillance de l'ours polaire pour la sécurité des passagers. Toutes les armes à feu que ces membres d'équipage porteront seront dûment documentées auprès de l'Agence des services frontaliers du Canada (ASFC).La participation des passagers et des membres d'équipage à ces ports d'escale éloignés est destinée à des fins d'intérêt personnel et l'activité entreprise se limitera aux visites touristiques seulement. Aucune flore, faune, sol, artéfact, reste ou autre matériel ne sera perturbé ou recueilli à des fins de recherche. De plus, aucune structure ne sera érigée et aucun équipement ou autre débris ne sera laissé à terre. SH VEGA est un navire de croisière offrant des possibilités de tourisme d'aventure à ses passagers et n'est pas un navire de recherche ou d'éducation.

Pond Inlet - Community Visit 72°42'0.65N, 077°58'54.71W	Tourism Activities	Crown	Pond Inlet is a small community in Nunavut, located on northern Baffin Island. Community visit and engagement is planned for calls to Pond Inlet	N/A	The Sirmilik National Park on Bylot Island, the Tamaarvik Territorial Park, and the Qilaukat Thule site are near the hamlet.
Bylot Island 73°43'38.85N 72°42'55.13N to 081° 7'50.44W 079°20'18.05W	Tourism Activities	Crown	Almost all of the island is located within Sirmilik National Park, harbouring large populations of thick-billed murres, black-legged kittiwakes and greater snow geese. The eastern area of the island is federally designated as the Bylot Island Migratory Bird Sanctuary.[6] The Bylot Island Research Station is owned and run by the Centre d'études Nordiques (CEN: Centre for Northern Studies) and in collaboration with Parks Canada	Home to some of the best-preserved prehistoric artifacts in Canada's Far North. While remains of Paleoeskimo (Pre-Dorset and Dorset) cultures represent the earliest human occupations in within the park region, they represent only a small portion of the documented archaeological sites and Thule / Inuit sites make up the majority of documented archaeological sites within the park	Located within Sirmilik National ParkPond Inlet
Beechey Island 74°42'47.12N 091°49'46.70W	Tourism Activities	Crown	Beechey Island is best known for containing three graves of Franklin expedition members, which were	Five archaeological sites on Beechey Island and nearby Devon Island (the Franklin wintering camp of 1845–46, Northumberland	Resolute

			first discovered in 1850 by searchers for the lost Franklin expedition	House, the Devon Island site at Cape Riley, two message cairns, and the HMS Breadalbane National Historic Site) were designated as the Beechey Island Sites National Historic Site of Canada.[6]	
Dundas Harbour 74°31'54.32N / 082°24'56.05W	Tourism Activities	Crown	An outpost was established at the harbour in August 1924 as part of a government presence intended to curb foreign whaling and other activity. The Hudson's Bay Company leased the outpost in 1933, returned to the mainland 13 years later. Dundas Harbour was populated again in the late 1940s to maintain a patrol presence, but it was closed again in 1951 due to ice difficulties.	Only the ruins of a few buildings remain, along with one of the northernmost cemeteries in Canada.[7] houses made of sod and whale ribs, qajaq (kayak) stands, even ingenious polar bear traps fashioned out of stone.	Largest uninhabited in the world
Iqaluit 63.7467° N, 68.5170° W	Tourism Activities	Crown	Iqaluit is the capital city of the Canadian territory of Nunavut. It sits on vast Baffin Island in Frobisher Bay. The island is known for its ice-capped mountains and tundra valleys. Near the city, Sylvia Grinnell Territorial Park is home to caribou and Arctic foxes. CBSA Clearance and Community	Qaummaarviit Territorial Park, on a tiny island near the city, contains archaeological remains of the ancient Thule people	Iqaluit

			visit planned for Iqaluit.		
Lady Franklin Island 62.9200° N, 63.6941° W	Tourism Activities	Crown	Lady Franklin Island, is an uninhabited Baffin Island offshore island located in the Arctic Archipelago in the territory of Nunavut.	N/A	Iqaluit
Akpatok Island 60.4162° N, 68.1412° W	Tourism Activities	Crown	Uninhabited island in Ungava Bay.	Now uninhabited, for many centuries Akpatok was home to Indigenous peoples. The last Inuit residents departed for the mainland in around 1900. Inuit do still frequent the island in order to hunt and there are a few traces of civilization here, such as the remains of an ancient Dorset (pre-Inuit) settlement.	Located in Ungava Bay, closest community to Kimmirut

Avatiliriniqmut Ayurhautingit:

Ship and small boat operations have the potential to adversely impact wildlife, including through the vessel's presence and noise; and pollution from inadvertent ship discharges and exhaust. In addition, ship operations have the potential to specifically adversely impact marine flora and fauna, as a result of dropping the anchor; increased water turbulence; accidental collision; or where a vessel accidentally runs aground. Human activities ashore have the potential to result in 'harmful interference' with flora, fauna and ecological processes. Breeding birds or hauled-out seals may be disturbed by visual or acoustic effects of human activity. In the case of breeding birds, disturbance of incubating, brooding or guarding parents could predispose eggs or young to environmental stress (e.g., chilling/overheating); increased risk of

predation; or injury by neighbors. Sensitive vegetation may be damaged if people are careless and walk over them, rather than around them. Despite these potential impacts, SH Vega believes that - based on their normal practices and procedures - their operations will have no more than negligible impact on the environment. In order to undertake 'off ship' excursions or activities, the vessel will stop (or anchor) in areas to ensure minimal disturbance to proximate wildlife (i.e., known seabird colonies, breeding beaches and other aggregations), and minimal damage to sensitive sea floor substrate areas while maximising vessel (and in turn, passenger and crew) safety.
