

მეცნიერები

A photograph of a rocky coastline. In the foreground, there are large, layered rock formations in shades of grey and brown. A stone wall runs horizontally across the middle ground, with a path or road visible behind it. The background shows a body of water and a green, hilly coastline under a blue sky.

A photograph showing a steep, rocky slope. The foreground is dominated by a dense accumulation of light-colored, angular rock fragments (scree or talus). Some darker, more irregular rock pieces are interspersed among the lighter ones. Sparse, low-lying green vegetation is visible on the upper right portion of the slope, growing in crevices and on larger rock surfaces. The overall scene suggests a high-altitude or alpine environment.
