## PROJECT SCOPE:

The proposed “Coral Harbour Solar and Energy Storage Project” is located within the Kivalliq region, approximately 10 kilometres (km) from Coral Harbour. The Proponent intends to undertake geotechnical assessment and construct a utility-scale renewable energy and battery storage system in Coral Harbour. The program is proposed to take place from 2024 to 2054. The scope of this proposed project as identified by the NIRB includes the following undertakings, works or activities:

- Installation and operation of ten (10) rows of solar PV arrays
- Construction of an access road to the project site
- Installation of transmission line corridor that aligns with the access road
- Installation of a microgrid controller platform

Please visit the NIRB’s public registry online at the link above and look up NIRB File No.: **22UN031** to access all project information, maps, and public comment forms.

## REQUEST FOR COMMENTS

**You are invited to provide the NIRB with your comments regarding whether the proposed project is:**

- likely to arouse significant public concern and, if so, why;
- likely to cause significant adverse ecosystemic or socio-economic effects and, if so, why;
- likely to cause significant adverse impacts on wildlife habitat or Inuit harvest activities and, if so, why;
- a type where the potential adverse effects are highly predictable and can be prevented/managed appropriately with known technology.

Parties are also invited to recommend any specific mitigation measures they feel would be appropriate, and to bring any other matter of importance related to this project proposal to the NIRB’s attention.
