CHAIRPERSON'S FOREWORD

This Report summarizes the results of the Nunavut Impact Review Board's (NIRB or Board[5]) four-(4) year assessment[6] of Baffinland Iron Mines Corporation's (Baffinland or Proponent) "Phase 2 Development Proposal". This is a proposed modification to the approved Mary River Project (NIRB File No. 08MN053) operated by Baffinland. This assessment has been unprecedented in many ways, with more than half of the assessment being conducted during the COVID-19 pandemic. As a result, the Board was required to modify its standard timelines and practices and sought two (2) public health exemption orders to conduct proceedings that maintained the Board's objectives, while preserving the health and safety of participants and communities.

This has also been the Board's most extensive assessment, with major process steps including:

1. A community scoping tour in the seven (7) potentially affected North Baffin communities in early 2019;
2. Two 3-day Technical Meetings held in April and June of 2019;
3. A site visit to Milne Port and the Mary River Mine Site by the Board and parties in September 2019;
4. A 5-day Public Hearing held in Iqaluit in November 2019;
5. A 5-day Technical Meeting conducted by teleconference in September 2020;
6. A 4-day in-person/video and audio conference Community Roundtable/Pre-Hearing Conference hosted in Pond Inlet and linked to venues in Iqaluit, Winnipeg and Ottawa in the fall of 2020; and
7. 21 days of in-person/video and audio conference Public Hearing technical sessions and a Community Roundtable hosted in Pond Inlet and Iqaluit (with the venues linked through Zoom feed) in January-February, April and November, 2021

Approximately two (2) dozen Registered Intervenors (representing Inuit organizations, regulators, government agencies, non-governmental organizations, and community-based organizations) participated during the Board's assessment and contributed thousands of pages of written submissions on the Public Hearing Record, and asked and answered thousands of oral

[5]Due to public health restrictions limiting travel and the expiry of Board Member terms over the course of the Board's assessment, in 2020 it became necessary for the full Board to delegate the completion of the assessment of the Phase 2 Development Proposal to a three-Member Panel of the Board established in accordance with s. 27 of the *Nunavut Planning and Project Assessment Act*, S.C. 2013, c. 2, s. 14 (*NuPPAA*). As the Panel is the Board's delegate for the purposes of decision-making, this Report uses the terminology "the Board" to refer to all NIRB decision-making for the file, and does not distinguish between decisions made by the duly appointed Panel or decisions made by the full Board prior to delegation to the Panel.

[6]Although a version of the Phase 2 Development Proposal that did not involve transportation via rail was originally provided to the Nunavut Planning Commission on October 29, 2014, the Phase 2 Proposal Development reflecting the scope of the assessment summarized in this Report was referred to the NIRB by the Nunavut Planning Commission on May 29, 2018.

and written questions. The Public Hearing Record for the file also includes documents filed with and by the Government of Denmark to consider potential transboundary effects in Greenland.

In addition, more than 50 people participated in the Public Hearings as Community Representatives from Pond Inlet, Igloolik, Sanirajak, Arctic Bay, Clyde River, Grise Fiord, and Resolute, and interested members of the public also attended the community scoping tour and Public Hearing sessions to share their knowledge with the Board, ask questions, and express their concerns. These individuals represented a broad demographic of participants including Elders, youth, women, Hamlets, and Hunters and Trappers Organizations. There are approximately 5,000 pages of transcripts for the Public Hearing sessions and more than 120 Exhibits were filed during the Public Hearings. For the first time, some sessions of the Board's Public Hearing proceedings were broadcast live on Nunavut Independent Television's Uvagut TV channel across Nunavut and Canada. During the pandemic, hundreds of individuals were able to view, and in some cases participate, remotely via Zoom or teleconference in the proceedings.

As a result of the unprecedented Public Hearing Record, the length and complexity of the assessment and the disruptions and challenges resulting from the changing public health measures during the COVID-19 pandemic, the Board added 60 days to the standard 45-day timeline for decision-making. This additional time was necessary to ensure the Board's decision reflects "Ingalangaittuq": i.e. allowed the Board to observe and process the extensive Public Hearing Record for the file in a mindful, holistic, and comprehensive manner.

Through the Board's assessment of potential ecosystemic effects, the Board heard that despite the experience gained with the current version of the Mary River Project since the Board's assessment of the original Mary River Project in 2012 there are still significant gaps in understanding, regional monitoring, and regulatory capacity that lead to high levels of uncertainty with respect to:

1. Baseline conditions in the terrestrial and marine environment;
2. Whether effects predicted during the Board's assessments of the original Mary River Project and modifications under the Early Revenue Phase, the Production Increase Proposal and the Extension of the Production Increase Proposal accurately reflect the effects being seen in the North Baffin Communities; and
3. Whether Baffinland's current and proposed mitigation and monitoring measures are and/or will be effective to prevent and manage the potential for significant adverse effects from the Phase 2 Development alone or in combination with the effects of Baffinland's current and future operation of the Mary River Project.

Specifically, the Board notes the extensive submissions from the Proponent and the parties, highlighted that considerable uncertainty and concern remains with respect to the potential for the Phase 2 Development Proposal to result in significant:

- Impacts on marine mammals (narwhals, seals, walrus, etc.), marine fish and the marine ecosystem due to the proposed increases to shipping during the open water season, including cumulative impacts associated with the combination of project-effects and climate change and changes to marine shipping and cruise ship traffic in the Region;
- Impacts to caribou populations and movement associated with the transportation of increased volumes of iron ore along the existing Tote Road, and the construction and operation of the North Railway;
- Future cumulative impacts to caribou when Baffin Island is bisected by both the North Railway and the South Railway (as approved in 2012 under the original Mary River Project);
- Impacts on the air, vegetation, freshwater, and ice due to dust emissions at Milne Port (from the ore stockpiles and ship loaders), along the Tote Road, along the proposed North Railway and at the Mine Site; and
- Impacts to snow and ice due to increased black carbon emissions associated with the use of heavy fuel oil by ships when travelling outside the Nunavut Settlement Area.

As was the case in the Board's previous assessments of the Mary River Project and subsequent modifications, given the importance of marine mammals, fish, and caribou to Inuit, the vulnerability and sensitivity of marine wildlife and caribou to disturbance and disruption, and uncertainty regarding the baseline conditions and potential effects of the Phase 2 Development Proposal, the Board has applied a high standard of the precautionary principle to its assessment of the potential for effects on these valued ecosystem components.

Further, the Board heard from Nunavut Tunngavik Incorporated, the Qikiqtani Inuit Association, community-based Intervenors, Community Representatives, and members of the public that, to date, the Proponent and regulators have not meaningfully considered and applied Inuit knowledge and experience to address this uncertainty and to adaptively manage the effects of the existing Mary River Project. The Board heard communities express frustration and dissatisfaction with the Proponent's response to impacts identified by communities such as the displacement of narwhal and seal populations near Pond Inlet. The Board also heard that the Proponent has failed to understand and respond to community concerns about the impacts they are seeing on snow, ice, freshwater, and vegetation resulting from dust emissions associated with the existing Project. The Board observed a gap in the Proponent's and regulators' understanding that although current project monitoring may not have identified specific ecosystemic effects, Inuit have identified that they are having to change their harvesting and land use practices due to the effects of the Project that they are already experiencing (e.g. not being able to use traditional hunting, camping, and fishing areas near the Project site because the snow, land, and wildlife has been impacted by red dust). Further, Inuit Qaujimajatuqangit shared with the Board, particularly from Pond Inlet, indicated that Inuit are experiencing changes to harvesting conditions such as the timing, location, and levels of effort required for harvesting, and that such

changes are threatening food security and creating cultural losses for which communities cannot be compensated. On this basis, Inuit organizations, community-based intervenors, numerous Community Representatives, and members of the public indicated that they did not support the Phase 2 Development Proposal moving forward until Inuit Qaujimajatuqangit is more fully understood and applied to address the effects already being experienced from the existing Mary River Project.

In the summer of 2020, Baffinland and the Qikiqtani Inuit Association advised the Board they had signed the "Inuit Certainty Agreement" (ICA), parts of which introduce a new Inuit-led and Inuit-informed approach to monitoring, mitigation, and adaptive management under the Phase 2 Development Proposal. The Board determined that the articles of the ICA relating to monitoring and mitigation of the effects of the Phase 2 Development Proposal were relevant to the Board's assessment and should be considered by the Board. As proposed, the ICA reflects a novel, made-in-Nunavut process, with the potential to ensure Inuit knowledge and experience plays a central role in project monitoring, adaptive management and mitigation going forward. Baffinland indicated that the ICA was the mechanism that would be relied upon to supplement the existing monitoring and mitigation programs for the current Mary River Project if the Phase 2 Development Proposal were to proceed.

However, during the Technical Meeting and Community Roundtable conducted in the fall of 2020, the Board heard that there was limited trust in, and support for the ICA, amongst the North Baffin communities. Important questions remained about how an independent, voluntary agreement without a clear linkage to regulatory and enforcement mechanisms would be effective. Some parties were skeptical that the new Committees proposed through the ICA could work well, noting that the Working Groups already established for the approved Project are not functioning effectively. During this assessment and the monitoring of the approved Mary River Project, the Board has noted that the existing Terrestrial Environment Working Group (TEWG) and Marine Environment Working Group (MEWG) have been unable to come to agreement about important components of adaptive management for the current Mary River Project, such as the selection of Early Warning Indicators. It appears that the important work of the TEWG and MEWG did not progress during the assessment. The Board observed that the trust necessary for effective collaboration has eroded and important working relationships between the communities, Inuit Organizations, regulators, and Proponent have been damaged in the decade after the Board approved the original Mary River Project. It is also unclear how the ICA could be implemented successfully in light of the Qikiqtani Inuit Association's statement that they do not support the Phase 2 Development Proposal, but would honor the commitments in the ICA if the Phase 2 Development Proposal was approved to proceed. Consequently, the Board has serious concerns about the heavy reliance of the Proponent and parties on the ICA being implemented as envisioned to address uncertainty, ensure Inuit knowledge and experience occupies a central role

in the adaptive management of the Project, and supports community-led and culturally relevant monitoring.

In addition to considering the potential for ecosystemic effects on wildlife to result in socio-economic effects on Inuit harvesting, culture, land use and food security, the Board also considered the potential for the Phase 2 Development Proposal to have positive socio-economic effects. The Hamlets of Pond Inlet and Sanirajak indicated they supported the Phase 2 Development Proposal due to the potential positive socio-economic benefits for the Region in terms of employment, royalties, financial assistance with community infrastructure (e.g. daycares, health centers, and equipment), as well as compensation for project effects . The Board's assessment of socio-economic effects also considered Baffinland's confirmation that the future of the Mary River Project as a whole is dependent on the Phase 2 Development Proposal proceeding. In response, several parties challenged the nature and extent of the socio-economic benefits and questioned the extent to which Baffinland would be able to deliver all of these benefits to the North Baffin communities and particularly Pond Inlet. Parties noted that Baffinland has a track record of missed Inuit employment targets for the existing Project and questioned the long-term effect on Inuit employment when Baffinland switches from trucking the ore along the Tote Road to the North Railway. Some parties also challenged the Proponent's stated need for the Phase 2 Development Proposal and Baffinland's position that the current version of the Mary River Project is not economically viable on its own.

The Board has concluded that due to several factors, including education, training, labour market and demographics, some of which are beyond the control of the Proponent, there remains uncertainty regarding whether the full scale of the proposed benefits can be delivered, and questions remain as to the extent of Inuit contracting and Inuit employment that may be delivered by the Phase 2 Development Proposal. Despite this uncertainty, the Board recognizes that both the current Mary River Project and the Phase 2 Development Proposal represents approximately $2.4 billion in royalties among other economic benefits, and would be significant economic drivers in both the North Baffin Region and Nunavut more generally. The Government of Nunavut (GN) acknowledged that future employment and business opportunities associated with the Mary River Project are a major component of the GN's strategy to address the significant increase in the number of young people entering Nunavut's workforce in the next decade. The Board acknowledges that the Proponent confirmed at the Public Hearing that if the Phase 2 Development Proposal is not approved the existing Mary River Project may be suspended, and the bigger Mary River Project as approved in 2012 may not proceed at all. Accordingly, the Board has considered the potential for significant and immediate adverse socio-economic impacts that would result if the current Mary River Project is placed into care and maintenance and the longer term adverse effects if further development of the original Mary River Project does not occur.

However, the potential for economic benefits that the Phase 2 Development Proposal represents must be considered in a holistic way that takes into account the potential for significant adverse ecosystemic effects and socio-economic effects. As explained in greater detail and for the reasons contained in this Report, the Board has concluded the following:

- The voluminous record filed in respect of the assessment highlighted that a high degree of uncertainty still remains in terms of the potential for the Phase 2 Development Proposal to have significant adverse effects in the marine and terrestrial environments; and
- There are significant gaps in the application and understanding of Inuit knowledge and experience by the Proponent and regulators, which have eroded the trust and confidence in the measures being developed and implemented to effectively mitigate, adaptively manage and monitor the effects of the existing Mary River Project. In the current context, the Board is not confident that these gaps can be effectively bridged under the ICA, and as a result is not confident that the potential for significant adverse effects resulting from the Phase 2 Development Proposal can be mitigated.

After careful consideration, the Board has concluded that there is potential for the Phase 2 Development Proposal to have significant and lasting adverse effects on marine mammals and fish, caribou and other terrestrial wildlife, along with vegetation and freshwater. The Board also finds that these ecosystemic effects may in turn lead to significant adverse socio-economic effects on Inuit harvesting, culture, land use and food security. The Board has decided that despite the best efforts of all involved in the development of more than 250 commitments and the ICA, the potential for these significant adverse ecosystemic and socio-economic effects cannot be adequately mitigated to allow the Phase 2 Development Proposal to proceed at this time. On this basis, the Board has concluded that the Phase 2 Development Proposal as assessed cannot proceed in a manner that will protect the ecosystemic integrity of the Nunavut Settlement Area and protect and promote the existing and future well-being of the residents and communities of the Nunavut Settlement Area, and Canada more generally.

The Board recognizes that because the Board has not recommended that the Phase 2 Development Proposal be allowed to proceed and the Extension to the Production Increase Proposal lapsed on December 31, 2021, there are implications to Baffinland's existing operation of the Mary River Project. Consequently, the Board has identified some required clarifications in respect of Terms and Conditions to the existing Project Certificate No. 005 that were previously varied by the Minister to reflect the Production Increase Proposal and its Extension. To address these issues, the Board has sought guidance from the Minister and provided observations and recommendations for the Minister's consideration in Section 6 and Section 8 of this Report. In Section 3 and Section 7 of the Report the Board has included recommendations to the Proponent, regulatory authorities, as well as land and mineral owners aimed at responding to the uncertainty

and key issues in respect of current and predicted project effects and the existing monitoring, mitigation and adaptive management programs for the current Mary River Project that were identified by the Board during the assessment.

In closing, the Board thanks the Proponent, the federal, territorial and local governments, Nunavut Tunngavik Incorporated, the Qikiqtani Inuit Association, other Registered Intervenors, and members of the potentially affected North Baffin Communities who shared their perspectives, wisdom and knowledge with the Board throughout the assessment, despite some exceptionally challenging circumstances. The Board is grateful for all their hard work, dedication and passion; their contributions have greatly assisted the Board in conducting this assessment and have provided invaluable information relied on by the Board to develop the conclusions and recommendations that follow.

Qujannamiik,

Marjorie Kaviq Kaluraq
Chairperson
Nunavut Impact Review Board

AVANT-PROPOS DE LA PRÉSIDENTE

Par le présent rapport, la Commission du Nunavut chargée de l'examen des répercussions (la CNER ou la Commission[9]) présente un résumé des résultats de son évaluation de quatre (4) [10] ans de la proposition de mise en valeur de la phase 2 » de la Baffinland Iron Mines Corporation (la Baffinland ou le promoteur). Il s'agit d'une modification proposée au projet minier de la rivière Mary (no. de dossier 08MN053 de la CNER), exploité par la Baffinland. L'évaluation a été une évaluation sans précédent et sur plusieurs fronts. En effet, plus de la moitié des procédures ont été effectuées pendant la pandémie de la COVID-19. Ce qui a obligé la Commission à modifier ses pratiques et échéances régulières et à solliciter auprès des autorités de santé publique, deux ordonnances d'exemption l'autorisant à mener ses travaux axés sur ses objectifs tout en préservant la santé et la sécurité des participants et des collectivités des autorités de santé publique.

Cette évaluation, la plus vaste jamais effectuée par la Commission, comportait plusieurs étapes importantes, notamment:

14. Au début 2019, tournée d'établissement de la portée des incidences dans les sept (7) municipalités du Nord de l'île de Baffin, potentiellement touchées;
15. Deux réunions techniques de 3 jours en avril et en juin 2019;
16. En septembre 2019, la Commission et les parties prenantes ont visité le site du port Milne et le site minier de la rivière Mary;
17. Audience publique de 5 jours tenue à Iqaluit en novembre 2019;
18. Réunion technique de 5 jours tenue par téléconférence en septembre 2020;
19. À l'automne 2020, conférence pré-audience/table ronde communautaire de 4 jours organisée en présentiel/conférence audio et vidéo à Pond Inlet, et par liaison avec des sites connexes situés à Iqaluit, Winnipeg et Ottawa.
20. En janvier-février, avril et novembre 2021, 21 jours de séances techniques d'audience publique et table ronde communautaire organisés en présentiel/conférence vidéo et audio à Iqaluit et à Pond Inlet (avec liaison par Zoom aux sites connexes).

[9]En raison des restrictions de santé publique et de l'expiration des mandats des membres du Conseil au cours de l'évaluation, la Commission au complet a dû déléguer le parachèvement de l'évaluation de la proposition de mise en valeur de la phase 2 à un Groupe d'experts composé de trois membres de la CNER, conformément à l'article 27 de la *Loi sur l'aménagement du territoire et l'évaluation des projets au Nunavut*, LC 2013, ch.14, art.2 (*LATEPN*). Puisque le Groupe d'experts est le délégué de la Commission aux fins de prise de décision, la terminologie « la Commission » utilisée dans ce rapport se réfère à toutes les prises de décision relatives à ce dossier et n'établit aucune distinction entre celles prises par le Groupe d'experts dûment mandaté et celles prises par la Commission au complet avant la délégation au Groupe d'experts.

[10]Bien qu'une version de la proposition de mise en valeur de la phase 2 n'intégrant aucun transport par chemin de fer ait été initialement transmise à la Commission d'aménagement du Nunavut le 29 octobre 2014, c'est en fait le 29 mai 2018 que la Commission d'aménagement du Nunavut a envoyé à la CNER la proposition de développement de la phase 2 traduisant l'envergure de l'évaluation résumée dans ce rapport

Environ deux (2) douzaines d'intervenants inscrits (représentant des organisations inuites, des organismes de réglementation, des organismes gouvernementaux, des organisations non gouvernementales et des organisations communautaires) ont participé à l'évaluation de la Commission, ont formulé des observations contribuant aux milliers de pages écrites du compte-rendu de l'audience publique; ils ont posé et répondu à des milliers de questions orales ou écrites. Ce compte-rendu incluait aussi des documents du gouvernement du Danemark ou déposés auprès de ce gouvernement afin d'examiner les possibles effets transfrontaliers au Groenland.

En outre, plus de 50 personnes ont participé aux audiences publiques en tant que représentants communautaires de Pond Inlet, Igloolik, Sanirajak, Arctic Bay, Clyde River, Grise Fiord et Resolute; des membres intéressés de la population ont également assisté à la tournée communautaire d'établissement de la portée et aux séances de l'audience publique, faisant profiter la Commission de leur savoir, posant des questions et exprimant leurs préoccupations. Ce groupe constituait un large éventail de la répartition démographique, incluant des Aînés, des jeunes, des femmes, des représentants de hameaux et d'organisations de chasseurs et trappeurs. Environ 5 000 pages de transcriptions des séances d'audience publique et plus de 120 pièces ont été déposées au dossier pendant les audiences publiques. Pour la première fois, les délibérations d'audience publique ont été diffusées en direct au Nunavut et au Canada sur la chaîne Uvagut TV de la Nunavut Independent Television. Pendant la pandémie, des centaines de personnes éloignées ont pu voir le déroulement des séances et quelquefois y participer par Zoom ou téléconférence.

Étant donné ce compte-rendu sans précédent des audiences publiques, la longueur et la complexité de l'évaluation et les défis et interruptions dus aux mesures sanitaires changeantes pendant la pandémie de la COVID-19, la Commission a ajouté soixante jours (60) au calendrier des 45 jours décisionnels. Cet ajout s'avérait nécessaire pour que, dans sa décision, la Commission puisse être guidée par « l'Ingalangaittuq », à savoir, examiner et traiter le vaste compte-rendu de l'audience publique du dossier dans une perspective consciencieuse, globale et intégrée.

Tout au long de son évaluation des possible effets écosystémiques, la Commission a entendu que malgré l'expérience acquise depuis l'évaluation du projet initial en 2012 dans l'exploitation la version actuelle du projet minier de la rivière Mary, d'importants écarts continuent à se manifester en ce qui a trait à la compréhension, à la surveillance régionale et à la capacité de réglementation, écarts qui provoquent de très grandes incertitudes concernant:

21. Les conditions de référence dans l'environnement terrestre et le milieu marin;
22. Est-ce que les effets pressentis pendant les évaluations du projet initial de la rivière Mary et les modifications apportées au titre de la Phase de revenu initial, de la proposition d'augmentation de la production et de l'extension de la proposition d'augmentation de

la production reflètent avec précision les effets vus par les collectivités du nord de l'Île de Baffin; et

23. Est-ce que les mesures actuelles et proposées de surveillance et d'atténuation sont et/ou seront suffisamment efficaces pour prévenir et gérer les éventuels et importants effets négatifs de l'actuelle et future exploitation par la Baffinland du projet minier de la rivière Mary.

Et plus particulièrement, la Commission a constaté que dans leurs observations détaillées, le promoteur et les parties soulignaient la persistance d'une vaste incertitude et de grandes préoccupations vis-à-vis de la proposition de mise en valeur de la phase qui, par nature, pourrait:

- Se répercuter sur les mammifères marins (narvals, phoques, morses, etc..), les poissons de mer et l'écosystème marin à cause de la proposition d'augmentation du trafic maritime pendant la saison des eaux libres, incluant les effets cumulatifs associés à la combinaison des effets du projet, du changement climatique, des changements du trafic maritime et du trafic des navires de croisière dans la région;
- Se répercuter sur les populations et les déplacements des caribous en raison du volume accru de minerai de fer transporté le long de la route d'approvisionnement existante et de la construction de la voie ferrée dans le corridor nord;
- Avoir de futures incidences cumulatives sur les caribous lorsque l'île de Baffin sera traversée par les voies ferrées des corridors nord et sud (tels qu'approuvés en 2012 dans le projet initial de la rivière Mary);
- Se répercuter sur l'air, la végétation, l'eau douce et la glace à cause des émissions de poussière au port Milne (des piles de stockage du minerai et des chargeurs de navires), le long de la route d'approvisionnement et de la voie ferrée proposée dans le corridor du nord et enfin au site de la mine;
- Se répercuter sur la neige et la glace à cause de l'augmentation des émissions de carbone noir provenant des minéraliers utilisant du mazout lourd à l'extérieur du Nunavut.

Comme ce fut le cas dans les évaluations préalables de la Commission du projet de la rivière Mary et des modifications ultérieures et étant donné l'importance des mammifères marins, des poissons et des caribous pour les Inuits ainsi que la vulnérabilité et la sensibilité de la faune marine et des caribous aux dérangements et perturbations et l'incertitude concernant les conditions de référence et les effets potentiels de la proposition de mise en valeur de la phase 2, la Commission a appliqué à son évaluation des incidences potentielles sur les composantes valorisées de l'écosystème, une norme élevée du principe de précaution.

La Commission a en outre entendu la Nunavut Tunngavik Incorporated, la Qikiqtani Inuit Association, les intervenants communautaires, les représentants de la communauté et les membres du public déclarer que jusqu'à présent, le promoteur et les organismes de réglementation n'avaient pas sérieusement tenu compte du savoir et des expériences inuites et

ne les avaient pas appliquées pour régler cette incertitude et assurer une gestion adaptative des effets du projet existant de la rivière Mary. La Commission a entendu les frustrations et l'insatisfaction des collectivités devant la réponse du promoteur aux problèmes dénoncés, notamment le déplacement des populations de narvals et de phoques près de Pond Inlet. Elle a également appris que le promoteur n'avait ni compris ni réagi aux inquiétudes des communautés lorsqu'elles ont constaté les effets de émissions de poussière issues de l'actuel projet, sur la neige, la glace, l'eau douce et la végétation. La Commission a réalisé que le promoteur et les organismes de réglementation ne comprenaient pas que même si des effets écosystémiques précis n'avaient pas été identifiés lors de la surveillance du projet, les Inuits se voyaient désormais obligés de changer leurs pratiques de récoltes et d'utilisation des terres à cause des répercussions subies (ne plus être en mesure de pratiquer la chasse traditionnelle ni de camper et de pêcher près du site du projet car la poussière rouge affectait la neige, les terres et les espèces sauvages). De plus, selon le savoir inuit Qaujimajatuqangit transmis à la CNER, notamment à Pond Inlet, les Inuits endurent des changements dans les conditions de récoltes, comme la saison, l'emplacement et les efforts requis à cette fin; en outre, de tels changements menacent la sécurité alimentaire et créent des pertes dans les récoltes pour lesquelles ils ne peuvent être indemnisées. C'est pourquoi, des organisations inuites, des intervenants communautaires, de nombreux représentants de la communauté et des membres de la population ont indiqué qu'ils n'appuieraient pas la proposition de mise en valeur de la phase 2 tant que l'Inuit Qaujimajatuqangit ne serait pas pleinement intégré et appliqué pour combattre les effets déjà subis par le projet existant de la rivière Mary.

À l'été 2020, la Baffinland et la Baffinland and the Qikiqtani Inuit Association ont annoncé à la Commission qu'elles avaient ratifié "l'Inuit Certainty Agreement" (ICA) dont certains articles prévoyent l'instauration d'une approche instruite et dirigée par les Inuits en matière de surveillance, d'atténuation des effets et de gestion adaptative de la proposition de mise en valeur de la phase 2. La Commission a estimé que ces articles de l'ICA visant la surveillance et l'atténuation des effets de mise en valeur de la phase 2, s'inscrivaient pertinemment dans son évaluation et qu'elle devrait en tenir compte. Tel que proposé, l'ICA prescrit un nouveau processus fabriqué au Nunavut, qui de par sa nature, positionne le savoir et les expériences des Inuits au cœur même des programmes de surveillance, de gestion adaptative et d'atténuation des effets d'un projet. La Baffinland a indiqué que si la proposition de mise en valeur de la phase 2 allait de l'avant, elle s'appuierait sur l'ICA pour compléter les programmes existants de surveillance et d'atténuation de l'actuel projet de la rivière Mary.

Toutefois, pendant la réunion technique et la table ronde communautaire de l'automne 2020, la Commission a constaté que les collectivités du nord de l'île de Baffin n'avaient qu'une confiance limitée envers l'ICA auquel elles adhéraient peu. D'importantes questions persistaient quant à l'efficacité d'une entente indépendante et volontaire sans aucun lien clair avec les mécanismes

de réglementation et d'obligation. Certaines parties doutaient de la capacité de bien fonctionner des nouveaux comités proposés dans le cadre de l'ICA, d'autant que les groupes de travail déjà établis pour le projet n'étaient pas très efficaces. Pendant cette évaluation et la surveillance du projet approuvé de la rivière Mary, la Commission a constaté que le Groupe de travail pour l'environnement Terrestre (GTET) et le Groupe de travail pour le milieu marin (GTMM) n'avaient pas réussi à s'entendre sur les essentielles composantes de la gestion adaptative de l'actuel projet de la rivière Mary, notamment sur la sélection d'indicateurs d'alerte rapide. Il semble d'ailleurs que l'important travail du GTET et du GTMM soit resté lettre morte pendant cette évaluation. La Commission a constaté que la confiance requise pour une efficace collaboration s'était érodée et qu'au cours de la décennie suivant l'approbation du projet initial de la rivière Mary, les relations de travail entre les collectivités, les organisations inuites, les organismes de réglementation et le promoteur s'étaient endommagées. Et d'ailleurs, comment la mise en vigueur de l'ICA pourrait-elle réussir puisque la Qikiqtani Inuit Association a déclaré qu'elle n'appuierait pas la proposition de mise en valeur de la phase 2, mais honorerait ses engagements pris dans le cadre de l'ICA si la proposition était autorisée à aller de l'avant. Par conséquent, la Commission s'interroge grandement sur la forte dépendance du promoteur et des parties envers l'instauration prévue de l'ICA comme mécanisme de règlement des incertitudes, défenseur du positionnement central du savoir et des expériences inuites dans la gestion adaptative du projet, et soutien d'une surveillance culturellement pertinente et dirigée par la collectivité.

De plus, en regardant attentivement si les effets écosystémiques sur les espèces sauvages pouvaient entrainer des effets socioéconomiques sur les récoltes, les cultures, l'utilisation des terres et la sécurité alimentaire, la Commission s'est également demandé si la proposition de mise en valeur de la phase 2 pourrait avoir des effets socioéconomiques positifs. Les municipalités (hameaux) de Pond Inlet et de Sanirajak ont indiqué qu'elles appuyaient la proposition de mise en valeur de la phase 2 en raison de sa potentialité d'avantages économiques pour la région, notamment en termes d'emplois, de redevances, d'aide financière pour l'infrastructure de la communauté (par ex : garderies, centres de santé et équipement) ainsi que d'indemnisation des effets du projet. Dans son évaluation des effets socioéconomiques, la Commission a également tenu compte de la déclaration de la Baffinland qui a affirmé que l'avenir du projet de la rivière Mary dans son ensemble dépendait des délibérations sur la proposition de mise en valeur de la phase 2. En réaction, plusieurs parties avaient questionné la nature et l'ampleur des avantages socioéconomiques et avaient demandé dans quelle mesure la Baffinland serait capable de livrer tous ces avantages aux collectivités du nord de l'île de Baffin, et plus particulièrement à Pond Inlet. Les parties prenantes ont souligné que pour le projet existant, la Baffinland était reconnue pour avoir raté ses cibles en matière d'emploi d'Inuits; ils ont questionné les conséquences à long terme qu'aurait sur l'emploi le virage du transport du minerai par camions sur la route Tote au transport par chemin de fer dans le corridor du nord.

Certaines parties ont également contesté le besoin absolu de la proposition de mise en valeur de la phase 2 ainsi que l'affirmation de la Baffinland selon laquelle la version actuelle du projet de la rivière Mary ne serait pas économiquement viable en tant que telle.

La Commission a conclu qu'en raison de différents facteurs, incluant l'éducation, la formation, le marché du travail et la démographie – certains d'ailleurs hors du contrôle du promoteur -, la prestation de toute la gamme des avantages décrits dans la proposition de mise en valeur de la phase 2 demeurait incertaine et que des questions continuaient à se poser, notamment en ce qui a trait à l'envergure des marchés accordés aux Inuits et des possibilités d'emplois pour la population du Nunavut. Malgré cette incertitude, la Commission reconnait qu'en plus des autres avantages, cette proposition rapporterait environ 2.4 milliards de dollars en redevances. Elle serait un important moteur économique pour la région nord de l'île de Baffin et le Nunavut en général. Le gouvernement du Nunavut (NU) a reconnu que les futures possibilités d'emploi et d'affaires liées au projet de la rivière Mary constitueraient l'un des principaux piliers de sa stratégie d'emploi pour faire face au nombre croissant de jeunes qui arriveront sur le marché du travail au cours de la prochaine décennie. La Commission reconnait que lors de l'audience publique, la Baffinland a affirmé que si cette mise en valeur n'était pas approuvée, l'avenir de l'actuel projet de la rivière Mary pourrait être suspendu et le plus grand projet, tel qu'approuvé en 2012, pourrait être arrêté. Par conséquent, la Commission a tenu compte des possibles, importants et immédiats effets socioéconomiques négatifs qui découleraient du placement de l'actuel projet de la rivière Mary en phase de préservation et d'entretien et des incidences négatives à plus long terme qui surviendraient en cas de non-évolution du projet initial.

Toutefois, les possibles avantages économiques qui découleraient de la proposition de mise en valeur de la phase 2 doivent être examinés selon une approche holistique intégrant les possibles et substantiels effets écosystémiques et socioéconomiques négatifs. Tel que détaillé dans ce rapport et pour les raisons qui y sont dévoilées, la Commission a conclu que:

- Tel que souligné dans le volumineux compte-rendu de cette évaluation, un haut niveau d'incertitude subsiste quant à la potentialité de substantiels effets négatifs que pourrait avoir la proposition de mise en valeur de la phase 2 sur les environnements terrestre et marin; et
- Les importantes lacunes du promoteur et des organismes de réglementation quant à la compréhension et l'application du savoir et des expériences inuits ont érodé la confiance dans les mesures élaborées et mises en vigueur pour une efficace atténuation, une gestion adaptative et la surveillance des effets du projet existant de la rivière Mary. Dans le contexte actuel, la Commission ne croit pas que ces lacunes puissent être efficacement comblées par l'ICA et, par conséquent, n'est pas convaincue que les possibles et substantiels effets adverses de la proposition de mise en valeur de la phase 2 puissent être atténués.

Après un examen approfondi, la Commission a conclu que la proposition pouvait potentiellement avoir des effets négatifs durables sur les mammifères marins, les poissons, les caribous et autres espèces sauvages terrestres ainsi que sur la végétation et l'eau douce. La Commission estime en outre que ces incidences écosystémiques pourraient provoquer des effets socioéconomiques négatifs sur les récoltes des Inuites, les cultures, l'utilisation des terres et la sécurité alimentaire. La Commission a décidé qu'en dépit des efforts soutenus de toutes les parties dans l'élaboration de plus de 250 engagements et de l'ICA, la potentialité de ces négatives incidences socioéconomiques et écosystémiques ne saurait, à l'heure actuelle, être adéquatement atténuée pour permettre à la proposition de mise en valeur de la phase 2 d'aller de l'avant. Elle a également conclu que la réalisation actuelle de la proposition, telle qu'évaluée, ne saurait protéger l'intégrité écosystémique de la Région du Nunavut ni protéger et promouvoir le bien-être actuel et futur des résidents et des collectivités du Nunavut en particulier et du Canada en général.

La Commission reconnait que son refus de recommander la réalisation de la proposition de mise en valeur de la phase 2 et l'arrêt de la prolongation de la proposition d'augmentation d'accroissement de la production le 31 décembre 2021 provoquent des répercussions sur l'exploitation actuelle du projet minier de la rivière Mary. Par conséquent, la Commission a identifié quelques points à clarifier quant aux modalités et conditions de l'actuel certificat de projet no.005, points préalablement modifiés par le ministre pour refléter la proposition d'augmentation de la production et sa prolongation. Pour régler ces questions, la Commission a sollicité les conseils du ministre et, dans les parties 6 et 8 de ce rapport, a transmis des observations et des recommandations au ministre, aux fins d'examen. Dans les parties 3 et 7 du rapport, la Commission a inclus des recommandations pour le promoteur, les autorités de réglementation ainsi que pour les propriétaires terriens et de minéraux afin de réagir à l'incertitude et aux principaux enjeux relevés par la Commission lors de son évaluation et concernant les effets actuels et prévus du projet et les programmes existants de surveillance, d'atténuation et de gestion adaptative du projet de la rivière Mary.

En terminant, la Commission remercie le promoteur, les gouvernements fédéral, territorial et locaux, Nunavut Tunngavik Incorporated, la Qikiqtani Inuit Association, d'autres intervenants inscrits et les membres des collectivités potentiellement touchées du nord de l'île de Baffin, de d'avoir partagé leurs connaissances, leur sagesse et leurs points de vue tout au long de cette évaluation malgré des circonstances exceptionnellement difficiles. Elle les remercie de leur dévouement, de leur passion et de leur travail acharné; leurs contributions ont grandement instruit la Commission tout au long de cette évaluation. Elles lui ont apporté d'inestimables informations sur lesquelles la Commission s'est fondée pour élaborer les conclusions et les recommandations qui suivent.

Appendix A: The Board's Public Health Protocols and the CPHO's Public Health Orders

The Board's Public Health Protocol's developed by Board staff and approved by the CPHO for safe operation of Public Meetings during the COVID-19 Pandemic

English

August 21, 2020

To: NIRB Distribution List

Sent via email

Re: Public Meeting Workplace Safety Planning for COVID-19 and Exposure Control Plan

---

Dear Parties:

On March 12, 2020 due to public health concerns related to the COVID-19 pandemic and restrictions on gatherings and travel, the Nunavut Impact Review Board (NIRB or Board) cancelled all in-person meetings.

Recent changes to Public Health Orders that allow for the reopening of offices, increasing group size of indoor gatherings and updates to flight schedules in response to increased travel within Nunavut have enabled the Board to reconsider options for resuming in-person meetings. The Board has developed this procedural direction after considerable deliberation and assessment by the Board of:

- the emerging best practices of courts and tribunals across Canada, including tribunals similar to the NIRB;
- available technology and technological limits;
- consideration of the Board's objectives for the conduct of these next steps in the Board's assessment;

In the development of this guidance, the Board emphasizes that the preservation and protection of the health of participants to the process, and Nunavummiut in general, remains a central guiding principle, and the Board has modified our existing processes to reflect the current guidance of public health authorities. The Board also recognizes however, the importance of the Board finding a way to continue to deliver on our mandate and conduct thorough and timely assessments even during this unprecedented and challenging time. To all parties, the Board notes that the COVID-19 pandemic has had global and far-reaching effects on all decision-makers who generally hold in-person proceedings to support their decision-making. The Board notes that although there is a strong desire and comfort in returning to the Board's pre-pandemic practices, the Board has concluded that modifications and new approaches are necessary because an indefinite suspension of the Board's usual in-person proceedings to await a return to normal is unacceptable.

With these considerations in mind, the Board has directed that the following modifications to the previously planned processes to in-person meetings. Specifically, these modifications will enable the NIRB to hold a combination of in-person and teleconference meetings to complete the next steps for it's assessments. While the Board recognizes that these modifications require all parties,

including the Board, to adopt new approaches that may not be their preference, the Board is entitled, and obligated to modify our processes to fulfill our objectives.

In providing this guidance on next steps in a COVID-19 era, the Board preserves the right to further modify the proposed processes - as may be required to reflect changed circumstances such as:

- Updates to applicable guidance from public health authorities and changes to public health measures put in place to prevent the spread of COVID-19;
- Technological innovations and limits; and
- New information from parties.

The NIRB has modified the format of upcoming meetings using a hybrid approach to ensure that in-person community engagement can be preserved, while recognizing that there are significant travel restrictions that may prevent participants who are not resident within Nunavut from being able to travel into the Territory. The Board has concluded that combinations of in-person and video conference meetings, teleconference sessions, and the receipt of written and video submissions by the parties are the best alternatives to the in-person attendance of all participants. The Board has determined that in-person meetings in Nunavut and in-person attendance of parties represented by individuals for which travel into the territory is not currently practical at a single central location or "hub" outside of Nunavut that is linked to the venues in Nunavut can be conducted in compliance with the direction provided by public health authorities in the relevant jurisdictions.

Public Meeting Exposure Control Plan

Sign in procedures

The NIRB will maintain a sign in desk for all participants entering a venue to sign in with their name and phone number. The NIRB staff member administering this desk will either have a protective glass separating them from the participants entering. Where this is not achievable, the NIRB staff member will be required to wear a face mask.

The NIRB staff member will keep an accurate count of participants inside the venue to ensure capacity limits as per Public Health Orders are not exceeded. Entry will be denied once the capacity target is reached.

Participants when signing in will be asked if they have a cough, fever or shortness of breath and have been outside of the territory in the last 14 days. If they do, they will be asked to refrain from the meeting. If the symptomatic person has an inquiry that they want addressed, they provide their concerns in writing to be presented by a proxy.

Social Distancing

Social Distancing of 2 meters will be mandatory for all meeting Participants.

Personal Protective Equipment

Current advice for Nunavut concludes that non-medical facemasks are not mandatory for daily wear, NIRB will follow suit. The NIRB will supply daily masks for individuals who choose to wear them at Public Meetings, but they will not be mandatory until Public Health Orders change. If, during the meeting, social distancing cannot be maintained (i.e.: small meeting spaces, non-

compliant members of the Public on the 2-meter social distancing order, etc.) masks will become a mandatory requirement for entering the Public Meeting space.

Disposable Gloves will also be kept on site for safety measures and staff who may be required to handle sound equipment.

Where the NIRB is required to fly community members to be active in a meeting, each participating community will be provided with masks for air travel for their community representatives.

Hand Washing and Sanitizing

Prior to anyone entering the Public Meeting Space, all attendees must use hand sanitizer. The NIRB will hire a runner/dedicated staffer to dispense hand sanitizing solution to all persons coming into the meeting venue.

Cleaning and Disinfection

NIRB will ensure high touch areas, such as microphones and other shared sound gear, is disinfected prior to the next participant using the equipment. This will also be done for tables and chairs when Intervenors or Community Reps move from the Public Side of the Meeting to the Round Table. At the end of each day Audio/Video technicians will ensure all equipment is ready for the next day's use, including cleaning and disinfection.

Venue staff will be asked to do large cleaning at the end of each meeting day.

Ensuring Proper Protocol Regarding Social Distancing is followed

Each member of the Public who does not adhere to the social distancing requirement will receive one (1) warning, Further infractions will result in an individual being asked to leave the premises. Examples of noncompliance include: not physical distancing when seeing family members and friends from other communities, refusing the use hand sanitizer, trying to force entry when visibly sick.

Warnings will be included in a logbook of incidents for back-up purposes. NIRB Staff will make sure to use plain language and language of preference when communicating the warning and will ensure that the message is understood before logging the incident.

External Contractors

NIRB Audio / Sound technicians and Court Reporters will be hired through an outside firm from outside of the Government of Nunavut's Common Travel Area. The NIRB will be seeking to classify these external contractors as essential service workers given there are no service providers capable of conducting the required work in Nunavut. This means they will be required to isolate in their hotel accommodation outside of work hours, will wear a mask and disposable gloves, and return to their hotel accommodations at the end of each day with no interaction with the Public after the meeting. Although negative COVID-19 tests are not required for essential services through the Government of Nunavut's public heath orders, the NIRB will insist that all external contractors provide evidence of a negative COVID-19 test before entering the territory.

Public Health and Health Centre

The NIRB will advise local health centers or public health units that a public meeting is scheduled in advanced so that they are aware of a large public gathering taking place. The NIRB will invite members of Public Health Office or the local Health Centre to provide opening remarks at the start of meetings in each Nunavut hub location. They will be invited to speak about social distancing and how to interact in a public space with other members of the public to ensure the safety of everyone. The NIRB will provide all COVID-19 action plans and measures for Public Safety to Public Health and local Health Centers.

Security

NIRB has decided against hiring an outside security firm, as this has negative implications in a neutral meeting space. The NIRB will endeavor to hire additional local people to help with venue sign-in, cleaning and disinfecting, and identifying individuals not from the same households who are not respecting the social distance rule. Individuals who do not adhere to the policies and procedures in place will be asked to leave the meeting venue and not come back. This includes community representatives.

Individuals who are visibly sick (in this case, with symptoms associated with Covid-19) will be asked to leave. The NIRB will create COVID-19 specific protocols and procedures for asking an individual to leave and associated documentation for transparency and fairness.

Signage

The NIRB will post current Publications and Signage from the Government of Nunavut and the Government of Canada at all venues. This will include signs on social distancing, handwashing, the Government of Nunavut COVID-19 hotline and other associated signage in English and Inuktitut. All safety measures will be posted in the venues in clearly visible locations.

Communications

All safety measures will be clearly communicated to Meeting Participants in advance through letters, emails and social media. All advice from the Chief Public Health Officer will be strictly followed and this shall be communicated to all meeting attendees.

Vulnerable Populations

The NIRB will outline the risk of attending large public gatherings to vulnerable groups in advanced. The definition of "Vulnerable populations" as outlined by the Government of Nunavut is:

- an older adult (aged 65 an older)
- underlying medical conditions (e.g. heart disease, hypertension, diabetes, chronic respiratory diseases, cancer)
- compromised immune system from a medical condition or treatment (e.g. chemotherapy)

NIRB will not bar community representatives with any of the above conditions from participating. This warning is to inform individuals of the risks of attendance.

Floor Plans

NIRB will implement floor plans including one direction walkways and social distancing seating arrangements.

Catering

Coffee and Tea services will not be offered during public meetings, as this leads to a bottleneck effect of many individuals grouped around a small area, with coffee and tea urns becoming highly touched surfaces. Bagged snacks will be offered to Community Reps with choice of individually packaged water bottles or individually packaged juice.

Policies and Procedures

Under the direction of the Executive Director or the Board, meetings may be paused under the following circumstances:

- an active COVID-19 case has been confirmed in the territory
- the Chief Public Health Officer issues instructions to close all public meetings
- The City or Municipality has issued direction to close all Public Meetings

In the event that the meeting is paused, all attendees will be informed they must return to their hotel room at once and await further announcements via Facebook, the local Community Radio Station or a phone call in the case of community representatives.

A separate policy will be created for NIRB staff on a suspected COVID-19 meeting attendee. This will include putting on a mask and disposable gloves prior to talking to the individual, documenting the incident and advising other floor staff of the incident.

If a Board Member becomes ill and needs to leave a Public Meeting, as long as there is quorum the meeting will not need to be paused.

SUMMARY OF KEY DATES

In closing, the following is a summary of the important upcoming tentative public meeting dates for various assessments and impacted communities:

Date	Community	Meeting purpose
August 20, 2020	Cambridge Bay	Annual monitoring update for Doris North, Hope Bay Phase 2 and Back River
August 24 – 25, 2020	Pond Inlet	Annual monitoring update and Marine Workshop for Mary River
August 24 – 25, 2020	Rankin Inlet	Annual monitoring update for Meliadine

August 27 – 28, 2020	Baker Lake	Annual monitoring update for Meadowbank and Whale Tail
September 28 – October 2, 2020	Pond Inlet With participants via audio/video links with Iqaluit, Ottawa and Winnipeg	Community Round Table and Pre-Hearing Conference for Mary River's Phase 2 Project Proposal
November 23 – 26, 2020	Rankin Inlet	Technical Meeting, Community Round Table and Pre-Hearing Conference for Meliadine's Saline Effluent Discharge Project Proposal

The NIRB thanks all parties for their continued active participation in the NIRB's processes. Should you have questions or require any additional clarification regarding the upcoming COVID-19 measures at the various public meetings, please contact the NIRB's Director, Finance and Administration: Mark Ings at (867) 983-4602 or via email at mings@nirb.ca.

Sincerely,

Karen Costello
Executive Director
Nunavut Impact Review Board

Public Health Order Granted by the Government of Nunavut's CPHO for the January-February 2021 Public Hearing Session

CANADA
NUNAVUT

***PUBLIC HEALTH ACT*, S. Nu. 2016, c. 13**

ORDER RESPECTING NUNAVUT IMPACT REVIEW BOARD PUBLIC HEARINGS

POND INLET AND IQALUIT

WHEREAS:

A. The Minister of Health has declared a Public Health Emergency in Nunavut effective March 20, 2020 to address the novel coronavirus COVID-19 pandemic, and may renew this declaration every fourteen (14) days for the duration of the Public Health Emergency;

B. Pursuant to section 41(1) of the *Public Health Act*, the Chief Public Health Officer may take certain actions, including issuing directions or orders for the purposes of protecting the public health and preventing, remedying or mitigating the effects of the Public Health Emergency; and

C. The Nunavut Impact Review Board has scheduled public hearings respecting the Baffinland Iron Mines Mary River Project Phase 2 to be held in Pond Inlet and Iqaluit between January 24 and February 6, 2021 (the "Public Hearings"); and

D. The Chief Public Health Officer is satisfied that the Nunavut Impact Review Board has taken appropriate measures to protect the public from exposure to novel coronavirus COVID-19;

THEREFORE, the Chief Public Health Officer hereby orders the following:

1. The Public Hearings are exempt from the gathering size restrictions set out in section 7 (b) of the *Order Respecting Social Distancing and Gatherings (#13)* issued January 11, 2021.

2. Attendance at the Public Hearings shall be restricted to no greater than one hundred (100) persons at each meeting site, including participants and staff.

3. All persons participating in the Public Hearings shall wear non-medical masks or face coverings as defined in section 15 of the *Order Respecting Social Distancing and Gatherings (#13)*.
4. The Nunavut Impact Review Board shall implement its COVID-19 Response Plan dated August 21, 2020, which is attached as Appendix "A" and forms part of this Order.
5. All other provisions of the *Order Respecting Social Distancing and Gatherings (#13)* shall continue to apply to the Public Hearings.

This order is effective at 12:01 am ET (UTC-5:00) on January 24, 2021 and expires at 11:59 pm ET (UTC-5:00) on February 6, 2021.

Dr. Michael Patterson

Chief Public Health Officer

APPENDIX B - FINAL TABLE OF COMPLETED COMMITMENTS

APPENDIX B: FINAL TABLE OF COMPLETED COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
226	NEW	QIA	Marine Environment	5 - Public Hearing 2021	Baffinland commits to providing Passive Acoustic Monitoring Results from fall 2019 and early-summer 2020, at the latest, 30 days from the release of the NIRBs Recommendation Report to the Minister.	Complete	Provided in 2020 PAM Report
212	NEW	MHTO QIA	Atmospheric Environment	5 - Public Hearing 2021	~~Baffinland continues to implement dust mitigation solutions at the Milne Port ore stockpiles and has retained a third-party consultant to further review the effectiveness of the DusTreat application. Through this investigation and consultation with the QIA and MHTO alternatives to the current mitigation measures will be evaluated as contingency. As this work is ongoing for the current operation Baffinland proposes to host a workshop with interested parties in Q2 2021.~~	NA	Replaced by commitments 230 and 232
211	QIA-01 QIA-02	QIA	Terrestrial Environment	5 - Public Hearing 2021	~~Baffinland commits to working with the TEWG and the Inuit Committee to update the Caribou Protection Measures for the Mary River Project within 6 months post-PC. Baffinland commits to funding a caribou-focused IQ study with the HTOs and QIA with 6 months post-PC. The IQ study will be scoped to ensure that it builds upon existing well-documented IQ, and includes verification of this information with Inuit knowledge holders. The results of this study will be used by QIA, the HTOs, the Inuit Committee and Baffinland to further update the Caribou Protection Measures, develop a Caribou Protection Map and project protection zones, and inform monitoring, mitigations and thresholds established through the Inuit Committee and the TEWG.~~	NA	Replaced by commitment 223
185	DFO-3.6.4 DFO-3.6.6	DFO	Marine Environment	3 - September 2020 - Technical Meetings	Baffinland and DFO will provide an update on DFO Comment 3.6.4 and 3.6.6 following bilateral discussions	Complete	See DFO 3.6 series of commitments
183	HPI	HPI	Corporate Environment	3 - September 2020 - Technical Meetings	Baffinland will provide a list of participants to each Hamlet and HTO from the North Baffin impacted communities who were present in the North Baffin community meetings reported in the February 2020 community update submission to the NIRB.	Complete	Provided in community engagement update
182	MHTO	MHTO	Marine Environment	3 - September 2020 - Technical Meetings	Baffinland will look into the feasibility of installing acoustic monitoring equipment at the floe edge.	Complete	Recorder Installed in Fall 2021, will record through Fall 2021 and Spring 2022 shoulder seasons
181	GN-TRC24	GN	Marine Environment	3 - September 2020 - Technical Meetings	~~Baffinland will support a revised Term and Condition 103 that reflects and incorporates the commitment made in relation to GN-TRC24. This commitment will be reflected in an updated commitment list.~~ ~~"Baffinland will provide maps with its Annual Reports that illustrate tracks taken by each Project-related ship within the RSA and Baffin Bay, relative to recorded ice coverage. (3) Every 3 years Baffinland will conduct an analysis of ship tracks through Baffin Bay in relation to sea-ice to assess the extent of Project shipping's interaction with sea-ice in Baffin Bay. Results to be reported in the Annual Report." (June commitment from Baffinland) (GN comment TRC 24)~~	Replaced	Replaced by updated commitment, line 210
180	QIA-08	QIA	Socio-economic Environment	3 - September 2020 - Technical Meetings	Baffinland and the QIA will work to provide more details on the CRLU Risk Community strategy (QIA 08), including a review of the commitment wording to ensure that it is clear that Baffinland will be working with Inuit on the development of this strategy.	Complete	Term and Condition Proposed in revised draft PC005
179	GN-TRC24	GN	Marine Environment	3 - September 2020 - Technical Meetings	Baffinland is committed to preparing a memo which includes a fuel spill risk assessment on polar bears, consistent with the risk assessment framework applied in Section 10 of the Phase 2 Addendum.	Complete	Submitted Oct 16, 2020
175	MHTO	MHTO	Corporate Environment	3 - September 2020 - Technical Meetings	For the duration of the Phase 2 Review Baffinland will prepare and provide public records of all engagement and consultation meetings with MHTO, which include the number of people in attendance, a record of questions comments and concerns raised, as well as copy of any materials provided by Baffinland or other parties as applicable.	Complete	Ongoing for the Community Engagement Updates Provided prior to each review milestone
174	MHTO	MHTO	Marine Environment	3 - September 2020 - Technical Meetings	Baffinland commits to reviewing proposed ecological triggers from the MHTO for the fall season if they can provide dates and supporting and verified IQ.	Complete	Ecological triggers and rationale by MHTO not supplied.
173	GNDFO	GN	Corporate Environment	3 - September 2020 - Technical Meetings	Baffinland will provide a technical memo providing additional details on Operational Flexibility.	Complete	Submitted Sept 30, 2020
172	MHTO	MHTO	Freshwater Environment	3 - September 2020 - Technical Meetings	Baffinland commits to work with the MHTO to achieve the objective of PC Term and Condition 48(a)	Complete	Initiative under existing Project; MHTO supported 2021 Program
171	MHTO	MHTO	Terrestrial Environment	3 - September 2020 - Technical Meetings	Baffinland will meet with the MHTO to discuss their specific objectives with respect to local caribou monitoring programs	Complete	Meeting minutes submitted as part of community engagement updates
169	MHTO-4a	MHTO	Marine Environment	3 - September 2020 - Technical Meetings	Baffinland commits to working with MHTO to better understand any issues relating to sea ice use between October 15 and October 31.	Complete	Meeting minutes submitted as part of community engagement updates

APPENDIX B: FINAL TABLE OF COMPLETED COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
166	HPI	HPI	Corporate Environment	3 - September 2020 - Technical Meetings	Baffinland commits to provide the January EA Workshop to each Hamlet and HTO from the North Baffin communities who participated in, with the caveat that this summary report will be unverified by participants.	Complete	Submitted Oct 16, 2020
165	QIA-01 QIA-02	QIA	Terrestrial Environment	3 - September 2020 - Technical Meetings	Baffinland commits to compile all commitments related to caribou in a single document for review by relevant parties	Complete	This has been achieved through reorganization of this commitment list
164	QIA-01 DFO-3.4 NEW PCA-02 WWF-FWS-03	QIA	Terrestrial Environment Marine Environment	3 - September 2020 - Technical Meetings	Baffinland will provide an updated draft revised terms of references for the marine and terrestrial working groups, including notes provided by other parties, by October 16.	Complete	Submitted on or before October 16, 2020
158	QIA-02 GN-03	QIA	Terrestrial Environment	3 - September 2020 - Technical Meetings	Baffinland will provide the full cut and fill profile of the north rail in relation to the potential caribou movement corridors to the QIA and GN. The figures will be colour-coded to show cut and fill profiles categorized into <1 m, 1-2 m, and >2 m profiles.	Complete	Submitted on or before October 16, 2020
149	QIA-40	QIA	Atmospheric Environment	3 - September 2020 - Technical Meetings	~~Baffinland will provide an update on the development of the Climate Change Strategy 15 days prior to a Public Hearing. A full draft is expected by December 31, 2020 and a final copy by June 30, 2021. Baffinland will endeavor to meet the requested timeline, but this should not be viewed as a barrier to moving forward with a Public Hearing as this is an ongoing operational commitment.~~	NA	Replaced by Commitment Line 221
148	QIA-41	QIA	Freshwater Environment	3 - September 2020 - Technical Meetings	~~Baffinland is prepared to adopt a more precautionary moderate risk threshold for lake sedimentation. The current moderate risk threshold for lake sedimentation is 1 mm, adopted from the FEIS. Baffinland will adopt the lake sedimentation rate predicted in the FEIS of 0.54mm, which is about half the current threshold. A low risk threshold of 0.15 mm will also be applied that will trigger corresponding low risk response actions.~~	Replaced	Replaced by Commitment Line 200
147	QIA-42	QIA	Freshwater Environment	3 - September 2020 - Technical Meetings	~~The commitment made under QIA 42 will be amended to reflect the following: Metrics on fish health (fish presence, catch per unit effort, fish length and fork length) are collected from 60 crossing sites along the Tote Road and reported annually to DFO, as well as in the Annual Report for Operations to the QIA and NWB, as well as the Annual Report for the NIRB. Baffinland already monitors water quality and sediment quality as part of the Tote Road Monitoring Program, and we commit to add observations regarding physical condition of fish (e.g., lesions, injuries). Baffinland and QIA will determine an appropriate approach to analysis for the 2021 reporting period.~~	Replaced	Replaced by Commitment Line 201
146	QIA-42	QIA	Freshwater Environment	3 - September 2020 - Technical Meetings	~~Baffinland commits to coordinating freshwater focused workshops to address specific freshwater issues. Baffinland does not support the implementation of a regular occurring freshwater working group.~~	Replaced	Replaced by Commitment Line 202
141	QIA-51	QIA	Marine Environment	3 - September 2020 - Technical Meetings	Baffinland commits to provide a supplementary submission that documents actual vessel noise signatures as recorded during PAM, a comparison with the modelled noise outputs used in the assessment, and a discussion on how any differences, if they exist, affect the impact assessment or inform opportunities for mitigation and adaptive management. Baffinland notes that QIA has requested the details to be shared prior to a Public Hearing. Baffinland will endeavor to meet the requested timeline, but this should not be viewed as a barrier to moving forward with a Public Hearing.	Complete	Submitted with 2020 PAM Report
140	WWF	WWF	Marine Environment	3 - September 2020 - Technical Meetings	WWF has proposed Baffinland restrict the dumping from ore carriers of treated and untreated sewage and greywater in the RSA and restricting the use of open loop scrubbers. Baffinland is evaluating the feasibility of this proposal for Phase 2 and will provide an update prior to a Public Hearing.	Complete	See Commitment Line 235
120	DFO 3.4.1 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	~~DFO and BIM are still working to update commitment wording from 3.4.1. DFO does not currently agree with the wording provided for 3.4.1. DFO continues to request that a specific monitoring plan for icebreaking/shoulder season be developed and will continue to work with BIM to find agreed upon wording for DFO 3.4.1 NEW. Baffinland has provided a draft Marine Monitoring Plan (MMP) as part of the Phase 2 review process. Should Phase 2 be approved, Baffinland will update this Plan to reflect all relevant commitments and terms and conditions.~~	Replaced	Replaced by new commitments to DFO 3.4 series
119	DFO 3.4.1 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	~~Rather than develop a separate, stand-alone monitoring plan specific to icebreaking as suggested by DFO, Baffinland will include a specific section relevant to icebreaking and shoulder season shipping activities in the MMP. Survey methodology and indicators (including rationale) will be determined in consultation with the MEWG, of which DFO is a member. Recommendations from MEWG members will be treated consistent with the consensus based decision requirements of the final updated MEWG Terms of Reference.~~	Replaced	Replaced by new commitments to DFO 3.4 series
118	DFO 3.4.1 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	~~An updated draft MMP will be provided to the MEWG for comment and the NIRB within 180 days of issuance of an amended Project Certificate, should Phase 2 be approved. Baffinland commits to continue working with DFO and the MEWG to finalize the Plan.~~	Replaced	Replaced by new commitments to DFO 3.4 series

APPENDIX B: FINAL TABLE OF COMPLETED COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
117	DFO 3.4.3 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	~~Baffinland commits to produce a response plan for the potential event of an ice entrapment, should this be observed during the annual end of season clearance surveys. This plan will include action level triggers and associated response actions. This plan will be developed in consultation with the MHTO and DFO, understanding that these two groups are ultimately responsible for determining the appropriate course of action should an entrapment event occur.~~	Replaced	Replaced by new commitments to DFO 3.4 series
116	DFO 3.5 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	~~Baffinland will prepare and submit to DFO a literature review of ship-based marine mammal remote monitoring systems. This literature review will include a summary of commercially available remote wildlife monitoring systems that could be installed on vessels to supplement existing marine mammal monitoring programs and enhance detection of ship strikes on marine mammals. The remote monitoring systems identified in this literature review will inform adaptive management, should the need be triggered. For clarity, in the event of a ship strike on a marine mammal, a single event, although unlikely based on present mitigations (i.e. speed restrictions), would trigger an adaptive management response.~~	Complete	Replaced by new commitment to DFO 3.5
112	DFO 3.6.2 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	~~Baffinland commits to record the Milne Port anchorage and associated coordinates where compliance testing and discharge occurs in the ballast water testing forms, completed by Baffinland's environmental monitors. A dataset with discharge coordinates will be provided to MEWG members as part of annual reporting requirements.~~	Replaced	Replaced by new commitment wording incorporating input from QIA
111	DFO 3.6.3 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	~~Baffinland will require all vessels calling on Milne Port that treat their ballast under the D2 Standard to also perform a ballast water exchange prior to treatment. For ships unable to conduct exchange as specified in Canadian Ballast Water Regulations (e.g. ships on Canadian domestic trips), exchange is to be conducted as specified in revised ABWEZs for Eastern Arctic as per DFO CSAS advice (see DFO 2015, Stewart et al. 2015 and Goldsmit et al. 2019). This updated commitment will be reflected in the 2020 Standing Instructions to Masters.~~	Replaced	Replaced by new commitment wording incorporating input from QIA
110	DFO 3.6.4 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	~~Baffinland will consider discontinuing exchange plus treatment requirements should treatment systems efficacy reach a point that makes the benefits of an exchange plus treatment system negligible. This decision will be made in consultation with TC and DFO, and will be based on a consideration of factors outlined in DFO 2019 (i.e. if ballast water organism concentration or composition, environmental conditions, shipping patterns, proportion of voyages meeting the D-2 standard, or available data describing these conditions change in the future, and updates to global research on ballast systems). In this event Baffinland will update ballast water dispersion modellingto more accurately reflect the spectrum of salinity, temperature, and discharge volumes that can be expected to be discharged at Milne Port under Phase 2 operations if prior exchange were to be discontinued.~~	Replaced	Replaced by new commitment wording incorporating input from QIA
108	DFO 3.6.6 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	~~Baffinland remains committed to conducting ship hull biofouling monitoring surveys using an ROV on ore carriers, with focused efforts on areas of the hull and niche areas where biofouling has the greatest potential to occur (e.g. chain lockers, stern tube, rope guard, bottom, rubber side, etc.). The projected number of ore carriers that will be sampled annually will be determined in consultation with the MEWG, of which DFO is a member. Recommendations from MEWG members will be treated consistent with the consensus-based decision requirements of the final updated MEWG Terms of Reference.~~	NA	Replaced by new series of commitments to DFO
107	DFO 3.6.7 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	~~Baffinland commits to updating the marine monitoring plan (MMP) in consultation with MEWG members and this will be completed prior to the start of the Phase 2 increased shipping season. The updated MMP will detail the revised MEEMP sampling design which includes greater seasonal and spatial coverage and increased sampling effort and sample sizes to address DFO concerns related to achieving sufficient statistical power for detection of project effects (≥0.8) (as per recommendations in DFO 2020, pages 4-7).Background~~The Aquatic Invasive Species (AIS) Monitoring Program is a biological screening program (species ID, presence/absence data); as such, it does not involve any statistical analysis. The updated MMP will include clear protocols for determining identity and status of species collected as part of this program (as per recommendations in DFO 2019 and DFO 2020 and comments on disposition table provided in June (DFO 3.8.1) and November (DFO 3.10.4). The sampling effort for the AIS Monitoring~~Program is currently very rigorous.~~	NA	Replaced by new commitment wording incorporating input from QIA
106	DFO 3.6.8 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	~~Baffinland continues to maintain that the identification of high-risk biological species or groupings of species of concern is the primary responsibility of DFO. Despite this, Baffinland is committed to supporting the development of a trigger list of species and associated response plans through the process outlined in response to DFO 3.6.9 and 3.6.10, and to refining that list with DFO following Phase 2 approval.~~	NA	Replaced by new commitment wording incorporating input from QIA
101	ECCC-1 NEW ECCC-FC4	ECCC	Atmospheric Environment	02 - February 2020 - Response to Updated Technical Comments	Baffinland commits to investigate and implement black carbon reduction measures, where feasible, and provide a preliminary mitigation measure feasibility assessment 30 days prior to a Public Hearing, and a follow up report in the 2020 Annual Report (which wouldn't be until 2021). The feasibility assessment will consider the use of distillate fuels as a reduction measure for local black carbon emissions.	Complete	Submitted on or before October 16, 2020

APPENDIX B: FINAL TABLE OF COMPLETED COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
98	~~DFO 3.10.2 TC 02~~	DFO 3.10.2 TC	~~Marine Environment~~	01 - November 2019 - Public Hearing	~~Baffinland will revise the Ballast Water Management Plan to include a requirement for all vessels to conduct ballast water exchanges (with or without D2 treatment systems) prior to calling on Milne Port, until such a time that ballast water treatment systems are compliant with the D2 standards set by the IMO.~~ ~~Should Baffinland wish to discontinue the practice of exchange plus treatment, Baffinland will provide updated ballast water modelling that reflects the range of salinity that may be present in the ballast water tanks where no exchange occurs.~~	Replaced	Replaced by DFO 3.6 NEW Commitments
97	~~DFO 3.10.5~~	DFO	~~Marine Environment~~	01 - November 2019 - Public Hearing	~~Baffinland will update the AIS monitoring program to describe the process it follows for identifying high-risk biological species discovered through its sampling programs.~~	Replaced	Replaced by DFO 3.6 NEW Commitments
96	~~DFO 3.10.6~~	DFO	~~Marine Environment~~	01 - November 2019 - Public Hearing	~~Baffinland will work with DFO to develop a management and response approach in the event a non-indigenous species is identified during monitoring. This response approach will be added an attachment to the AIS monitoring program.~~	Replaced	Replaced by DFO 3.6 NEW Commitments
90	DFO 3.5.4	DFO	Marine Environment	01 - November 2019 - Public Hearing	Baffinland is not proposing to ship during sensitive lifecycle periods for seal, which typically occur in the months between March and May. No additional mitigation measure is necessary for the current Shoulder Season Shipping Guide.	Complete	Baffinland has not changed the scope of proposed shipping to overlap sensitive lifecycle periods and the review is now complete
85	DFO 3.7.4	DFO	Marine Environment	01 - November 2019 - Public Hearing	An analyses will be conducted using data collected during the 2019 shipping season to characterize the degree of conservatism in the sound propagation modelling that has been conducted. Additional AMARs have been deployed and will collect data during the Fall 2019 and Spring 2020 seasons to further this analysis. See response to DFO 3.8.4 for commitment to long term acoustic monitoring.	Complete	Submitted with 2020 PAM program report
83	DFO 3.9.1	DFO	Marine Environment	01 - November 2019 - Public Hearing	~~Baffinland will implement an incidental marine mammal monitoring program with vessel operators calling on Milne Port, which will request incidental observations of marine mammals to be recorded and relayed to Baffinland. In support of this program, Baffinland will develop educational materials for vessel crew to assist in marine mammal identification and data recording. Baffinland will provide a draft of the materials and program for review by the MEWG before they are finalized.~~	Replaced	Replaced by Commitment in Line 115
82	~~DFO-3.10.3, DFO-3.10.4, TC-02, QIA-45, DFO-3.10.4, QIA-44~~	DFO	~~Marine Environment~~	01 - November 2019 - Public Hearing	~~Baffinland will implement a pilot ballast water biological monitoring program for ships calling on Milne Port. This program will be designed to reflect a more appropriately scoped form of a ballast water sampling protocol provided by DFO to Baffinland in 2017. This program will include sampling from one ballast tank on a total of five vessels per shipping season.~~ ~~Baffinland remains committed to continue conducting temperature and salinity test sampling of one randomly selected ballast water tank for all vessels calling to Milne Port, and biological sampling in the marine receiving environment to monitor for non-native species in Milne Port and at Ragged Island.~~	Replaced	Replaced by DFO 3.6 NEW Commitments
72	~~ECCC-FC4~~	ECCC	~~Marine Environment~~	01 - November 2019 - Public Hearing	~~Baffinland commits to investigate and implement black carbon reduction measures, where feasible, and report on this in the 2020 annual air quality report (to be submitted by March 31, 2021). The investigation will consider the use of distillate fuels as a reduction measure for local black carbon emissions.~~	Replaced	Replaced by ECCC-01 NEW Commitment
71	ECCC-FC-5	ECCC	Marine Environment	01 - November 2019 - Public Hearing	Baffinland remains committed to updating the Phase 1 Waste Rock Management Plan and evaluating the appropriateness of the 0.2% cutoff for PAG classification, irrespective of the Phase 2 approvals process.	Complete	Updated Phase 2 WRMP submitted in 2021
54	HPI	HPI	Socio-economic Environment	01 - November 2019 - Public Hearing	To further Baffinland's goal of meaningful consultation and engagement it has committed to the development of community-specific engagement guidelines. The development of these guidelines will serve to improve the two-way dialogue between the Company and Inuit.	Repeat	Same commitment as line 47
52	HPI	HPI	Socio-economic Environment	01 - November 2019 - Public Hearing	~~Pending approval of the Phase 2 Proposal, Baffinland has committed to provide $1.2 million/year to each of the five North Baffin communities for the life of the mine ($6 million/year total). These amounts are intended to support socio-economic opportunities, cultural opportunities, and hunter support opportunities.~~	NA	Replaced by ICA Commitments
49	HPI-11	HPI	Socio-economic Environment	01 - November 2019 - Public Hearing	~~Baffinland commits to working with the Hamlet of Mittimatalik:~~ ~~- to establish community- specific engagement guidelines, and~~ ~~- to ensure the active participation and representation of Mittimatalik on the Inuit Advisory Panel.~~	NA	Replaced by ICA Commitments
44	MHTO-5c	MHTO	Marine Environment	01 - November 2019 - Public Hearing	Baffinland is not proposing any additional shipping routes under the Phase 2 Proposal. This includes the use of Navy Board Inlet and the Northwest Passage.	Complete	No additional routes proposed
35	~~QIA-01 QIA-03, QIA-05, QIA-08, QIA-10, QIA-11~~	QIA	~~Socio-economic Environment~~	01 - November 2019 - Public Hearing	~~Baffinland and QIA will jointly develop a culturally appropriate component of the Culture, Resources and Land-Use ("CRLU") monitoring program that addresses harvest surveys. Adaptive management measures will be informed by the results of the surveys and the CRLU monitoring program. This development will be completed within 12 months of the issuance of the amendment to the Project Certificate implementing Baffinland's Phase 2 proposal to align with the development and implementation of the CRLU monitoring program.~~	~~NA~~	Replaced by ICA Commitments

APPENDIX B: FINAL TABLE OF COMPLETED COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
34	QIA-01 QIA-02	QIA	Terrestrial Environment	01 - November 2019 - Public Hearing	~~Baffinland will continue to comply with the existing QIA caribou protection measures and will work with relevant IPG's as well as the TEWG and Inuit Advisors to develop a Caribou Protection Map and project protection zones, if and where appropriate to enhance caribou protection. Development of any Caribou Protection Map or project protection zones will take into account all relevant available IQ and scientific information, including results of an IQ study of caribou use with HTOs and QIA to be carried out through the CRLU Monitoring Program;~~	NA	Replaced by updated commitment, line 211
31	~~QIA-03~~	QIA	~~Socio-economic Environment~~	01 - November 2019 - Public Hearing	~~- Baffinland will carry out engagement with the 5 North Baffin communities during 2020 in order to identify, together with Inuit and in consultation with QIA, the specific metrics that Inuit identify should be monitored as part of the CRLU program, and to identify, together with Inuit and in consultation with QIA, thresholds for change that should trigger adaptive management by the company. - Baffinland would report on changes and trends in monitoring, based on previous reports. Baffinland will consider adaptive management actions and consult with the community on the best path forward in relation to any changes to CRLU identified through the CRLU monitoring program. For clarity, Baffinland would not only consider adaptive management in the event that effects exceed the FEIS addendum estimations but instead would have regard to triggers for action identified through consultation with the community.~~	~~NA~~	Replaced by ICA Commitments
29	~~QIA-07~~	QIA	~~Socio-economic Environment~~	01 - November 2019 - Public Hearing	~~Baffinland commits to integrating IQ into the objectives of its terrestrial and marine environmental management plans. Reporting will focus on the topics as outlined in the QIA's original technical comment: 1. Show respect to animals; 2. Leave animals alone unless hunting them; 3. Animals are to be used, not wasted; 4. Each animal has its own habitat; and 5. Protect animal habitat.~~	~~NA~~	Replaced by ICA Commitments
28	QIA-08	QIA	Socio-economic Environment	01 - November 2019 - Public Hearing	~~Baffinland commits to develop a risk communication strategy focused on gathering and dissemination of information to Inuit related to the Baffinland Iron Ore Mines Project, and linkages between the Project and human health and ecological risk assessment topics. The strategy will focus on building capacity within community groups to understand the mining process, elements of the mining process and how substances produced from the mining process move in the environment.~~	NA	BIM and QIA to determine integration with Inuit Stewardship Plan
27	~~QIA-21~~	QIA	~~Freshwater Environment~~	01 - November 2019 - Public Hearing	~~Implementation of the Water Compensation Agreement, particularly with respect to the integration of IQ, will require a collaborative effort between Baffinland and the QIA to which Baffinland remains fully committed. As a Water Compensation Agreement is required under Section 63 of the Nunavut Waters and Surface Rights Tribunal Act and Article 20 (Part 3) of the Nunavut Land Claims Agreement, Baffinland maintains that a process to establish compensation in respect of Inuit Water Rights exists and will be adhered to outside of the Project Certificate amendment process.~~	~~NA~~	Replaced by ICA Commitments
21	~~QIA-38~~	QIA	~~Socio-economic Environment~~	01 - November 2019 - Public Hearing	~~Baffinland commits to the development of socio-economic monitoring thresholds and actions, in consultation with the Mary River Socio-Economic Monitoring Working Group (SEMWG). Once finalized, these will be reflected in an updated Socio-Economic Monitoring Plan.~~	~~NA~~	Replaced by ICA Commitments
17	~~QIA-45~~	QIA	~~Marine Environment~~	01 - November 2019 - Public Hearing	~~Baffinland has committed to implementing a pilot ballast water biological monitoring program for ships currently only subject to the D1 standard (open water exchange). This program has been designed to reflect a more appropriately scoped form of a ballast water sampling protocol provided by DFO to Baffinland in 2017 and will include sampling from one ballast tank on a total of five vessels per shipping season. Baffinland remains committed to continue conducting temperature and salinity test sampling of one randomly selected ballast water tank for all vessels calling to Milne Port, andbiological sampling in the marine receiving environment to monitor for non-native species in Milne Port and at Ragged Island.~~	~~NA~~	Replaced by DFO 3.6 NEW Commitments
10	TC-02 DFO 3.6.5	TC	Marine Environment	01 - November 2019 - Public Hearing	~~Transport Canada appreciates the efforts by BIM to ensure current regulations are followed with respect to their plans for ballast water management. Given the learning curve associated with use of ballast water treatment systems, for Phase 2, Transport Canada (TC) in consultation with Fisheries and Oceans Canada (DFO), recommends, in conjunction with present sampling and testing protocols being proposed/adopted [NTD - will be summarized in complete package] by BIM, that BIM implement a ballast water compliance sampling plan based on a risk based targeting methodology to be developed in consultation with DFO and TC.Such a risk based methodology should be applied to evaluate the risk of all vessel ballast water management (D1, D2) with subsequent salinity and D-2 biological compliance sampling conducted on vessels identified as high or very high risk. The respective risk-based methodology and associated ballast water compliance sampling plan will be developed in consultation with DFO and TC following completion of DFO's Project-specific sampling conducted on a subset of vessels calling to Milne Port. The risk based methodology and associated ballast water compliance sampling plan should include a consideration of other compliance initiatives or research being undertaken elsewhere by TC relative to implementation of the D-2 standard.Sampling conducted that supports building a body of knowledge for D-2 treatment systems, beyond biological compliance sampling conducted on high risk and very high risk tanks, should not compromise Baffinland's ability to transport annual ore quantities as approved under a modified Project Certificate No 005. Understanding that the rationale for this program is tied to a learning curve associated with the use of ballast water treatment systems, the compliance sampling program and risk based methodology will be adapted as deemed necessary based on the results of the program~~	Replaced	Replaced by Commitment in Line 109

APPENDIX C - FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
258	NEW	Hamlet of Pond Inlet	Socio-Economic Environment	10 – Post Public Hearing	Baffinland will work with the QIA to ensure the Hamlet of Pond Inlet is prioritized under Article 23.4 when surplus equipment and machinery becomes available.	NA	This commitment will be implemented post PC approval
257	NEW	Hamlet of Pond Inlet	Socio-Economic Environment	10 – Post Public Hearing	To further support hunters Baffinland will provide funding for the purchase of a dedicated hunting vessel in Pond Inlet, not to exceed $500k.	NA	This commitment will be implemented post PC approval
256	NEW	Hamlet of Pond Inlet	Socio-Economic Environment	10 – Post Public Hearing	To manage dust created from conventional road building, Baffinland will continue to support Cypher Environmental in their contributions to the Hamlet of Pond Inlet of their trademark product DustBlokr to reduce dust coming from community roads.	NA	This commitment will be implemented post PC approval
255	NEW	Hamlet of Pond Inlet	Socio-Economic Environment	10 – Post Public Hearing	Baffinland will work with the Hamlet of Pond Inlet to prepare applications for the GN's community roads program. If applications are denied, or insufficient to cover the full costs of planning, design, and construction, Baffinland will pay the difference. This will be a 5-year agreement to improve road infrastructure in Pond Inlet.	NA	This commitment will be implemented post PC approval
254	NEW	Hamlet of Pond Inlet	Socio-Economic Environment	10 – Post Public Hearing	Baffinland will also support the Hamlet of Pond Inlet with a direct contribution toward an upgrade or construction of a Health Center in Pond Inlet. Baffinland commits to a $5M donation toward this cause should approvals through Federal and Territorial Governments grant approve such a project.	NA	This commitment will be implemented post PC approval
253	NEW	Hamlet of Pond Inlet	Socio-Economic Environment	10 – Post Public Hearing	Baffinland proposes to commit the funds necessary to build the Fire Hall proposed in the Hamlet of Pond Inlet's Integrated Community Sustainability Plan (ICSP) for the 2021/2022 year.	NA	This commitment will be implemented post PC approval
252	NEW	Hamlet of Pond Inlet	Socio-Economic Environment	10 – Post Public Hearing	Baffinland will make additional payments to the Tasiuqtiit Working Group, or another group as created or directed by the Hamlet of Pond Inlet, for each loaded ore car delivered to Milne Port, valued at up to $2 million per year ($16.67/car)	NA	This commitment will be implemented post PC approval
251	NEW	QIA	Freshwater Environment	9 - Public Hearing (November 2021)	Include Tuggat, Qurluktuk and Ikaluit river systems in its Arctic Char Health Monitoring Program, carried out pursuant to PC005 Term and Condition 48(a). Baffinland may alter or add to this list of water bodies in the future based on consultation with Pond Inlet.	NA	This commitment will be implemented post PC approval
250	NEW	DFO	Marine Environment	9 - Public Hearing (November 2021)	Work with DFO to ensure future aerial surveys are carried out based on the most advanced methodologies, and that where practicable, these improvements yield results that can be compared against previous years data.	NA	This commitment will be implemented post PC approval
249	NEW	MHTO	Marine Environment	8 - Public Hearing (April 2021)	Baffinland will include body condition, or an equivalent indicator, in its marine monitoring program. For clarity, this is not a commitment to use body condition as an Early Warning Indicator or other adaptive management threshold.	NA	This commitment will be implemented post PC approval
248	NEW	Hamlet of Clyde River	Marine Environment	8 - Public Hearing (April 2021)	Commit to more regular updates of working groups meeting minutes, presentations, etc.	NA	This commitment will be implemented post PC approval
247	NEW	Hamlet of Pond Inlet	Socio-economic Environment	7 - Community Engagements	Baffinland will start an Arctic Char monitoring program in Navy Board should Phase 2 be approved	NA	This commitment will be implemented post PC approval
246	NEW	Hamlet of Pond Inlet	Socio-economic Environment	7 - Community Engagements	Baffinland will provide an additional $10,000 per ore carrier required to transport up to 4.2 MT to the Tasiuqtiit Working Group annually. This payment per ship will be indexed against the consumer price all items index for Iqaluit (not seasonally adjusted). Under Phase 2, this total could reach as high as $1,680,000 per year. These funds may be used by the Working Group to harvest and supply country food to residents of the community as agreed by the MHTO and Hamlet.	NA	This commitment will be implemented post PC approval
245	NEW	5 North Baffin Communities	Socio-economic Environment	7 - Community Engagements	Baffinland will commit to the creation of 27 new positions in each impacted community (Arctic Bay, Clyde River, Igloolik, Pond Inlet, and Sanirajak). There will be 20 positions within a community-based training program as well as 7 community-based positions, including a Baffinland Community Liaison Officer (BCLO), Inuit Qaujimajatuqangit Advisor, Community Resource Coordinator, Inuit Success Team Advisor, Community Counselor, Trainer and Office Manager. Pond Inlet will have two additional positions, including a second BCLO and a Community Monitoring Coordinator.	NA	This commitment will be implemented post PC approval
244	NEW	5 North Baffin Communities	Socio-economic Environment	7 - Community Engagements	A community garage pilot project will be established to provide opportunities for apprentice mechanics and high school co-op students to further develop their skills while filling a critical services gap that exist in the community for vehicle maintenance. The pilot project will be constructed in Sanijarak, with garages or equivalent projects constructed in Arctic Bay, Clyde River, Igloolik and Pond Inlet following the completion of the pilot project.	NA	This commitment will be implemented post PC approval
243	NEW	5 North Baffin Communities	Socio-economic Environment	7 - Community Engagements	Baffinland will construct and operate a Baffinland office centre in each community. Each office centre will have Baffinland office space, a training room, engagement walls to share Project updates and information, a medical examination room, country food kitchen and an Elders room. Office centres will be constructed in Arctic Bay, Clyde River, Igloolik, Pond Inlet, and Sanirajak.	NA	This commitment will be implemented post PC approval
242	NEW	5 North Baffin Communities	Marine Environment	7 - Community Engagements	Baffinland will not transition from approximately 84 to 168 vessels in a single season, instead, Baffinland commits to a gradual ramp-up to full shipping capacity, adding approximately 21 ore carriers per year starting in year 1 after Phase 2 Approval; additional ore carrier transits during the construction period will be simulated (i.e. will be loaded with ore, but will not be used to ship more ore than can be hauled via the Tote Road (6Mt))	NA	This commitment will be implemented post PC approval
241	NEW	5 North Baffin Communities	Marine Environment	7 - Community Engagements	Baffinland will reduce the maximum number of ore carriers from 176 to 168 that can come to Milne Port in a single year	NA	This commitment will be implemented post PC approval
240	NEW	5 North Baffin Communities	Marine Environment	7 - Community Engagements	Baffinland will develop of a protocol to be followed when sea-ice is being used in Pond Inlet in the spring even when all of the Baffinland conditions for start of the shipping season have been met	NA	This commitment will be implemented post PC approval
239	NEW	5 North Baffin Communities	Marine Environment	7 - Community Engagements	Baffinland has committed to reduce the proposed shipping season to be more in-line with the current project: 1. Baffinland will not start shipping before July 15 2. Baffinland will plan to close the shipping season at October 31 (only limited ice conditions and consultation with Pond Inlet may extend this to November 15) (previously committed under row #214)	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
238	NEW	5 North Baffin Communities	Terrestrial Environment	7 - Community Engagements	To facilitate caribou monitoring and other Inuit driven research along the North Railway, three observation stations, that will double as emergency shelters, will be constructed at locations to be determined with relevant parties. (24 new positions to be held by Inuit will be created to staff the observation stations)	NA	This commitment will be implemented post PC approval
237	NEW	QIA	Terrestrial Environment	6 - Response to Additional Questions	Baffinland is committed to installing outward facing video cameras mounted on the ore haul trains to record the presence of caribou and to record a caribou mortality incident. Video footage of a caribou mortality and photographs from the incident scene will be assessed as part of Baffinland's incident investigation process. Baffinland will report the incident to the QIA, the Hunters and Trappers Organization, and the Department of Environment for the Government of Nunavut following the currently established steps detailed in Baffinland's Reporting Procedure for Wildlife Incidents.	NA	This commitment will be implemented post PC approval
236	NEW	QIA	Terrestrial Environment	6 - Response to Additional Questions	Baffinland is committed to modifying the railway over time to include greater lengths at 1:3, as necessary. The drivers of these extensions will include the results of regional monitoring programs led by the Government of Nunavut, local programs led by Baffinland and/or QIA (through the CRLU monitoring program), and the lived experience of Inuit that travel the area and observe caribou interacting with the railway. Baffinland, working with Inuit and the TEWG will develop a Caribou Crossing Construction Decision Matrix to define the exact process that will be used to make additional modifications to the railway for the purpose of caribou crossings. This would be similar to the Additional Level Crossing Construction Decision Matrix submitted in October 2019, describing the process to add additional land use crossings.	NA	This commitment will be implemented post PC approval
235	ECCC-1 NEW ECCC-FC4 WWF-FWS-06 WWF-FWS-08	ECCC WWF	Atmospheric Environment	6 - Response to Additional Questions	Should Phase 2 be approved, Baffinland will require directly chartered ore carriers, through its contracts, to use lighter distillate fuels (MGO or equivalent) within the northern marine Regional Study Area, which shares a border with the Nunavut Settlement Area (NSA). Baffinland notes that scrubbers are not required when lighter distillates are used.	NA	This commitment will be implemented post PC approval
234	NEW	QIA	Atmospheric Environment	6 - Response to Additional Questions	Baffinland will develop and fund a Community Based Monitoring (CBM) program out of Pond Inlet that is Inuit led to monitor the extent of visual dust in the Project Area as well as a snow sampling program. The CBM program could include a combination of snow coring and visual observation collection, as well as geochemical and satellite imagery analysis. Baffinland has already commenced with a pilot program that included snow sampling at multiple locations in and around the Milne Port development area, and compared the metals concentrations against Health Canada established drinking water and aesthetic guidelines. A final report on this pilot program will be shared in an information package on dust Baffinland is preparing to submit with its response to questions through the Phase 2 review. The final report will include a next steps section specific to establishing the community based component of this program, to be funded and administered by Baffinland until QIA is prepared to take over the program under the Inuit Stewardship Plan.	NA	This commitment will be implemented post PC approval
233	NEW	QIA	Atmospheric Environment	6 - Response to Additional Questions	Baffinland will increase the number of dust collectors across the Project. Similar to the process for locating the 6 additional dust collectors along the Tote Road in 2018 as part of the Production Increase Proposal, Baffinland will look to work with QIA and representatives from the community of Pond Inlet to determine the best locations to place additional dust collectors across the mine site, including around the quarry, ship loader and port activities at Milne Port. These stations could be established this Spring and contribute to the comprehensive audit of dust sources across the Project.	NA	This commitment will be implemented post PC approval
232	NEW	QIA	Atmospheric Environment	6 - Response to Additional Questions	Baffinland will implement additional mitigations at Milne Port if DusTreat (stockpile spray) does not appear to reduce fugitive dust in 2021. Performance monitoring of DusTreat applications will be evaluated using data obtained from existing dustfall monitoring programs and remote sensing of dust deposition using available satellite imagery. Should monitoring indicate that DusTreat has not been effective in reducing dust around Milne Port, Baffinland will work with QIA to investigate and agree to additional mitigation measures. These may include, but are not limited to: • Modifications to the application process for DusTreat; • Evaluation and implementation of alternative spray technologies/products; • Installation of wind fencing around the Milne Port stockpiles; and • Stockpile covers (tarp like product). Additional mitigations for dust at Milne Port will be provided to QIA by mid-March as part of the adaptive management update to the Air Quality and Noise Abatement Management Plan, a plan selected by QIA for approval as part of the Inuit Certainty Agreement. The comprehensive audit to be initiated this year will likely add to the potential mitigations to include in our base operating plans as well as our adaptive management plans.	NA	This commitment will be implemented post PC approval
231	NEW	QIA	Atmospheric Environment	6 - Response to Additional Questions	Baffinland will consider covering open boxes of haul trucks and/or rail cars, and enclosing the Mine Site crushers as part of the independent audit. Should the intendent dust audit indicate that covering the open boxes of ore haul trucks and/or rail cars, or enclosing the primary crushing facility at the Mine Site would lead to meaningful reductions in dust, they will be implemented. Should the outcome of the audit not require the pre-emptive application of these mitigations, they will be integrated into Baffinland's Adaptive Management Plan as response to passing moderate or high level thresholds, as agreed to with the QIA, and by extension the Inuit Committee.	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
230	NEW	QIA	Atmospheric Environment	6 - Response to Additional Questions	Baffinland will fund an independent audit of all present and future (Phase 2) dust sources across the Project to ensure the proper dust controls are in place. This will include an evaluation of existing and proposed dust controls for the purpose of identifying where improvements or additional measures are required. To ensure the audit fully considers the knowledge and concerns of Inuit, and that Baffinland is accountable for implementing the recommendations that follow from the audit, Baffinland will seek to establish a joint Project Charter with the QIA and designated representatives from the impacted communities. The project charter will outline the audit goals, roles and responsibilities, approach to the use of IQ, major milestones, timelines, risks, etc. Any onsite inspections by the auditors will be attended by designated community representatives to provide their insights at each audit location.	NA	This commitment will be implemented post PC approval
229	NEW	QIA	Socio-Economic Environment	6 - Response to Additional Questions	Baffinland will work with QIA and the impacted communities to develop a final IQ Management Framework, subject to co-approval of QIA and the impacted communities. If the communities agree, their approval could be facilitated through the Inuit Committee for the Mary River Project.	NA	This commitment will be implemented post PC approval
228	NEW	QIA	Marine Environment	5 - Public Hearing 2021	Baffinland commits to a retrospective analysis of the behavioural responses of narwhal to vessels travelling both southbound and northbound, and integrating this analysis in future monitoring	NA	This commitment will be implemented post PC approval
227	NEW	QIA	Marine Environment	5 - Public Hearing 2021	Baffinland commits to investigating additional mitigation measures with respect to the Botnica and Sara Desgagne.	NA	This commitment will be implemented post PC approval
225	NEW	QIA	Marine Environment	5 - Public Hearing 2021	Baffinland commits to developing a ringed seal monitoring plan that incorporates Inuit perspectives into the design, planning and implementation phases. Additionally, Baffinland commits to including Inuit OITRs for ringed seal, which will include low, moderate and high risk thresholds and responses into the Adaptive Management Plan for the Marine Monitoring Plan.	NA	This commitment will be implemented post PC approval
224	NEW	QIA	Marine Environment	5 - Public Hearing 2021	Baffinland commits to reporting on observed behavioural responses of ringed seal collected through the Ship-Based Observer Monitoring Program during the shoulder seasons.	NA	This commitment will be implemented post PC approval
223	QIA-01 QIA-02	QIA	Terrestrial Environment	5 - Public Hearing 2021	Baffinland commits to working with the TEWG and the Inuit Committee to update the Caribou Protection Measures in the Terrestrial Environment Mitigation and Management Plan (TEMMP) for the Mary River Project within 6 months of the issuance of an amended Project Certificate 005. Baffinland commits to funding a caribou-focused IQ study with invite to the HTOs and supported by the QIA within 6 months of the issuance of an amended Project Certificate 005. These timelines are contingent on the QIA forming the Inuit Committee at least 6 months' prior the date of agreement. The IQ study will be scoped to ensure that it builds upon existing well-documented IQ, and includes verification of this information with Inuit knowledge holders. The results of this study will be used by QIA, the HTOs, the Inuit Committee and Baffinland to further update the Caribou Protection Measures, develop a Caribou Protection Map and project protection zones, and inform monitoring, mitigations and thresholds established through the Inuit Committee and the TEWG.	NA	This commitment will be implemented post PC approval
222	QIA-01 QIA-02	QIA	Terrestrial Environment	5 - Public Hearing 2021	Baffinland is committed to coming to agreement on railway monitoring. A multi-dimensional approach to monitoring is proposed which would involve Inuit staff working under the Inuit Stewardship Plan monitoring according to Inuit interests as informed by the Inuit Committee, and, QIA technical staff. Baffinland commits to coming to agreement on a railway monitoring plan within 6 months of the issuance of an amended Project Certificate 005. This timeline is contingent on the QIA forming the Inuit Committee at least 6 months' prior the date of agreement.	NA	This commitment will be implemented post PC approval
221	QIA-40	QIA	Atmospheric Environment	5 - Public Hearing 2021	Baffinland will provide a Climate Change Strategy within 30 days of the issuance of a positive NIRB Recommendation	NA	This commitment will be implemented post PC approval
220	GN-02	GN	Terrestrial Environment	5 - Public Hearing 2021	Baffinland will work with the TEWG and Inuit Committee to develop a preliminary threshold for caribou group size that would trigger the temporary suspension of road and/or rail traffic. The threshold will be based on monitoring outcomes, operating experience, community input, and further discussion with the TEWG and Inuit Committee.	NA	This commitment will be implemented post PC approval
219	DFO 3.4.4 NEW (7)	DFO	Marine Environment	5 - Public Hearing 2021	Baffinland commits to collect acoustic data near the floe edge during the 2021/2022 shipping season. Baffinland will collaborate with Inuit and DFO on the development of the draft program following the process as outlined in DFO 3.3.3 (NEW).	NA	This commitment will be implemented post PC approval
218	DFO 3.4.4 NEW (6)	DFO	Marine Environment	5 - Public Hearing 2021	Host dedicated workshops throughout 2021 to identify, develop and review objectives, indicators, thresholds and responses to be applied in Baffinland's adaptive management of project activities in the marine environment, including icebreaking. Baffinland and the MEWG will review these objectives, indicators, thresholds and responses bi-annually to determine if they are still sufficient, or if more suitable measures may exist (as supported by literature, Project monitoring, updated national or international guidelines, and/or measures applied for similar projects, if relevant to Project conditions). This includes working with the MEWG to improve the existing monitoring and reporting for the Early Warning Indicator(s); and working with the MEWG to review and ensure that existing EWIs are effective and select new or additional EWIs, where needed. If and when they are available, DFO will provide the MEWG with indicators and values used by DFO for the purposes of stock assessment and management of narwhal or other marine mammals. Monitoring methodologies for the selected indicators will be informed by DFO and Inuit in advance of submission to the MEWG. These recommendations and the implementation of monitoring will begin no later than the 2022 shipping season.	NA	This commitment will be implemented post PC approval Note that reference to implementation in 2021 and/or 2022 was made prior to regulatory delays; implementation should occur in first year following approval.
217	DFO 3.4.4 NEW (5)	DFO	Marine Environment	5 - Public Hearing 2021	Conduct monitoring using remote technology during ice breaking and shoulder season shipping activities, as a component of DFO 3.5 NEW, to detect and monitor ship strikes and sea ice.	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
216	DFO 3.4.4 NEW (4)	DFO	Marine Environment	5 - Public Hearing 2021	Provide, in a report: • Confirm whether icebreaker vessels were used in spring and fall shoulder season transits; • Baffinland will provide daily ice conditions for days icebreakers were used; and • Updated noise exposure calculations for a half-transit vs full-transit scenario for the shoulder seasons once acoustic monitoring from the 2019 shoulder seasons has been processed. Based on DFO's review of information provided in point 4, if DFO determines that use of half-transit scenario exceeds established thresholds for duration of exposure to noise disturbance for marine mammals, then Baffinland will not operationalize the use of half-transits in either or both seasons.	NA	This commitment will be implemented post PC approval
215	DFO 3.4.4 NEW (3)	DFO	Marine Environment	5 - Public Hearing 2021	Beginning in 2021, apply the following transit restriction mitigations in the fall: • When a continuous sailing route of open water and/or new ice (<10cm) occurs between the entrance of Pond Inlet and Milne Port, then icebreaker transits and other unescorted vessels in the RSA may proceed under open-water operating conditions. • A maximum of two transits or four half transits will occur per day (24-h period) where grey ice (10-15cm) cannot be avoided along the shipping route. • No breaking of landfast ice along the shipping route. For the purpose of this commitment, the following terms are defined as: • Open-water: i. for the commencement of annual shipping season: for the purposes of the project, this is uninterrupted transits through ice concentration of 3/10 or less. ii. For the close of the annual shipping season: for the purposes of the project, this is uninterrupted transits through new ice depths of less than 10 cm. • Half-transit: the equivalent of half or less of the distance between Milne Port to the eastern edge of the RSA (73 W longitude).	NA	This commitment will be implemented post PC approval Note that reference to implementation in 2021 and/or 2022 was made prior to regulatory delays; implementation should occur in first year following approval.
214	DFO 3.4.4 NEW (2)	DFO	Marine Environment	5 - Public Hearing 2021	Plan to complete shipping by no later than October 31st of any given year. On an exceptional basis, Baffinland may ship up until November 15th, provided a complete and operational adaptive management plan is in place.	NA	This commitment will be implemented post PC approval
213	DFO 3.4.4 NEW (1)	DFO	Marine Environment	5 - Public Hearing 2021	Apply spring transit restriction mitigations described in the Assessment of Icebreaking Activities as long as ice concentrations, as defined by the Canadian Ice Service, of greater than 3/10 persist along the Northern Shipping Route, or meet the obligations of applicable commitments to others if more conservative, to determine the earliest date for commencing the shipping season. Initiation of this commitment will begin in 2021.	NA	This commitment will be implemented post PC approval
210	GN-TRC24	GN	Marine Environment	5 - Public Hearing 2021	Section 10.3.2 of the Spill at Sea Response Plan will be updated to reflect a requirement for coordination with the Government of Nunavut's Department of Environment and Emergency Management Office in the mobilization of emergency wildlife teams for the purpose of preventing wildlife contamination. Special consideration will be given to polar bear deterrence, which could be facilitated by helicopter or emergency response vessels. The feasibility of implementing catch and relocation as a deterrence for polar bear will be coordinated with the Department of Environment based on the circumstances of the spill.	NA	This commitment will be implemented post PC approval
209	DFO 3.6.8 NEWQIA-43QIA-44QIA-45	DFOQIA	Marine Environment	4 - Post September 2020 Technical Meetings	Updated commitment wording in relation to DFO 3.6.8 NEW: Baffinland continues to maintain that the identification of high-risk biological species or groupings of species of concern is the primary responsibility of DFO. Despite this, Baffinland is committed to supporting the development of a trigger list of high biological risk species or groupings of species of concern and associated response plans through the process outlined in response to DFO 3.6.9 and DFO 3.6.10 and to refining that list with DFO on an ongoing basis starting in 2021.	NA	This commitment will be implemented post PC approval
208	DFO 3.6.7 NEW QIA-43 QIA-44 QIA-45	DFO QIA	Marine Environment	4 - Post September 2020 Technical Meetings	Updated commitment wording in relation to DFO 3.6.7 NEW: Baffinland commits to updating the marine monitoring plan (MMP) in consultation with MEWG members and this will be completed prior to the start of the 2022 shipping season and prior to any Phase 2 shipping. The updated MMP will detail the revised MEEMP sampling design which includes greater seasonal and spatial coverage and increased sampling effort and sample sizes to address DFO concerns related to achieving sufficient statistical power for detection of project effects (≥0.8, as per recommendations in DFO 2020, pages 4-7). The updated MMP will include clear protocols for determining identity and status of species collected as part of this program.	NA	This commitment will be implemented post PC approval Note that reference to implementation in 2021 and/or 2022 was made prior to regulatory delays; implementation should occur in first year following approval.
207	QIA-43 QIA-44 QIA-45	QIA	Marine Environment	4 - Post September 2020 Technical Meetings	The risk-based methodology and associated ballast water compliance sampling plan to be developed in relation to DFO-3.6.5 will include a component for the monitoring of contaminants from each port and treatment type to assess potential chemical risks (e.g., from foreign ports or treatment residuals). Further risk-based assessment of contaminants will be conducted, using methodology and approaches developed in relation to DFO 3.6.5, in the event project vessels switch from exchange plus treatment to just treatment of ballast water.	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
206	DFO 3.6.4 NEW QIA-43 QIA-44 QIA-45	DFO QIA	Marine Environment	4 - Post September 2020 Technical Meetings	Updated commitment wording in relation to DFO 3.6.4 NEW: Baffinland will consider discontinuing exchange plus treatment requirements should treatment systems efficacy reach a point that makes the benefits of an exchange plus treatment system negligible. This decision will be made in consultation with TC and DFO and will be based on a consideration of factors outlined in DFO 2019 (i.e. if ballast water organism concentration or composition, environmental conditions, shipping patterns, proportion of voyages meeting the D-2 standard, or available data describing these conditions changes in the future, and updates to global research on ballast systems). In this event Baffinland will update ballast water dispersion modelling to more accurately reflect the spectrum of salinity, temperature, and discharge volumes that can be expected to be discharged at Milne Port under Phase 2 operations if prior exchange were to be discontinued. Baffinland will conduct a risk-based assessment of contaminants that could be released into Milne Inlet in the event project ore vessels switch from exchange plus treatment to just treatment of their ballast water.	NA	This commitment will be implemented post PC approval
205	DFO 3.6.3 NEW QIA-44 QIA-45	DFO QIA	Marine Environment	4 - Post September 2020 Technical Meetings	Updated commitment wording in relation to DFO 3.6.3 NEW: Baffinland will require all vessels calling on Milne Port that treat their ballast under the D2 Standard to also perform a ballast water exchange prior to treatment. By 2024, for ore carriers originating from Canadian waters (i.e., domestic trips) Baffinland will only charter vessels equipped with treatment systems, and will require those vessels to treat their ballast under the D2 Standard and to also perform a ballast water exchange prior to treatment. For ships unable to conduct exchange as specified in Canadian Ballast Water Regulations (e.g. ships on Canadian domestic trips), exchange is to be conducted as specified in revised ABWEZs for Eastern Arctic as per DFO CSAS advice (see DFO 2015, Stewart et al. 2015 and Goldsmit et al. 2019). This updated commitment will be reflected in the 2021 Standing Instructions to Masters.	NA	This commitment will be implemented post PC approval
204	DFO 3.6.2 NEWQIA-43QIA-44QIA-45	DFOQIA	Marine Environment	4 - Post September 2020 Technical Meetings	Updated commitment wording in relation to DFO 3.6.2 NEW: Baffinland commits to record the Milne Port anchorage and associated coordinates where compliance testing and discharge occurs in the ballast water testing forms, completed by Baffinland's environmental monitors. Baffinland will also report the duration and volume that occurs at each discharge point concurrent with biological testing that will be conducted to support the risk based methodology under DFO 3.6.5, and for one additional year following commissioning of the second ore dock, if required. A dataset with discharge coordinates and the durations and volumes of discharges at each discharge point will be provided to MEWG members as part of annual reporting.	NA	This commitment will be implemented post PC approval
203	DFO 3.6.1 NEW QIA-43 QIA-44 QIA-45	DFO QIA	Marine Environment	4 - Post September 2020 Technical Meetings	Updated commitment wording in relation to DFO 3.6.1 NEW: Project vessels are limited to releasing ballast water at one of the three anchorage locations at Milne Port, or while berthed at the ore dock. Further, prior to any ballast water discharge D-1 compliance testing must be completed. Instructions to not release ballast water prior to arrival at Milne Port and completion of ballast water testing is provided to all ship operators in Baffinland's Standing Instruction to Masters (SITM). This requirement will remain under Phase 2.	NA	This commitment will be implemented post PC approval
202	QIA-42	QIA	Freshwater Environment	4 - Post September 2020 Technical Meetings	In conjunction with project stakeholders, Baffinland will develop a Terms of Reference for a Freshwater Environment Working Group (FEWG). Respecting the heightened regulatory oversight in relation to the freshwater environment, the FEWG will meet on an as needed basis to discuss items to be agreed upon by members of the FEWG. In person meetings, if required, will be coordinated with the planning of Marine and Terrestrial Environment Working Group meetings, where possible.	NA	This commitment will be implemented post PC approval
201	QIA-42	QIA	Freshwater Environment	4 - Post September 2020 Technical Meetings	Baffinland collects and reports data on fish presence, catch per unit effort, and fork length from 30-60 crossing sites along the Tote Road annually. Baffinland commits to adding observations regarding physical condition of fish (e.g., lesions, injuries, activity level). Baffinland and QIA will determine an appropriate approach to analysis and development of a metric for monitoring fish health for the 2022 reporting period. The program will be evaluated every three (3) years to determine if monitoring locations may be reduced due to no observations of project related-impacts.	NA	This commitment will be implemented post PC approval Note that reference to implementation in 2021 and/or 2022 was made prior to regulatory delays; implementation should occur in first year following approval.
200	QIA-41	QIA	Freshwater Environment	4 - Post September 2020 Technical Meetings	Baffinland is prepared to adopt a more precautionary moderate risk threshold for lake sedimentation. The current moderate risk threshold for lake sedimentation is 1 mm, adopted from the FEIS. Baffinland will adopt the lake sedimentation rate predicted in the FEIS of 0.54mm, which is about half the current threshold, at the moderate risk level. Exceedance of the 0.54mm moderate risk level will trigger additional study to validate the thresholds relative to impacts on arctic char eggs. A low risk threshold of 0.15 mm will also be applied that will trigger corresponding low risk response actions. Data will be collected and reported in 2021 to characterize sediment grain size.	NA	This commitment will be implemented post PC approval Note that reference to implementation in 2021 and/or 2022 was made prior to regulatory delays; implementation should occur in first year following approval.

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
199	PCA-03	PCA	Marine Environment	4 - Post September 2020 Technical Meetings	See Commitments to DFO 3.6.6 NEW	NA	This commitment will be implemented post PC approval
198	DFO 3.7 NEW	DFO	Marine Environment	4 - Post September 2020 Technical Meetings	Baffinland recognizes that DFO disagrees with the determinations of the Combined Effects Assessment located in Table 22 of Baffinland's Marine Mammal Monitoring Technical Memorandum updated in May 2020 (document # 1663724-186-TM-Rev2-38000). DFO is concerned that the combined effects assessment does not adequately consider uncertainty and potential interactions between combined effects, nor does it consider combined effects outside of the Regional Study Area. To account for residual uncertainty in the effects assessment, Baffinland has made several commitments related to the strengthening of monitoring programs, as well as the implementation of pilot projects to better detect and monitor effects of the project on the marine environment. Implementation of these commitments will be developed in collaboration with DFO, Inuit, and relevant organizations to ensure that all recommendations and concerns are addressed and accounted for. If results of the monitoring programs indicate that there are significant or meaningful impacts to the marine environment, Baffinland commits to undertake investigations to determine the cause of the impact, and will identify any mitigations or other adaptive management strategies to address the impact for review and recommendations by Inuit and the MEWG. Recommendations from MEWG members will be treated consistent with the decision-making requirements as outlined in the forthcoming updated MEWG Terms of Reference.	NA	This commitment will be implemented post PC approval
197	DFO 3.6.6 NEW	DFO	Marine Environment	4 - Post September 2020 Technical Meetings	BIM commits to ensuring that vessels arriving to Milne Port and Steensby Port are following IMO International Guidelines for Biofouling Management (and any associated updates to these Guidelines) by including adherence to these Guidelines as a requirement in vessel procurement contracts. • Baffinland will include in its contracts with ship owners a requirement to follow IMO Guidelines for Biofouling Management • Baffinland will require each vessel to maintain a Biofouling Management Plan and Biofouling Record Book consistent with Appendix 1 and 2 of the IMO Guidelines • Baffinland will provide a copy of the management plans and record books for each vessel in its Annual Report to the MEWG. • Initiation of this commitment will begin in 2021.	NA	This commitment will be implemented post PC approval Note that reference to implementation in 2021 and/or 2022 was made prior to regulatory delays; implementation should occur in first year following approval.
196	DFO 3.6.6 NEW	DFO	Marine Environment	4 - Post September 2020 Technical Meetings	BIM will develop a robust monitoring program design with input from DFO and other relevant parties that describes its plan for conducting ROV surveys of vessels to evaluate the extent of biofouling on ship hulls arriving in Milne Port prior to the 2022 shipping season. The sampling design will include appropriate sampling effort (with respect to number of vessels and coverage of each vessel) to evaluate differences in extent of biofouling across vessels with different biofouling management measures and histories to provide data for risk assessments to guide future monitoring and management of high risk vessels. Targets for sampling efforts will be established in consultation with DFO and submitted for review and recommendations from Inuit and the MEWG. Recommendations from MEWG members will be treated consistent with the decision-making requirements as outlined in the forthcoming updated MEWG Terms of Reference. This monitoring program will also be applied to vessels calling at Steensby Port as soon as shipping commences for the southern route	NA	This commitment will be implemented post PC approval Note that reference to implementation in 2021 and/or 2022 was made prior to regulatory delays; implementation should occur in first year following approval.
195	DFO 3.6.6 NEW	DFO	Marine Environment	4 - Post September 2020 Technical Meetings	Based on new information gathered through vessel biofouling monitoring, a review of vessels Biofouling Management Plans and Record Books and, where known, a review of vessels sailing history relative to variables that could influence the extent of hull fouling and have already been well described in the literature (e.g., Coutts 1999; Coutts & Taylor 2004; Ruiz & Smith 2005), BIM will develop a risk assessment and establish a risk-based sampling plan to guide future monitoring and management of high risk vessels. This risk assessment and risk-based sampling plan will be developed in consultation with DFO, and submitted to the MEWG (of which DFO is a member) for review and recommendations. Recommendations from MEWG members will be treated consistent with the decision-making requirements as outlined in the forthcoming updated MEWG Terms of Reference	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
194	DFO 3.6.6 NEW	DFO	Marine Environment	4 - Post September 2020 Technical Meetings	Biological sampling (i.e., collection of genetic material, tissue samples, and/or whole organisms) of vessel biofouling would contribute to the identification and monitoring of aquatic invasive or non-indigenous species that have the potential to propagate in northern waters as a result of the Project's shipping activities. BIM will revisit the state of technology and methods used to assess and conduct biological sampling of vessel biofouling and submit a report, to the MEWG by the end of 2021, on options that exist to conduct this work. It is not expected that this report will consider diving as a means to conduct the biological sampling. • Once a feasible and safe technology or method has been determined with the MEWG, a pilot program will be run during the next shipping season to determine if it is suitable. If it is not, the report will be revisited and a new technology or method will be selected for another pilot program to be implemented during the next shipping season. • Based on the results of the pilot program, it will be confirmed with the MEWG whether a technically and economically feasible technology or methods exist. If the MEWG agrees by consensus that the program stands to provide valuable data, BIM will update its MMP to include a biological sampling component for biofouling in advance of the next shipping season. The updated monitoring plan will be provided to the MEWG for review and comment before it is finalized. • BIM will revise and update its risk assessment and risk-based sampling plan (see 3, above) once a robust set of biological data has been collected. This will be reviewed by the MEWG prior to the next shipping season. Recommendations from MEWG members will be treated consistent with the decision-making requirements as outlined in the forthcoming updated MEWG Terms of Reference.Any feasible technology or method for biological sampling applied at Milne Port will also be applied at Steensby Port.	NA	This commitment will be implemented post PC approval Note that reference to 2021 is not feasible given regulatory delays, should be moved to first year following approval.
193	DFO 3.6.6 NEW	DFO	Marine Environment	4 - Post September 2020 Technical Meetings	In the event that modifications to biofouling management practices are proposed, Baffinland will consult with DFO and other relevant parties to determine if updates to the risk assessment and risk-based sampling plan are required. Updates to the assessment and the sampling plan will be submitted to the MEWG for review and recommendations prior to implementation. Recommendations from MEWG members will be treated consistent with the decision-making requirements as outlined in the forthcoming updated MEWG Terms of Reference.	NA	This commitment will be implemented post PC approval
192	DFO 3.5 NEW	DFO	Marine Environment	4 - Post September 2020 Technical Meetings	Baffinland has indicated that it is only feasible to have Marine Wildlife Observer's present on the MSV Botnica. Noting that having MWO's present on ships may not be feasible at all times due to safety concerns, and that certain environmental conditions may limit visibility, Baffinland commits to develop a pilot project using remote technology to monitor for ship strikes along the shipping route within the Nunavut Settlement Area. The intent of the pilot project is to determine the efficacy of mitigation to prevent ship strikes and of monitoring to detect ship strikes and any near misses. To solicit early feedback from DFO in advance of developing and submitting the methodology and parameters for the monitoring program to the MEWG, DFO will provide reports from all comparable studies conducted by DFO 8 months in advance of the start of the program and will identify what aspects of these programs DFO is recommending Baffinland integrate into the program design. Where relevant, Baffinland will incorporate the guidance provided by DFO into the study design prior to distributing it to the MEWG for review. Methodology and parameters for the monitoring program will be submitted to the MEWG (of which DFO is a member) for review and recommendations. Recommendations from MEWG members will be treated consistent with the decision-making requirements as outlined in the forthcoming updated MEWG Terms of Reference.The monitoring program will run for three years, and will begin one year in advance of Phase 2 shipping operations, with a report submitted to DFO and MEWG members each year the program is implemented. The report will include the following information: 1. The number of hours and ships on which the program ran 2. Types and size of vessels on which the program ran 3. Timing during the shipping season when the program was run 4. The number of vessels that were called to Milne Port relative to Project certificate limits 5. If distance of animals to the vessels can be calculated, a discussion of relative CPAs. 6. Relevant environmental conditions that may affect detection or increase potential likelihood of an encounter with marine mammals If the program is collecting information related to Project effects on the marine environment that is not otherwise being collected through other programs. 7. Discussion of cost/value of the Project. After the third year, Baffinland will submit an overview report on the program, to the MEWG for review. This report will document and discuss the benefits of the project and any challenges faced. If the pilot program confirms ship strikes and/or near misses are occurring the project will be extended and included as a component of the MMP, in consultation with the MEWG, of which DFO is a member. Otherwise, the program will be discontinued as a permanent component of the MMP based on the above listed factors, though the program may be implemented again periodically based on advice from the MEWG or Inuit.	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
191	DFO 3.4.3 NEW	DFO	Marine Environment	4 - Post September 2020 Technical Meetings	Baffinland commits to run an annual end of season clearance survey. The survey will occur within 7 days following the close of the shipping season. Determination on the need for the end of season surveys will be where ice conditions warrant the survey, and in collaboration with MHTO and DFO. Baffinland commits to provide GIS coordinates and a description of group size(s) of narwhal along the aerial survey tracks. In addition, Baffinland will document ice conditions along the aerial survey tracks in order to inform changes in ice conditions and/or areas of greater risk for entrapment. This data will be provided to DFO as part of the fall shoulder season shipping reports as committed to under DFO 3.2.1 (NEW). A reporting structure will be determined in collaboration with MHTO, DFO, and other relevant boards and organizations in the event an ice entrapment is observed during the annual end of season clearance survey, as will procedures for determining if the event is a natural or project-related event, and associated response actions. This reporting structure is essential to determine the best course of action should an ice entrapment occur. After five years of annual end of season clearance surveys once Phase 2 shipping is operational, Baffinland and DFO will collaborate to analyze the data acquired from these surveys to determine what has been learned about any potential ice entrapments, and if the annual surveys should continue to proceed.	NA	This commitment will be implemented post PC approval
190	DFO 3.4.2 NEW	DFO	Marine Environment	4 - Post September 2020 Technical Meetings	Baffinland recognizes that DFO disagrees with the certainty assigned to the potential for ice entrapments of marine mammals in the Phase 2 FEIS Addendum. To address DFO's concerns about uncertainty, Baffinland has committed to run annual end of season clearance surveys (DFO 3.6.2) and develop a response plan for the potential event of an ice entrapment (DFO 3.4.3 NEW).	NA	This commitment will be implemented post PC approval
189	DFO 3.4.1 NEW	DFO	Marine Environment	4 - Post September 2020 Technical Meetings	Baffinland commits to update the Marine Monitoring Plan (MMP) to include a specific section relevant to icebreaking and shoulder season shipping activities in advance of the 2021 shipping season. Through the ICA, Baffinland is also committed to the development initial Indicators for the MMP in collaboration with QIA by December 2020. These initial OITR's will then be subject to review by Inuit (through the Inuit Committee) and regulators (through the MEWG) before finalization (no later than August 30, 2021).In advance of the 2021 shipping season, BIM can also commit to providing an updated draft MMP that will include a placeholder for a dedicated section specific to icebreaking and shoulder season activities. A full update to the MMP will occur following receipt of a positive decision from the Minister. Updates to the MMP will be actively worked on with the MEWG in 2021 (following a decision). A final MMP would then be in place for the 2022 shipping season. Recommendations from MEWG members on survey methodologies and initial indicators will be treated consistent with the decision-making requirements as outlined in the forthcoming updated MEWG Terms of Reference.	NA	This commitment will be implemented post PC approval Note that reference to implementation in 2021 and/or 2022 was made prior to regulatory delays; implementation should occur in first year following approval.
188	CIRNAC-01 NEW	CIRNAC	Freshwater Environment	3 - September 2020 - Technical Meetings	CIRNAC requests that Baffinland commits to the providing the following information during the Water Licence Amendment process, subject to Nunavut Water Board requirements. i. Baffinland shall provide a heat balance and relationship of the heat generation associated with the exothermic reaction of PAG waste rock deposited and soluble sulphates and demonstrate that the current design of the waste rock facility will maintain permafrost conditions in the long term (closure and beyond). ii. Baffinland shall perform an oxygen balance of the waste rock facility and correlate it with soluble sulphates. This will provide understanding of the process of ARD generation and the performance of the waste rock facility.	NA	This issue is resolved for environmental assessment purposes and will be further addressed during water license
187	CIRNAC-01a NEW	CIRNAC	Terrestrial Environment	3 - September 2020 - Technical Meetings	Baffinland shall develop a detailed site program to monitor the thaw consolidation and soil deformation under the structures/embankments constructed as part of the Phase 2 Project. The monitoring results shall be compared with the Final Environmental Impact Statement Addendum predictions and appropriate mitigation measures shall be identified and incorporated into the adaptive management approach.	NA	This commitment will be implemented post PC approval
186	CIRNAC-03 NEW	CIRNAC	Freshwater Environment	3 - September 2020 - Technical Meetings	CIRNAC requests that Baffinland commits to the providing the following information during the Water Licence Amendment process, subject to Nunavut Water Board requirements. i. Baffinland shall develop reliable criteria for identification of PAG rock that clearly accounts for uncertainty in the 0.2% total sulphur threshold and the presence of acidic soluble sulphates upon projected life of mine tonnages of PAG and Non-Acid Generating (NAG) rock. ii. Baffinland shall incorporate these criteria, clearly stated ranges in projected life of mine PAG and NAG rock tonnages and the resultant necessary contingencies and methods of validation that need to be incorporated into engineering design, environmental monitoring and management strategies for the Waste Rock Management Plan and Interim Closure and Reclamation Plan. These documents are to be submitted for review during the Water Licence Amendment process, subject to Nunavut Water Board requirements. iii. Baffinland shall review the performance of these plans and provide evidence of the effectiveness of these plans by demonstrating compliance with the management measures and that the desired outcomes of mitigation are achieved on an annual basis.	NA	This issue is resolved for environmental assessment purposes and will be further addressed during water license
184	ECCC-3 NEW ECCC-4 NEW ECCC-6 NEW	ECCC	Freshwater Environment	3 - September 2020 - Technical Meetings	Baffinland will address ECCC's outstanding concerns, as identified in their letter to the NIRB on September 4, 2020, through the Nunavut Water Board Water License amendment process for Phase 2	NA	This issue is resolved for environmental assessment purposes and will be further addressed during water license
178	IGW HB-HTO	IGW HB	Corporate Environment	3 - September 2020 - Technical Meetings	Baffinland will work with the communities of Igloolik and Sanijarak to establish monitoring programs in relation to the Southern Transportation Corridor to Steensby Inlet following a decision to move forward with that component of the Project	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
177	IWG	IWG	Atmospheric Environment	3 - September 2020 - Technical Meetings	Baffinland will integrate IQ into its analysis of satellite photo data, once available, of dust dispersion in relation to the Mary River Project	NA	Initiative under existing Project
176	IWG NrCan	IWG	Terrestrial Environment	3 - September 2020 - Technical Meetings	Baffinland will share the results of the Route 3 Geotechnical Program, currently planned to begin in October 2020, with the Igloolik Working Group and Natural Resources Canada	NA	Results will be shared as they become available
170	MHTO-6 GN-01	MHTO	Terrestrial Environment	3 - September 2020 - Technical Meetings	Baffinland is committed to an annual maximum of 6MT throughput during the construction period for Phase 2.	NA	This commitment will be implemented post PC approval
168	PCA-04b	PCA	Marine Environment	3 - September 2020 - Technical Meetings	Baffinland will update the definition of sea ice concentration at which regular shipping activities can proceed as 3/10 ice cover.	NA	This commitment will be implemented post PC approval Resolution is pending resolution of outstanding DFO issues
167	QIA-20 QIA-21	QIA	Atmospheric Environment	3 - September 2020 - Technical Meetings	Baffinland will consider rail car coverings as part of a suite of potential response actions through the development of adaptive management objectives, indicators, thresholds, and responses for rail operation and dust. These OITRs will be developed in consultation and with agreement from the QIA.	NA	This commitment will be implemented post PC approval
163	QIA-01 QIA-02	QIA	Terrestrial Environment	3 - September 2020 - Technical Meetings	Baffinland is committed to using Inuit input to finalize wildlife crossings, land user crossings (subject to Transport Canada regulations and acceptance), slope designs, and adaptive management (i.e. future rail improvements or mitigation measures).	NA	This commitment will be implemented post PC approval
162	QIA-01 QIA-02	QIA	Terrestrial Environment	3 - September 2020 - Technical Meetings	Baffinland is committed to coming to agreement on railway monitoring. A multi-dimensional approach to monitoring is proposed which would involve Inuit staff working under the Inuit Stewardship Plan monitoring according to Inuit interests as informed by the Inuit Committee, and, QIA technical staff.	NA	This commitment will be implemented post PC approval
161	QIA-01QIA-02	QIA	Terrestrial Environment	3 - September 2020 - Technical Meetings	Baffinland is committed to evaluating the Railway Operation and Maintenance Plan against the Adaptive Management Plan and Checklist, and subsequent updates.	NA	This commitment will be implemented post PC approval
160	QIA-01 QIA-02	QIA	Terrestrial Environment	3 - September 2020 - Technical Meetings	Baffinland is committed to having QIA's approval of the Interim Closure and Reclamation Plan (ICRP) prior to the NWB Public Hearing for Phase 2 Water License Amendments.	NA	This issue is resolved for environmental assessment purposes and will be further addressed during water license
159	QIA-01 QIA-02	QIA	Terrestrial Environment	3 - September 2020 - Technical Meetings	Baffinland will be solely responsible for all railway and rail feature construction costs, and all associated maintenance, should Adaptive Management Plan measures be triggered and identify that a modification to the rail must be made in accordance with adaptive management principles.	NA	This commitment will be implemented post PC approval
157	QIA-08	QIA	Socio-economic Environment	3 - September 2020 - Technical Meetings	Baffinland commits to develop a risk communication strategy focused on the gathering and dissemination of information to Inuit related to the Baffinland Iron Ore Mines Project, and linkages between the Project and human health and ecological risk assessment topics. The strategy will focus on, but not be limited to, building capacity within community groups to understand the mining process, elements of the mining process and how substances produced from the mining process move in the environment. Baffinland will work with communities to develop this program to ensure it is relevant to Inuit.	NA	This commitment will be implemented post PC approval
156	QIA-09	QIA	Terrestrial Environment	3 - September 2020 - Technical Meetings	Baffinland commits to working with QIA and the North Baffin Communities to develop revegetation standards based on IQ for reclamation and revegetation including meeting standards for cultural use and addressing community concerns with respect to re-establishing use of critical areas	NA	This commitment will be implemented post PC approval
155	QIA-20 QIA-21	QIA	Freshwater Environment	3 - September 2020 - Technical Meetings	Baffinland has agreed to a process to work with QIA to consider waterbodies of heightened importance and a tiered approach to compensation in the Water Compensation Agreement Process.	NA	This commitment will be implemented post PC approval
154	QIA-38	QIA	Socio-economic Environment	3 - September 2020 - Technical Meetings	Baffinland commits to providing Inuit employees with a childcare subsidy	NA	This commitment will be implemented post PC approval
153	QIA-38	QIA	Socio-economic Environment	3 - September 2020 - Technical Meetings	Baffinland commits to providing support to communities to ensure adequate childcare facilities become available	NA	This commitment will be implemented post PC approval
152	QIA-38	QIA	Socio-economic Environment	3 - September 2020 - Technical Meetings	Baffinland commits to working with QIA to develop quantitative measurable objectives that will provide greater insight into the mitigation of negative social impacts and the promotion of positive benefits	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
151	QIA-38	QIA	Socio-economic Environment	3 - September 2020 - Technical Meetings	Baffinland commits to funding QIA and the communities development of a social monitoring program to greater insight into the mitigation of negative social impacts and the promotion of positive benefits?	NA	This commitment will be implemented post PC approval
150	QIA-38	QIA	Socio-economic Environment	3 - September 2020 - Technical Meetings	Baffinland is committed to working with QIA and to allow QIA with approval of socioeconomic objectives, indicators, thresholds and responses as part of Baffinland's adaptive management principles.	NA	This commitment will be implemented post PC approval
145	QIA-42 MHTO HPI	QIA	Freshwater Environment	3 - September 2020 - Technical Meetings	Baffinland commits to providing QIA, MHTO and HPI a copy of the comprehensive lessons learned report (for the Tote Road crossings) when it is sent to DFO as part of the Phase 2 FAA.	NA	This commitment will be implemented post PC approval
144	QIA-45	QIA	Marine Environment	3 - September 2020 - Technical Meetings	Details of the DFO led sampling program to be carried out at Milne Port in 2021 will be shared through the Marine Environment Working Group prior to the 2021 shipping season. Baffinland notes that QIA has requested the details to be shared prior to a Public Hearing. This is contingent on the completion of the initial draft by DFO, and preliminary review by Baffinland, before it can be released for public review. Baffinland and DFO will endeavor to meet the requested timeline, but this should not be viewed as a barrier to moving forward with a Public Hearing.	NA	Tentatively before the Final Hearing, not a requirement Note that reference to implementation in 2021 and/or 2022 was made prior to regulatory delays; implementation should occur in first year following approval.
143	QIA-47 QIA-48	QIA	Marine Environment	3 - September 2020 - Technical Meetings	Baffinland commit to working with community organizations and community members to address any issues arising with respect to sea ice use and potential inference from shipping activity	NA	This commitment will be implemented post PC approval
142	QIA-47 QIA-48	QIA	Marine Environment	3 - September 2020 - Technical Meetings	Baffinland commits to include a checklist of information with regard to Inuit use of sea ice in its various forms (not just use of the floe edge) in the start and close of shipping season determinants report committed to DFO in relation to DFO 3.2.1 NEW.	NA	This commitment will be implemented post PC approval
139	WWF-08	WWF	Atmospheric Environment	3 - September 2020 - Technical Meetings	Baffinland commits to tracking and reporting annually GHG emissions for its operations, and upon evaluation of existing data, subsequently pursue efforts to set multi-year energy use and GHG emissions targets, that aim to ensure continual performance improvements over time, and achieve alignment with industry best practice, in the next draft of the Climate Action Plan.	NA	This commitment will be implemented post PC approval
138	MHTO-5d WWF	MHTO	Corporate Environment	3 - September 2020 - Technical Meetings	Baffinland commits to integrating independent relevant community based monitoring into phase 2 adaptive management, and mitigation measures when available and shared with Baffinland for inclusion. This could be integrated under the Inuit Stewardship Plan or brought forward through other venues by community participants in the environmental and socio-economic working groups. Baffinland will incorporate results of relevant community based monitoring that have been brought forward to it in future environmental assessments should they be developed.	NA	This commitment will be implemented post PC approval
137	General	General	Corporate Environment	3 - September 2020 - Technical Meetings	Baffinland commits to including information on activities and modifications made to the Project resulting from input from the Inuit Committee, the Inuit Stewardship Plan, the Inuit Social Oversight Committee, and any Culture Resource and Land Use assessments and monitoring results in their Annual Report to NIRB.	NA	This commitment will be implemented post PC approval
136	QIA-08	QIA	Socio-economic Environment	3 - September 2020 - Technical Meetings	Baffinland is committed to fully resourcing an Inuit-led country food baseline study for Pond Inlet and integrating the results into Project management, monitoring and compensation systems, including reconsideration of mitigations and compensation programs proposed by Baffinland in relation to food security based on the results of the Pond Inlet Country Food Baseline Study. This work will be Inuit-led and administered by the QIA, and supported by Baffinland. This information will inform long-term project monitoring consistent with the vision and principles of the Inuit Stewardship Plan and the Adaptive Management Plan. This project may also provide a basis against which the Wildlife Compensation Fund and Baffinland's other food security initiatives can be assessed over time. Baffinland will fund this study to completion.	NA	Implementation is ongoing, completion not required for environmental assessment purposes
135	QIA-01 QIA-02 QIA-04 QIA-07 QIA-11 QIA-38 QIA-46 QIA-49	QIA	Corporate Environment	3 - September 2020 - Technical Meetings	Baffinland will work with the QIA to jointly develop and approve the Adaptive Management Plan and associated sub-plans for the Mary River Project. This process will also include the development of Inuit Objectives, Indicators, Thresholds, and Responses, which will involve the impacted communities through the Inuit Committee and Inuit Social Oversight Committee. The Inuit Social Oversight Committee will support decision making if additional responses are required due to the monitoring results. Key areas for which QIA, based on Inuit input, will have adaptive management approvals are, but not limited to, the marine, terrestrial and social environments. This process will ensure that both Inuit Qaujimajatuqangit and western science will be applied to project operations and management decisions. Baffinland will fund Inuit participation in this initiative as well as activities needed to implement Adaptive Management responses for the life of the Project.	NA	Implementation is ongoing, completion not required for environmental assessment purposes

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
134	QIA0-2QIA-03QIA0-7QIA-10QIA-11QIA-38	QIA	Corporate Environment	3 - September 2020 - Technical Meetings	Baffinland will support the development of an independent, Inuit-led Inuit Committee. The Inuit Committee will be administered by the QIA and shall be comprised of members nominated from the five Project impacted Communities. The Inuit Committee will direct the monitoring of the Inuit Stewardship Plan's Culture, Resource, and Land Use stream to capture the Inuit experience and will support decision making if additional responses are required due to the monitoring results. The Inuit Committee will also have a role in identifying Inuit objectives, indicators, thresholds and responses to be built into the Project's Adaptive Management Plan. Baffinland will fund the ISP and Inuit Committee for the life of the Project. QIA will administer the ISP for the life of the Project.	NA	Implementation is ongoing, completion not required for environmental assessment purposes
133	QIA-02 QIA-09 QIA-11 QIA-38 QIA-46 QIA-49	QIA	Socio-economic Environment	3 - September 2020 - Technical Meetings	Baffinland and QIA agree to complete an additional Inuit-driven CRLU Assessment in consultation with the impacted communities, prior to major construction activities related to Phase 2. It is expected that this work will result in modifications and additions to mitigation, monitoring, adaptive management, and compensation measures, to be reflected in the Adaptive Management Plan and associated Environmental Management Plans. This will include updating Objectives, Indicators, Thresholds and Responses used in Project monitoring and Management. Baffinland will fund this work to completion.	NA	Implementation is ongoing, completion not required for environmental assessment purposes
132	QIA-22 QIA-30 QIA-53	QIA	Corporate Environment	3 - September 2020 - Technical Meetings	Changes in project scope, which could reasonably require amendment of the Project Certificate would result in the following obligations being initiated prior to the filing of a formal proposal to amend the project certificate: (a) Baffinland commits to carry out a Culture Resource and Land Use assessment conducted with QIA and Impacted communities, prior to the submission of an FEIS or FEIS Addendum. (b) Baffinland commits to carry out a Cumulative Effects Assessment conducted with QIA and Impacted communities, prior to the submission of an FEIS or FEIS Addendum. (c) Baffinland commits to review and renegotiation of the IIBA consistent with IIBA Article 22.4. (d) Parties come to agreement on increases to IIBA Implementation Costs.	NA	Implementation is ongoing, completion not required for environmental assessment purposes
131	QIA-03 QIA-04 QIA-05 QIA-09 QIA-10 QIA-38 QIA-46 QIA-49	QIA	Corporate Environment	3 - September 2020 - Technical Meetings	Baffinland will support Inuit to conduct independent, proactive monitoring of the Project for the purpose of mitigating adverse impacts and enhancing beneficial outcomes in a manner that captures the direct experiences of Inuit. A project management plan (the Inuit Stewardship Plan) will be developed by QIA, with input from an Inuit Committee and an Inuit Social Oversight Committee made up of members from the five Project impacted Communities. The Inuit Stewardship Plan will have two separate but linked streams: • Culture, Resource, and Land Use Stream • Social Stream Each stream will include dedicated monitoring led by Inuit monitors: • The Culture, Resources and Land Use Monitoring Program, with a focus on gathering data from impacted communities and through direct observations of changes on the land, waters, ice and wildlife • The Social Stream will see impacted community members trained to gather information about impacts on community well-being Information from both monitoring streams, and input from the two Committees, will directly inform the Project management system. Baffinland will fund the ISP for the life of the Project. QIA will administer the ISP for the life of the Project.	NA	Implementation is ongoing, completion not required for environmental assessment purposes
130	QIA-38	QIA	Socio-economic Environment	3 - September 2020 - Technical Meetings	Baffinland will support the development of an independent, Inuit-led Inuit Social Oversight Committee (ISOC). The Inuit Social Oversight Committee will be overseen and administered by QIA and shall be comprised of members nominated from the impacted communities. The Inuit Social Oversight Committee will direct the monitoring of the ISP's social stream to capture the Inuit experience and will support decision making if additional responses are required due to the monitoring results.Baffinland will work with QIA and the impacted Inuit communities to develop an enhanced, Inuit-driven, social monitoring program related to the Project. This monitoring program focused on community wellbeing will address a known monitoring gap and complement other forms of monitoring related to the project. Baffinland will fund the ISP and ISOC for the life of Project.	NA	Implementation is ongoing, completion not required for environmental assessment purposes
129	QIA-6 QIA-20	QIA	Terrestrial Environment	3 - September 2020 - Technical Meetings	Baffinland commits to adopt Route 3 for the final rail alignment and is committed to bearing the costs of transitioning to this alternative route. Baffinland agrees that technical issues associated with Route 3 will be addressed at the cost and risk of Baffinland and will not be used as the basis for reverting to Route 1.	NA	This commitment will be implemented post PC approval
128	QIA-20 QIA-21	QIA	Freshwater Environment	03 - September 2020 - Technical Meetings	Baffinland is committed, within the next year, to support an Inuit-led IQ study on water values in the Project-affected area, and to integrate the results into a revised water compensation agreement that establishes a tiered approach to compensation for substantial effects on water that increases compensation for impacts on waterbodies deemed by Inuit to be of heightened importance. In addition, a finding of a waterbody of heightened importance will increase the amount of monitoring focus such waterbodies receive, where a project impact pathway can be established. Monitoring will be carried out either through Baffinland's scientific monitoring or the new Inuit-led Culture, Resources and Land Use Monitoring Program.	NA	Implementation is ongoing, completion not required for environmental assessment purposes
127	DFO 3.1.2 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	Baffinland can confirm that it will not surpass the number of vessels described and assessed in the Phase 2 FEIS Addendum to ship an additional 20% of ore over 12 Mtpa in the maximum operational flexibility scenario. For clarity, this is a limit of 176 ore carriers, 12 freight vessels and 12 fuel vessels.	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
126	DFO 3.10.1 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	Baffinland will provide a detailed water withdrawal plan that includes an in-depth risk analysis informed by site specific fish and fish habitat features for the waterbodies chosen for water withdrawal as supplemental information to water licensing and any DFO Request for Review submission.	NA	This commitment will be implemented post PC approval
125	DFO 3.10.2 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	Baffinland will conduct a thorough localized assessment on the waterbodies selected for water withdrawal in order to adequately assess the potential impacts on the fish habitat resulting from 20% of the 10-year dry unit runoff water withdrawal on fish-bearing watercourses and connecting waterbodies. This assessment will include an assessment of the effects to littoral/shore/riparian areas from the proposed water withdrawal, the specific withdrawal locations proposed for each waterbody including fish habitat in the area and updated rationale on how this level of withdrawal will be an environmentally protective threshold. This content will be included as supplemental information to water licensing and regulatory permit applications made to DFO.	NA	This commitment will be implemented post PC approval
124	DFO 3.10.3 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	Baffinland will provide additional rationale/ assessment to support the assertion that 40% of the 10-year dry unit runoff water withdrawal from non-fish-bearing streams will not negatively affect downstream fish-bearing waterbodies. This content will be included as supplemental information to water licensing and regulatory permit applications made to DFO.	NA	This commitment will be implemented post PC approval
123	DFO 3.2.1 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	Baffinland commits to provide a summary of the following information as part of its annual reporting requirements, and in preliminary field reports within 35 days of Spring shoulder season shipping activities commencing and 15 days of Fall shoulder season activities ending: i. marine monitoring programs, ii. determinants for opening and closing the shipping season, iii. ecological and cultural (or "Inuit use") factors that influence shipping activities iv. other information, as requested by DFO and other regulators and key stakeholders, relevant to the marine environment. The requirement for, and format of, these reports will be included in the final Marine Monitoring Plan, should Phase 2 be approved. Additional information requested after submission of the preliminary field report is to be provided by Baffinland as a memo within 35 days and will be included in Annual Reporting.	NA	This commitment will be implemented post PC approval
122	DFO 3.2.2 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	Baffinland commits to updating the Draft Early Shipping Season-Operational Guide, to better characterize considerations used in determining the nominal shipping season. See response to DFO 3.2.2 for the commitment to report on determinants of opening and closing the shipping season.	NA	This commitment will be implemented post PC approval
121	DFO 3.3.3 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	Baffinland commits to collecting acoustic data in the RSA using AMARs to characterize the degree of conservatism in the sound propagation modelling, at an appropriate frequency for the duration of the Phase 2 construction and operation periods. Baffinland will collaborate with Inuit and DFO on the development of the draft program prior to submission to the MEWG for additional advice and recommendations. Recommendations from MEWG members will be treated consistent with the consensus-based decision requirements of the final updated MEWG Terms of Reference. Baffinland commits to updating the marine monitoring plan (MMP) with this long-term monitoring plan, should Phase 2 be approved.	NA	This commitment will be implemented post PC approval
115	DFO 3.5 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	Baffinland will implement an incidental marine mammal monitoring program with vessel operators calling on Milne Port, which will request incidental observations of marine mammals to be recorded and relayed to Baffinland. In support of this program, Baffinland will develop educational materials for vessel crew to assist in marine mammal identification and data recording. Baffinland will provide a draft of the materials and program for review by the MEWG before they are finalized.	NA	This commitment will be implemented post PC approval
114	DFO 3.6.1 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	Project vessels are limited to releasing ballast water at one of the three anchorage locations at Milne Port, or while berthed at the ore dock. Further, prior to any ballast water discharge D-1 compliance testing must be completed. Instructions to not release ballast water prior to arrival at Milne Port and completion of ballast water testing is provided to all ship operators in Baffinland's Standing Instruction to Masters (SITM). This requirement will remain under Phase 2.	NA	This commitment will be implemented post PC approval
113	DFO 3.6.10 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	Baffinland commits to work with the MEWG and DFO to establish species-specific Rapid Response Plans. Rapid Response Plans will be developed for species identified as high risk through ongoing NIS monitoring in the receiving environment, the ROV (or any other future) biofouling monitoring program, results yielded from the 2021 biological ballast water sampling pilot program (and any ongoing ballast monitoring), examination of existing invasive species databases and lists in key ecoregions where vessels calling originate from (as per Goldsmit et al., 2020 Global Change Biology), and based on ranking of potential risk using the Canadian Marine Invasive Screening Tool.	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
109	DFO 3.6.5 NEW TC-02 NEW	DFO 3.6.5 NEW TC	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	Transport Canada appreciates the efforts by BIM to ensure current regulations are followed with respect to their plans for ballast water management. Given the learning curve associated with use of ballast water treatment systems, for Phase 2, Transport Canada (TC) in consultation with Fisheries and Oceans Canada (DFO), recommends, in conjunction with present management measures and sampling and testing protocols being proposed/adopted by BIM, that BIM implement a ballast water compliance sampling plan based on a risk-based targeting methodology to be developed in consultation with DFO and TC. This approach will be supported by additional commitments provided in response to the DFO 3.6 NEW series of recommendations related to ballast water, hull fouling and aquatic invasive species. Such a risk-based methodology should be applied to evaluate the risk of all vessel ballast water management (D1, D2) with subsequent salinity and D-2 biological compliance sampling conducted on vessels identified as high or very high risk. The respective risk-based methodology and associated ballast water compliance sampling plan will be developed in consultation with DFO and TC following completion of DFO's Project-specific sampling conducted on a subset of vessels calling to Milne Port. The risk-based methodology and associated ballast water compliance sampling plan should include a consideration of other compliance initiatives or research being undertaken elsewhere by TC relative to implementation of the D-2 standard. Sampling conducted that supports building a body of knowledge for D-2 treatment systems, beyond biological compliance sampling conducted on high risk and very high risk tanks, should not compromise Baffinland's ability to transport annual ore quantities as approved under a modified Project Certificate No 005. Understanding that the rationale for this program is tied to a learning curve associated with the use of ballast water treatment systems, the compliance sampling program and risk based methodology will be adapted as deemed necessary based on the results of the program.	NA	This commitment will be implemented post PC approval
105	DFO 3.6.9 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	Baffinland commits to follow the most recent DFO published Rapid Response Framework in the event that a non-indigenous species is introduced and/or becomes established, and will incorporate updates as recommended by DFO and the MEWG, consistent with the decision-making requirements as outlined in the forthcoming updated MEWG Terms of Reference.	NA	This commitment will be implemented post PC approval
104	DFO 3.8 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	Baffinland will provide decision criteria and decision matrix for the selection of water crossing methods for fish bearing watercourses in support of any regulatory permit applications made to DFO.	NA	This commitment will be implemented post PC approval
103	DFO 3.9.1 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	Baffinland will analyze monitoring reports related to the Tote Road existing watercourses crossings and provide comprehensive lessons learned report (for the Tote Road crossings) that would include strategic analysis of what will be done differently to ensure the fish-passage issue will be mitigated, avoided and addressed. This report will be included as part of any regulatory applications made to DFO.	NA	This commitment will be implemented post PC approval
102	DFO 3.9.2 NEW	DFO	Marine Environment	02 - February 2020 - Response to Updated Technical Comments	Baffinland will provide an updated hydrological assessment of proposed watercourses crossings that includes, but is not limited to, crossing selection and design criteria, flow rates, velocities and discharge, and fish passage. This content will be included as part of any regulatory permit applications made to DFO.	NA	This commitment will be implemented post PC approval
100	CIRNAC-05	CIRNAC	Freshwater Environment	01 - November 2019 - Public Hearing	Baffinland shall complete thermal modeling of the Waste Rock Facility and include the results in the Waste Rock Management Plan prior to the conclusion of Water Licence Amendment process, subject to NWB requirements.	NA	This issue is resolved for environmental assessment purposes and will be further addressed during water license
99	CIRNAC-07	CIRNAC	Freshwater Environment	01 - November 2019 - Public Hearing	Baffinland shall confirm the origin of elevated concentrations of aluminum, mercury and copper in Shake Flask Extraction test results for rock materials sourced from quarry and borrow pits for road / railway construction, and develop and implement an appropriate water quality monitoring and management strategy for railway corridor rock quarries as part of water licensing. The monitoring results shall be compared with the FEIS Addendum predictions and appropriate mitigation measures shall be identified and implemented.	NA	This commitment will be implemented post PC approval; CIRNAC 2 NEW aligns with response to CIRNAC-07.

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
95	DFO 3.3	DFO	Marine Environment	01 - November 2019 - Public Hearing	Baffinland will implement the following requirement for vessels serving the Mary River Project: Once advised of the presence and location of bowhead whales, Masters of project ships operating within the RSA will be instructed to exercise due caution in order to minimize the likelihood of interaction with the mammals. In such events, Masters will be authorized to adjust speed or alter course within safe and prudent navigational constraints to avoid to the extent possible interaction with bowhead whales. Baffinland notes that the surveillance measures implemented in the Gulf of St Lawrence, as referenced by DFO, are to spot right whales and implement the 10 knot speed restriction. This additional mitigation measure is not required in the RSA as a blanket 9 knot speed limit is in place for the entire season. The only mitigation measure more restrictive than the speed limit is a 15 day shut down for non-tended fixed gear fisheries. Again, this is not applicable to Mary River operations. Baffinland strongly urges DFO to consider the commitment provided above and work withBaffinland to implement it.	NA	This commitment will be implemented post PC approval
94	DFO 3.4	DFO	Marine Environment	01 - November 2019 - Public Hearing	Environmental and ecological criteria for the opening of the shipping season is described in the Shoulder Season Shipping Operational Guide. The following clarifications will be added to the Shoulder Season Shipping Operational Guide to reflect the environmental and ecological conditions for closing the shipping season. Environmental - The formation of fastice along the shipping route will trigger the end of the shipping season.· Ecological - There are no ecological triggers to close the shipping season, however, monitoring and adaptive management will be applied to ensure no significant impacts occur. Note: Seals - During the Fall Season Seals are just beginning to establish breathing holes in the ice as part of their development of an overwinter territory, but this is not considered a critical life cycle period. Seals may avoid establishing breathing holes along the shipping route during this period, but this would be limited to general area of the ship path, which is minimal in extent. Seals do not start denning until January when enough snow is available on the ice for them to build a den. Shipping would not overlap with the denning period. Narwhal- The fall shoulder season will overlap with the outmigration of narwhal throughout October and November. Aerial surveys are planned each year to confirm no entrapment events have occurred, and to inform adaptive management, should it be required.	NA	This commitment will be implemented post PC approval
93	DFO 3.5.1.	DFO	Marine Environment	01 - November 2019 - Public Hearing	During Phase 2 Operations, Baffinland commits to using the walrus haul out buffer zone guidelines set by the US Fish and Wildlife Service (USFWS) and the US Federal Aviation Administration (FAA).	NA	This commitment will be implemented post PC approval
92	DFO 3.5.2	DFO	Marine Environment	01 - November 2019 - Public Hearing	Baffinland will not break ice in closed embayment's and inlets where landfast ice exists. Should other areas of high seal density be encountered along the shipping route during the shoulder season, the ship Board Observer Program will record and report this for potential adaptive management actions. This may include notices to Masters of project ships operating within the RSA to exercise due caution in order to minimize the likelihood of interaction with the mammals. In such events, Masters will be authorized to adjust speed or alter course within safe and prudent navigational constraints to avoid to the extent possible interactions with high density seal areas. See other commitments related to the SBO Program in response to DFO 3.5.3 and 3.5.6.	NA	This commitment will be implemented post PC approval
91	DFO 3.5.3	DFO	Marine Environment	01 - November 2019 - Public Hearing	Baffinland's Ship Board Observer Program will confirm the current predictions that no seal strikes will occur as a result of project shipping. Should monitoring demonstrate that the predictions are incorrect, Baffinland will implement adaptive management measures in consultation with the MHTO and MEWG.	NA	Baffinland will not provide an updated estimate of ship strikes on seals based on a study that covers a period in time and location that are fundamentally different from what is proposed under Phase 2.
89	DFO 3.5.5	DFO	Marine Environment	01 - November 2019 - Public Hearing	Before commencing shipping, Baffinland must receive written confirmation from Pond Inlet that the floe edge is no longer being used by community members. No transits to Milne Port will be permitted until confirmation is received. Baffinland will not break ice during ringed seal denning, pupping, nursing or mating periods and will manage its vessel traffic during the Eclipse Sound narwhal summer stock spring migratory period. Furthermore, Baffinland has established several precedent-setting mitigations to minimize potential effects on ringed seal as a result of ice breaking activities, including: • Restricting the number of transits during the early shoulder season where ice concentrations above 3/10 cannot be avoided. Implementation of speed restrictions (9 knots) that are more conservative than Government of Canada guidelines for speed reduction to 10 knots. • Local Inuit Marine Wildlife Observers (MWOs) will be stationed on all icebreaker transits in the RSA and are responsible for alerting vessel Master and crew to observed potential risk of ship strikes on pinnipeds and other marine mammals, or record other signs of disturbance to marine wildlife. • Implementation of a 40-km buffer zone around the floe edge at the entrance of the RSA to reduce interactions between Project vessels and marine mammals (vessels entering the RSA during the spring shoulder season must wait 40 km to the east of the RSA until clearance from the Port Captain is obtained to enter the RSA).	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
88	DFO 3.5.6	DFO	Marine Environment	01 - November 2019 - Public Hearing	Baffinland will updated the Marine Monitoring Program to make it clear what behavioral indicators are recorded during the Ship Board Observer Program. These indicators include breaching, flipper slapping, lob tailing, diving, fluking, blowing, resting, looking, feeding, hauled-out, milling, swimming, surfacing. Other recorded information includes initial distance from vessel, minimum distance from vessel (i.e. closest point of approach), and bearing from vessel and movement direction. These methods and indicators are currently described in annual Ship Board Observer Reports.	NA	This commitment will be implemented post PC approval
87	DFO 3.6.2 DFO 3.6.6	DFO	Marine Environment	01 - November 2019 - Public Hearing	Baffinland is committed to undertaking an end-of-season aerial survey of the LSA for each year shoulder season shipping occurs, to confirm no narwhal entrapment events have occurred. Baffinland will work directly with the Mittimatilik HTO in implementation of this survey. Background Mitigation measures are limited, Baffinland has proposed having an icebreaker re-enter the RSA to create an exit pathway, assuming it is safe to do so. it is uncertain if this is a desirable action from the communities perspective. There is also an issue of identifying a natural event from a project affected one. Baffinland suggests the MEWG is an appropriate forum to investigate such an event occurs in the future, and development adaptive mitigation measures, should they be necessary. Baffinland's commitment to annual aerial surveys is for the life of the project.	NA	This commitment will be implemented post PC approval
86	DFO 3.7.2	DFO	Marine Environment	01 - November 2019 - Public Hearing	Empirical data on ship noise levels have now been collected as part of JASCO's passive acoustic monitoring program for the Project. These data have been analyzed to calculate LRR for these additional areas in the RSA (Eclipse Sound, North Milne Inlet, Koluktoo Bay). Calculations of LRR associated with ship transits at these representative locations will be presented in a 'technical memorandum' or 'technical response', scheduled for delivery to DFO on February 17, 2020. The technical memorandum will include an analysis to estimate the LRR estimations for Phase 2 shipping operations based on the empirical results calculated for 2018 and 2019 shipping operations.	NA	This commitment will be implemented post PC approval
84	DFO 3.8.4	DFO	Marine Environment	01 - November 2019 - Public Hearing	Baffinland will continue to undertake acoustic monitoring supportive of its operations in accordance with terms and conditions of the existing Project Certificate No. 005.	NA	This commitment will be implemented post PC approval
81	DFO-3.12	DFO	Freshwater Environment	01 - November 2019 - Public Hearing	Baffinland will include the requested information in the application for the Fisheries Act Authorization.	NA	This commitment will be implemented post PC approval
80	DFO-3.13.1	DFO	Freshwater Environment	01 - November 2019 - Public Hearing	Baffinland will include the requested information in the application for the Fisheries Act Authorization.	NA	This commitment will be implemented post PC approval
79	DFO-3.13.2	DFO	Freshwater Environment	01 - November 2019 - Public Hearing	Baffinland will include the requested information in the application for the Fisheries Act Authorization.	NA	This commitment will be implemented post PC approval
78	DFO-3.14.1	DFO	Freshwater Environment	01 - November 2019 - Public Hearing	Baffinland will include the requested information in the application for the Fisheries Act Authorization.	NA	This commitment will be implemented post PC approval
77	DFO-3.14.2	DFO	Freshwater Environment	01 - November 2019 - Public Hearing	Baffinland will include the requested information in the application for the Fisheries Act Authorization.	NA	This commitment will be implemented post PC approval
76	DFO-3.14.3	DFO	Freshwater Environment	01 - November 2019 - Public Hearing	Baffinland will include the requested information in the application for the Fisheries Act Authorization.	NA	This commitment will be implemented post PC approval
75	ECCC-FC1 ~~HC-FC-02~~	ECCC	Atmospheric Environment	01 - November 2019 - Public Hearing	Final language to be developed with BIMC. Proposed by BIM:Baffinland will provide all quality assured measured air quality and meteorological data in an annual report and compare to applicable criteria as outlined in the revised Air Quality and Noise Abatement Plan (AQNAMP) for the project. The annual report will include all raw data, averages in graphical and tabular form as most relevant to the data set, comparison to relevant criteria and visual presentation including wind roses and comparisons to previous year's data. In relation to photography, if major dusting events are observed, they will be photographed and included in the annual report. Also, the available satellite imagery will be reviewed and included if considered relevant. The use of satellite imagery will be evaluated on an ongoing basis to confirm whether it adds value or provides any relevant context to the dust fall evaluations. As the revised AQNAMP will be updated to detail these reporting requirements specifically, additional requirements in the Terms and Conditions of the Project are not deemed necessary. As per recent discussions, the 2020 CAAQS would be used for comparison purposes only with the objective to "keep clean areas clean" with respect to ambient air quality while the Project Standards are based on Nunavut Standards where available, or otherwise the most stringent available from a Provincial or other Territorial Government.Appendix G includes memos describing dustfall management action triggers for the protection of human health and vegetation.Baffinland will reflect the commitment to annual reporting in the final AQNAMP for the Phase 2 Proposal and subsequently does not believe a new Term and Condition is required.	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
74	ECCC-FC2	ECCC	Atmospheric Environment	01 - November 2019 - Public Hearing	Baffinland commits to investigate and implement NOX reductions measures, where feasible, and report on this in the 2021 annual air quality report (to be submitted by March 31, 2022).	NA	This commitment will be implemented post PC approval Note that reference to implementation in 2021 and/or 2022 was made prior to regulatory delays; implementation should occur in first year following approval.
73	ECCC-FC3 ~~HC-FC-02~~	ECCC	Atmospheric Environment	01 - November 2019 - Public Hearing	Final language to be developed with BIMC. Proposed by BIM: Baffinland is committed to updating the AQNAMP in consultation with ECCC and other interested interveners and has undertaken a number of discussions in relation to this commitment. The revised AQNAMP will include the following (which is consistent with ECCC's recommendations): • Monitor PM2.5 and TSP using continuous monitors at:o The sites that already monitor NO^2 and SO^2 at both Milne Port and the Mine Site.o Seasonally at at least one new location on or close to the Project Boundary at both the Milne Port and Mine Site considering prevailing wind direction during the peak dust season and locations of sensitive receptors (camp locations). These will be seasonal as permanent power is not available near the boundaries thus the systems will run on solar power as feasible during the summer. The revised AQNAMP will also include the following recommended items: • Presentation of the predicted concentrations in the AQNAMP as a range of absolute concentrations.• Investigation of ways to mitigate the emissions from the stockpiles as warranted. • Include management actions for the stockpiles in Section 4 of the AQNAMP as well as Table 5-2, and Table 5-3. • Define the management action trigger levels for both the 24-hour and annual averaging periods for all species (Table 5-1, Table 5-2, and Table 5-3). • Define the frequency at which air quality and meteorological data is reviewed that allows for timely response for implementation of corrective actions in response to exceedances of triggers. • Include details on how the air quality data and meteorological data will be analyzed together during the investigation of exceedance of trigger levels and necessary management actions. • Confirm the trigger levels for dustfall and include corrective actions associated with collected dustfall data. • Include 24-hour and annual Total Suspended Particulate data in the dustfall management action trigger levels and describe how it will be used as a tool for determining potential causes of elevated dustfall. • Include the wind roses from onsite meteorological stations, maps showing where these potential monitoring stations are located, discussion on the rational for the site locations, and discussion on how emissions from the stockpiles would be captured by these monitoring stations.The recommendations outlined above will be captured in a management plan update register, which Baffinland will use to track changes and additions to management plans committed to during the final review of the Phase 2 Proposal. Baffinland suggests that this register, submitted to the Board on the record before the close of the Public Hearing, is a more appropriate means of ensuring the requested updates to the AQNAMP are made, that an amendment to an existing Term and Condition.	NA	This commitment will be implemented post PC approval
70	ECCC-FC6 WWF-FWS 06	ECCC	Marine Environment	01 - November 2019 - Public Hearing	Baffinland commits to conduct additional Arctic diesel fuel spill modelling to account for shoulder season shipping and update the SSRP as necessary (Appendix G). This will occur prior to the 2021 shipping season.	NA	Note that reference to implementation in 2021 and/or 2022 was made prior to regulatory delays; implementation should occur in first year following approval.
69	GN-01	GN	Corporate Environment	01 - November 2019 - Public Hearing	Baffinland is no longer pursuing trucking of iron ore in excess of 6Mtpa during the Phase 2 construction period. This commitment will require modification.	NA	

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
68	GN-02WWF-FWS 07 MHTO-03	GN	Terrestrial Environment	01 - November 2019 - Public Hearing	Baffinland is committed to work with the GN to develop a mutually agreed upon research agreement (also referred to as the Research and Relationship Agreement) that includes the following aspects, which are based on GN's internal budgeting and community consultation schedules for its North Baffin Regional Monitoring Program: • By July 30 of each year, the GN to share a preliminary proposal with Baffinland (the "GN Preliminary Proposal") outlining the planned activities that may be carried out as part of its North Baffin Regional Monitoring Program for the twelve-month period commencing on January 1 of the following year, which would be subject to any future revisions arising as a result of consultation by the GN with communities and the Qikiqtani Inuit Association. • By October 1 of each year, the GN to share a final proposal with Baffinland (the "GN Final Proposal") based on the GN Preliminary Proposal and including any revisions as a result of consultation. • Baffinland would provide its total annual financial contribution to GN on or before November 30 of each year following review and acceptance by Baffinland of a GN Final Proposal. The financial contribution could include monetary and/or in-kind support. • Collaboration as possible regarding scientific peer-reviewed research into mitigative measures or potential disturbance effects, as related to the Mary River Project. • GN will provide Baffinland with reports on work carried out under its North Baffin Regional Monitoring Program. • GN-generated data needed to support Baffinland's assessment, monitoring and mitigation programs for the Mary River Project (which would remain Baffinland's sole responsibility) will be released upon request by GN to Baffinland, in accordance with the terms and conditions of theResearch and Relationship Agreement.	NA	Baffinland and the Government of Nunavut commit to complete a caribou research agreement and data sharing agreement prior to the Public Hearing for Phase 2. Should this not be possible, an Agreement in Principle will be developed to identify a timeline for the anticipated completion of both agreements. The caribou research agreement is currently with BIM for review.
67	GN-03	GN	Terrestrial Environment	01 - November 2019 - Public Hearing	Baffinland commits to build the North Railway with the general specifications for the purposes of increasing caribou permeability Use of Type 8 over Type 12 fill material for the entire alignment For embankment heights under 4 meters the slope ratio will be 1V:2H; for embankment heights over 4 meters the slope ratio will remain 1V:1.5H Baffinland commits to a pilot program that will investigate the effectiveness of gentler slopes on caribou crossing. To evaluate this pilot program, Baffinland will support regional studies of caribou movements to assess caribou responses to the railway. The assessment of this pilot program's success shall be based on results from studies that have statistical power to detect Project effects exceeding those predicted in the FEIS addendum. The details of this program include: • The gentler slopes will be built with a slope ratio of 1V:3H • The total amount of fill required to build the North Railway will remain unchanged from currently proposed i.e. the fill material required to build sections with a slope of 1:3 will be acquired by reverting other areas previously allocated a 1V:2H slope (at an embankment height of 4m and below) back to a 1V:1.5H slope • The pilot program will include a minimum of 10km of 1V:3H slopes • Members of the Terrestrial Environment Working Group will be required to identify and agree on the areas to build the gentler (1V:3H) slopes, and where to revert back to the steeper (1V:1.5H) slopes • The pilot program shall not prevent fish passage or cause serious harm to fish. • This program will be implemented prior to and during the North Railway's construction. • This program will not preclude Baffinland's implementation of its Additional Level Crossing Decision Matrix.	NA	This commitment will be implemented post PC approval
66	GN-04	GN	Terrestrial Environment	01 - November 2019 - Public Hearing	Baffinland will update the Additional Level Crossing Construction Decision Matrix to include advice from the Terrestrial Environment Working Group (TEWG).	NA	This commitment will be implemented post PC approval
65	GN-05	GN	Terrestrial Environment	01 - November 2019 - Public Hearing	Suggested Modified Commitment 65. BIMC will update the Terrestrial Environment Mitigation and Monitoring Plan to reflect that it will undertake research to estimate the Zone(s)-of-Influence (ZOI) and disturbance coefficients (DC) exerted by the Project on caribou, and shall provide to NIRB updated estimates of cumulative habitat losses for caribou, at least every 5 years. This research will take into account differences in caribou behaviour at lower and higher population levels in a manner that allows for equal consideration of IQ and science.	NA	This commitment will be implemented post PC approval
64	GN-06	GN	Socio-economic Environment	01 - November 2019 - Public Hearing	1. The Proponent shall work with the GN through their MOU to promote greater female employment at the Mary River Project, with the goals of a) employing and retaining more women with the Project including in more senior level positions, and b) attracting more women into the mining industry more generally. 2. The Proponent will assess the ongoing implementation of current and proposed gender-specific initiatives, including their successes and challenges, in conjunction with monitoring female employment rates at the Project through its Socio-Economic Monitoring Plan. The Proponent will report to the QSEMC and SEMWG, as appropriate, on the effectiveness of these gender-specific initiatives.	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
63	GN-07	GN	Socio-economic Environment	01 - November 2019 - Public Hearing	1. The Proponent will update its Workplace Harassment Policy and Workplace Harassment and Violence Program and include a component on sexual harassment that addresses the unique nature of sexual harassment in the workplace and supports the specific needs of sexual harassment victims. The Government of Nunavut will be engaged in this process. This update will occur within 6 months of amended Project Certificate issuance. 2. The Proponent will update its employee orientation program to reflect the revisions in the Workplace Harassment and Violence Program, including components related to sexual harassment in the workplace and bystander intervention. This update will occur within 6 months of amended Project Certificate issuance. 3. The Proponent will work with the GN to establish a sub-committee through their MOU to review implementation of Company policies and initiatives regarding sexual harassment in the workplace, subject to all applicable privacy laws, and to explore potential new ways to address this issue at the Mary River Project. The proponent and GN will move forward on this issue through the MOU within 6 months of issuance of the Project Certificate. Baffinland Human Resource Staff will be available to specifically address this topic through the MOU subcommittee as and when required.	NA	This commitment will be implemented post PC approval
62	GN-08	GN	Socio-economic Environment	01 - November 2019 - Public Hearing	1. The Proponent shall work with the GN through their MOU to promote employment opportunities with the Mary River Project across all Qikiqtani communities, consistent with relevant provisions of the Mary River Inuit Impact and Benefit Agreement. Initiatives may include training opportunities in non-point of hire communities, posting employment and training opportunities in all Qikiqtani communities, communicating with unsuccessful job applicants, and continuing to provide travel for all Inuit Baffinland employees from across the Qikiqtani Region to a point of hire community.	NA	This commitment will be implemented post PC approval
61	GN-09	GN	Socio-economic Environment	01 - November 2019 - Public Hearing	1. Baffinland will submit to NIRB a Safety Protocol and a Communications Plan prior to construction of the North Railway or within 18 months of issuance of the Project Certificate; and a Safety Protocol and a Communications Plan prior to operation of the North Railway. The protocols and plans will include: i. Safety Protocol and Communications Plan – prior to railway construction or within 18 months of Project Certificate issuance: a. Complete a risk register prior to construction b. Address safety issues related to both the road and rail, during the construction period c. Be implemented by the Company, its contractors, and non-Project land users d. Integrate Baffinland's existing Hunter and Visitor Site Access Procedure e. Communicate to land users the rules and procedures for using the Tote Road and other project roads, visiting the project site, and the risks associated with the road and the North Railway during the construction period f. Include Rules of the Road, such as speed limits, signs on the road, right of way protocols, safety restrictions regarding the discharge of firearms in proximity to the road and rail construction areas, etc. g. Identify potential hazards on the road such as mine traffic, snow drifts, steep hills, sharp corners, construction areas, and washouts h. Identify the location of safety features such as rail crossings, emergency shelters and safe access routes to the Mine Site and Milne Port i. Identify the location of safety features such as emergency shelters and safe access routes to the Mine Site and Milne Port, and construction shelters and accommodations j. Be developed in consultation with the North Baffin Communities, with a particular focus on the Communities of Pond Inlet and Igloolik k. Identify the means and frequency of communicating the safety protocol, and to whom the information will be communicated ii. Safety Protocol and Communications Plan – prior to railway operation a. Complete a risk register prior to operation b. Address safety issues related to both the road and rail, during operations c. Be implemented by the Company, its contractors, and non-Project land users d. Integrate Baffinland's existing Hunter and Visitor Site Access Procedure e. Communicate to land users the rules and procedures for using the Tote Road and other project roads, crossing the North Railway, visiting the project site, and the risks associated with the road and the North Railway f. Include Rules of the Road, such as speed limits, signs on the road, right of way protocols, safety restrictions regarding the discharge of firearms in proximity to the road and rail g. Identify potential hazards on the road such as mine traffic, snow drifts, steep hills, sharp corners, and washouts h. Identify potential hazards with the rail line such as train traffic, sharp corners, loading and unloading areas i. Identify the location of safety features such as rail crossings, emergency shelters and safe access routes to the Mine Site and Milne Port j. Identify the location of safety features such as emergency shelters and safe access routes to the Mine Site and Milne Port, and construction shelters and accommodations k. Be developed in consultation with the North Baffin Communities, with a particular focus on the Communities of Pond Inlet and Igloolik l. Identify the means and frequency of communicating the safety protocol, and to whom the information will be communicated	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
					m. Describe how the Operation Lifesaver program will be implemented, including information on when it may be offered, to whom, and how often.		
60	HC-FC-01	HC	Socio-economic Environment	01 - November 2019 - Public Hearing	Baffinland commits to investigate and implement NOX reductions measures, where feasible, and report on this in the 2021 annual air quality report (to be submitted by March 31, 2021).	NA	Note that reference to implementation in 2021 and/or 2022 was made prior to regulatory delays; implementation should occur in first year following approval.
59	HC-FC-02	HC	Socio-economic Environment	01 - November 2019 - Public Hearing	Baffinland will reflect the commitments provided in its response in the Air Quality and Noise Abatement Management Plan following the issuance of an amended Project Certificate. In the interim these commitments will be captured in a commitment register, to be provided to the Board during the Public Hearings. Baffinland does not object to having relevant terms and conditions modified to reflect this commitment. Baffinland commits to: • Submit all air quality and meteorological monitoring data as part of the annual reports and compare the monitoring data to the Canadian Ambient Air Quality Standards, where applicable. • Include any photos taken of dust on snow in the annual reports • Present the predicted concentrations in the annual reports as a range of absolute concentrations Baffinland will: • Complete the Air Quality and Noise Abatement Management Plan in consultation with HC and other interested interveners. • Monitor PM2.5 and Total Suspended Particulates using continuous monitors at both Milne Port and the Mine site where monitoring already : • he sites that already monitor NO2 and SO2 at both Milne Port and the Mine Site. • New locations on or close to the Project Boundary at both the Milne Port and Mine Site. • Update Air Quality and Noise Abatement Management Plan with the proposed changes. Baffinland will update the Air Quality and Noise Abatement Management Plan with the following text: "Use the existing continuous air quality monitors on site to validate the predictions of NO2 and other air quality contaminants in the EIS moving forward. Share results through reporting mechanisms, such as the annual report. Should exceedances occur beyond the EIS predictions, include an updated human health risk assessment in the annual report."	NA	This commitment will be implemented post PC approval
58	HC-FC-03	HC	Socio-economic Environment	01 - November 2019 - Public Hearing	Baffinland will continue with monitoring of COPCs reported in the country foods risk assessment during all phases (including closure). If increases in a specific COPC are confirmed to be occurring outside or inside (in the closure phase) of the Potential Development Area (PDA) and if country foods could be influenced by those changes, Baffinland will update the human health risk assessment model with the new data. Decisions related to extending the monitoring program to any relevant country foods would be made based on consideration of risk assessment outcomes. Updated modelling would be triggered by changes from any of the monitoring stations where harvesting could occur. Any remodeling effort should also consider changes (or lack thereof) using a distance gradient approach from the edge of PDA: Near (0–100 m); Far (101 –1,000 m); and Control (>1,000 m) and more ecologically relevant distant stations (i.e., those stations located between 100 m and 1,000 m from the PDA boundary). Consideration of change at PDA (closure phase), near sites (0 – 100m) and far sites (100 – 1,000 m), relative to baseline data, and environmental quality guidelines, in conjunction with statistical analyses, would be used to identify the need for supplementary risk assessment modelling.	NA	This commitment will be implemented post PC approval
57	HPI	HPI	Socio-economic Environment	01 - November 2019 - Public Hearing	Baffinland will undertake to encourage students and youth to consider possible careers with Baffinland.	NA	Implementation is ongoing, completion not required for environmental assessment purposes
56	HPI	HPI	Socio-economic Environment	01 - November 2019 - Public Hearing	Baffinland will undertake to promote access to employment for Inuit women. Following the Technical Meeting held in Iqaluit April 8-10, 2019, Baffinland committed to working with the GN through the implementation of the MOU to promote female employment at Mary River.	NA	Implementation is ongoing, completion not required for environmental assessment purposes
55	HPI	HPI	Socio-economic Environment	01 - November 2019 - Public Hearing	As part of Baffinland's early engagement in the planning stages for the Phase 2 Project, Mittimatalik raised concerns with respect to year round icebreaking resulting in Baffinland's commitment not to ship in land fast ice	NA	Implementation is ongoing, completion not required for environmental assessment purposes

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
53	HPI	HPI	Socio-economic Environment	01 - November 2019 - Public Hearing	Baffinland remains committed to ongoing engagement with Mittimatalik throughout the Project's lifetime. As noted in Baffinland's new IQ Management Framework (Baffinland, 2019a), the Company is in the process of developing community-specific consultation guidelines for the North Baffin communities; these will be developed in consultation with individual communities in the near future. As the guidelines are developed, they will be appended to Baffinland's Community and Stakeholder Engagement Plan (TSD-28, Appendix Z).	NA	Implementation is ongoing, completion not required for environmental assessment purposes
51	HPI-1	HPI	Socio-economic Environment	01 - November 2019 - Public Hearing	Baffinland will conduct a review of internal procedures related to the conduct of community- focused research and identify areas for potential improvement. Baffinland will update its IQ Management Framework with information on research ethics and will provide clear direction on the procedures to be followed when applying for, securing, renewing, and reporting on research licensing. Baffinland will continue to engage the Nunavut Research Institute (NRI) in this process and will additionally provide NRI with annual IQ work plans for review and comment.	NA	This commitment will be implemented post PC approval
50	HPI-10	HPI	Socio-economic Environment	01 - November 2019 - Public Hearing	Baffinland is committed to using best efforts to improve its Inuit employment record each year, whether the MIEG has been met or not.	NA	Implementation is ongoing, completion not required for environmental assessment purposes
48	MHTO-2a	MHTO	Terrestrial Environment	01 - November 2019 - Public Hearing	Baffinland will undertake geotechnical drilling to further establish technical feasibility for Route 3, but at this time based on a preliminary review Baffinland does not anticipate that such drilling will reveal any fundamental issues with the route. This work will be carried out prior to construction.	NA	Baffinland has selected Route 3 as its preferred deviation alignment. There are no Post PC Amendment conditions required to finalize selection, including the results of geotechnical drilling.
47	MHTO-2b	MHTO	Socio-economic Environment	01 - November 2019 - Public Hearing	Baffinland has committed to the development of Community-specific engagement guidelines. Baffinland believes that the development and implementation of these guidelines will serve to improve the two-way dialogue between the Company and Inuit. These guidelines will be developed in consultation with the MHTO, as well as North Baffin community representatives. As the guidelines are developed, they will be appended to Baffinland's Community and Stakeholder Engagement Plan.	NA	This commitment will be implemented post PC approval
46	MHTO-3	MHTO	Terrestrial Environment	01 - November 2019 - Public Hearing	Baffinland is committed to continual improvement of its terrestrial monitoring program design, data analysis, and integration of Inuit perspectives and IQ.	NA	Implementation is ongoing, completion not required for environmental assessment purposes
45	MHTO-4a	MHTO	Marine Environment	01 - November 2019 - Public Hearing	Baffinland confirms it is committed to consultation with the MHTO regarding shipping plans.	NA	Implementation is ongoing, completion not required for environmental assessment purposes
43	MHTO-5e	MHTO	Marine Environment	01 - November 2019 - Public Hearing	Baffinland commits to continue to evaluate the feasibility of the development of a laboratory in Pond Inlet, in consultation with MHTO.	NA	This commitment will be implemented post PC approval See also DFO-3.10.3, QIA-44 (re pilot ballast water biological monitoring program)
42	MHTO-6	MHTO	Socio-economic Environment	01 - November 2019 - Public Hearing	With the discontinuation of ore haulage under Phase 2, it is possible for Baffinland to develop a policy that ensures the safety of all land users to travel the Tote Road with recreational vehicles, and that of Baffinland employees. Baffinland will look to engage the MHTO in the development of this policy, as well as the timeline for its implementation.	NA	This commitment will be implemented post PC approval
41	MHTO-7a	MHTO	Socio-economic Environment	01 - November 2019 - Public Hearing	Baffinland is committed to incorporating Inuit knowledge into its identification of indicators and development of thresholds. One example where this is currently being done is at the MEWG, which the MHTO is a member of, which is currently working on the development of early warning indicators for marine mammals.	NA	This commitment will be implemented post PC approval
40	NRCan-01	NRCan	Terrestrial Environment	01 - November 2019 - Public Hearing	Baffinland commits to: • Conducting the summer 2019 mapping program in areas where the railway corridor deviates from the Tote Road, including along the Route 1 deviation alignment. This summer mapping program was completed in summer 2019. • Conducting the winter 2019/2020 drilling program along the deviation route, following the proposed Route 3 deviation alignment, and near the port terminus to obtain additional information on subsurface conditions to inform the final design. • Conducting a pre-drilling program, to be completed by the railway contractor and supervised by BIM's Engineer during the construction period. Boreholes will be advanced into permafrost along the rail alignment prior to the railway earthworks. Boreholes will be used to delineate zones of ice-rich and ice-pore permafrost and to determine the required permafrost treatment prior to making cuts and placing fill for the embankments. • Installing thermistors and other monitoring instruments along the rail alignment including along the Route 3 deviation during the pre-drilling programs to establish baseline conditions prior and during rail construction.	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
39	NRCan-02	NRCan	Terrestrial Environment	01 - November 2019 - Public Hearing	Baffinland commits to:· Implementing the recommendations to accommodate the 30-year design life provided in the project memorandum 'Analysis of Proposed Rail Line Cut Sections and Port Area Structures Considering a Mine Life of 30 Years' (Hatch, 2019) including those related to pile length embedment and number of piles required for foundations.· Continue to refine the thermal, stability and creep analysis incorporating new data collected during geotechnical investigations and from instrumentation along the railway corridor, along the Route 3 deviation alignment as well the rail alignments outside the rail deviation, to support final design of embankments and bridges.· Consider local factors (such as snow accumulation and presence of water bodies) in the 2D thermal modelling to support final design of embankments, cuts and bridges.· Establish instrumentation along the rail alignment, including along the Route 3 deviation alignment, prior to and during construction to improve characterization of baseline ground conditions, support final design, evaluate impacts due to construction and railway performance, and to inform the implementation of mitigation /maintenance measures when triggers are reached.	NA	This commitment will be implemented post PC approval
38	PCA-02	PCA	Marine Environment	01 - November 2019 - Public Hearing	Baffinland commits to amend the Terms of Reference for the MEWG in collaboration with MEWG Members.	NA	This commitment will be implemented post PC approval Resolution is pending resolution of outstanding DFO issues
37	PCA-04c	PCA	Marine Environment	01 - November 2019 - Public Hearing	Should Phase 2 be approved, Baffinland will continue to engage DFO and Parks Canada through the MEWG for the purposes of ensuring our proposed mitigation and monitoring programs are robust, effective, and responsive.	NA	This commitment will be implemented post PC approval Resolution is pending resolution of outstanding DFO issues
36	QIA-01	QIA	Terrestrial Environment	01 - November 2019 - Public Hearing	Baffinland commits to support a harvester's survey as described by QIA in QIA-01, however, such a study must be led by harvesters, not Baffinland.	NA	This commitment will be implemented post PC approval; BIM and QIA to determine integration with Inuit Stewardship Plan
33	QIA-02	QIA	Terrestrial Environment	01 - November 2019 - Public Hearing	Based on input provided during the Crossing Selection Workshop from HTO participants representing Pond Inlet, Igloolik, as well as QIA and GN, the following modifications have been proposed for the design of the North Railway to aid in caribou crossing: • 30 level crossings to be installed at locations identified by community representatives during the workshop (subject to Transport Canada and Community Acceptance). • A smoother fill material (Type 8 - 6 inches or less in size) will be used along the entire railway embankment (change from Type 12 - 24 inches or less). • A gentler slope (1:2 ratio) will be used for all portions of the railway embankment between 2 and 4 meters (change from 1:1.5). • A gentler slope will be created at the edges of crossings to assure approach from any angle is safe. • 4 additional plate arch culverts will be installed in areas where the railway embankment is high enough to allow an underpass (10 plate arch culverts were already proposed at fish bearing water crossings, which may also serve to allow passage for terrestrial wildlife throughout the year).	NA	This commitment will be implemented post PC approval
32	QIA-02	QIA	Terrestrial Environment	01 - November 2019 - Public Hearing	Baffinland commits to the following mitigation measures with respect to the operation of the railway to reduce interference with caribou: • Temporary speed restrictions may be implemented in areas where caribou have been observed over the previous 24hrs. • Permanent speed restrictions of 30km/hr will be applied to sections with steep hills for train safety. • If large groups of migratory caribou are moving through the area, rail operations will be temporarily suspended to allow caribou to cross the rail line. • In white out conditions, train crews will be required to travel at a speed suitable to stop before hitting an object based on sight distance, i.e. if you can see 50m ahead you need to be able to stop in 25m.	NA	This commitment will be implemented post PC approval
30	QIA-04	QIA	Marine Environment	01 - November 2019 - Public Hearing	Baffinland commits to developing a ringed seal monitoring plan that incorporates Inuit perspectives into the design, planning and implementation phases.	NA	This commitment will be implemented post PC approval
26	QIA-22	QIA	Corporate Environment	01 - November 2019 - Public Hearing	Unless otherwise approved by the NIRB, the average number of ore haul truck transits along the Milne Inlet Tote Road should not exceed 280 for the duration of the Phase 2 construction period.	NA	This commitment will be implemented post PC approval
25	QIA-24 QIA-26	QIA	Corporate Environment	01 - November 2019 - Public Hearing	The final monitoring plan for the operations phase of the railway will be finalized following completion of the construction monitoring phase, when data collected has been analyzed and final recommendations can be provided. Adaptive management will be incorporated into the rail geotechnical monitoring program, to the extent practical.	NA	This commitment will be implemented post PC approval
24	QIA-31	QIA	Corporate Environment	01 - November 2019 - Public Hearing	Regarding the North Railway, Baffinland is committed to providing a construction plan that indicates specific monitoring locations and site-specific conditions that would lead to additional monitoring locations, and what construction monitoring results would trigger additional monitoring during operations which will be provided through the water licensing and Commercial Lease. These monitoring programs are currently being incorporated into an update to the Surface Water and Aquatic Ecosystems Management Plan that will be provided to the Nunavut Water Board in advance of the NWB technical meeting on November 12-13, 2019.	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
23	QIA-33 QIA-34 QIA-35 QIA-36	QIA	Socio-economic Environment	01 - November 2019 - Public Hearing	Baffinland will work with QIA to develop an updated Inuit Training Plan that covers the period between Phase 2 construction and the first three years of operations. This plan will provide updates on programs that will be offered and how Baffinland intends to maximize Inuit engagement with the Project. This updated plan will be developed within six months of issuance of the amended Project Certificate.	NA	This commitment will be implemented post PC approval
22	QIA-37 QIA-39	QIA	Socio-economic Environment	01 - November 2019 - Public Hearing	Baffinland commits to continue to work with QIA to mitigate negative impacts and enhance positive Project opportunities and benefits through the Mary River IIBA.	NA	This commitment will be implemented post PC approval
20	QIA-41	QIA	Freshwater Environment	01 - November 2019 - Public Hearing	The Tote Road Monitoring Program will be expanded to include the future railway development, both in proximity to the existing Tote Road Monitoring Program locations and along the rail route deviation from the Tote Road. Baffinland has committed to long-term monitoring of water quality within the Northern Transportation Corridor with the Tote Road Monitoring Program to assess the potential for project-related effects on water quality. Until monitoring of water quality indicates the potential for the Project to have an effect on water quality, the expansion of monitoring to include sediment quality and biota in Phillips Creek is not necessary. Should impacts to Arctic char populations be identified through the AEMP studies, the source of these effects will be evaluated though review of all potential variables including sedimentation. ~~Baffinland will continue to utilize the 1mm threshold for sedimentation effects.~~	NA	This commitment will be implemented post PC approval
19	QIA-42	QIA	Freshwater Environment	01 - November 2019 - Public Hearing	Baffinland has committed to continue to address existing fish passage issues on the Tote Road, and to address fish passage issues on the railway during the design phase, with verification monitoring post-construction. Baffinland will evaluate fish passage along the alternative rail line but this may not be done before the November NWB technical meetings. This is mainly an issue for the Fisheries Act authorization.	NA	This commitment will be implemented post PC approval
18	QIA-43	QIA	Terrestrial Environment	01 - November 2019 - Public Hearing	Baffinland has committed to conducting a desktop review of available data to evaluate the hydrological, geomorphological and sediment transport regime at the Project site.	NA	This commitment will be implemented post PC approval
16	QIA-46	QIA	Marine Environment	01 - November 2019 - Public Hearing	Baffinland will continue to work with members of the MEWG on the selection of appropriate Early Warning Indicators (EWIs) for noise impacts on marine mammals, for implementation prior to the start of Phase 2 shipping.	NA	Implementation is ongoing, completion not required for environmental assessment purposes
15	QIA-47	QIA	Marine Environment	01 - November 2019 - Public Hearing	Baffinland provided a detailed Draft Communication Protocol as part of the Phase 2 submission. The communication protocol is considered a live document, and will be updated on an annual basis, as needed, based on feedback about the effectiveness of the communication system received by MHTO during annual pre- and end-of-season shipping meetings. Additional communication tools or frequencies may also be adjusted ad hoc throughout the shipping season to address real-time concerns, which would again be captured in annual updates to the protocol as needed.	NA	Implementation is ongoing, completion not required for environmental assessment purposes
14	QIA-48, TC-04	QIA	Marine Environment	01 - November 2019 - Public Hearing	Baffinland will ensure there is a consistent description of ice conditions amongst its relevant management plans and standards of practice and that these terms are translated to Inuktitut for use more generally. Baffinland commits to providing dates and information on the conditions under which the shipping season was opened and closed each season in its Annual Report to NIRB.	NA	Implementation is ongoing, completion not required for environmental assessment purposes
13	QIA-50	QIA	Marine Environment	01 - November 2019 - Public Hearing	Baffinland formally commits to not having vessels go into the North Water Polynya (Pikialasorsuaq), subject to vessel safety. This commitment will be recognized in the Shipping and Marine Wildlife Management Plan and the Standing Instructions to Masters.	NA	This commitment will be implemented post PC approval
12	QIA-53	QIA	Marine Environment	01 - November 2019 - Public Hearing	BIM does recognize that there may be interactions between its vessels and other activity outside the RSA and agrees to participate as a key stakeholder in regional federal government initiatives and programs including federal initiatives aimed at evaluating regional cumulative effects in the Eastern Canadian Arctic.	NA	This commitment will be implemented post PC approval
11	TC-01	TC	Corporate Environment	01 - November 2019 - Public Hearing	Baffinland will contact Transport Canada's NPP Office prior to the submittal of any information to confirm regulatory requirements under the CNWA, should the project be approved to proceed.	NA	This commitment will be implemented post PC approval
9	TC-04	TC	Corporate Environment	01 - November 2019 - Public Hearing	For the purposes of shoulder season vessel traffic management, Baffinland considers uninterrupted transits through ice concentrations of 3/10 or less as the open water shipping season. This will be considered in any relevant management plans or operating procedures.	NA	This commitment will be implemented post PC approval
8	TC-05	TC	Marine Environment	01 - November 2019 - Public Hearing	Baffinland will make the recommended change from TC-05 to the Spill at Sea Response Plan (SSRP).	NA	This commitment will be implemented post PC approval
7	TC-06	TC	Marine Environment	01 - November 2019 - Public Hearing	Baffinland will update the SSRP to designate additional Tier 2 response equipment at Milne Port to enable a dual response as proposed by Transport Canada.	NA	This commitment will be implemented post PC approval
6	TC-07	TC	Marine Environment	01 - November 2019 - Public Hearing	Baffinland agrees that the use of lifeboats should be avoided and will be removed as part of the spill response equipment on pages 88 and 103 of the SSRP.	NA	This commitment will be implemented post PC approval

APPENDIX C: FINAL TABLE OF POST PHASE 2 APPROVAL/REGULATORY PHASE COMMITMENTS

ID#	FWS ID#	Intervener	Topic	Review Phase	Commitment	Current Status	Notes
5	TC-08	TC	Marine Environment	01 - November 2019 - Public Hearing	Baffinland will update the SSRP to make it clear no oil discharge is permitted in Arctic waters per the ASSPPR.	NA	This commitment will be implemented post PC approval
4	WWF-FWS 01	WWF	Marine Environment	01 - November 2019 - Public Hearing	Baffinland is committed to the development of Early Warning Indicators but must reiterate this is not a conventional undertaking and all members of the MEWG are expected to provide meaningful input. As Phase 2 levels of shipping are not expected to occur before 2024 Baffinland is confident that Early Warning Indicators will be developed by that time based on a rigorous investigation of IQ and Inuit perspectives, scientific literature, and the expert opinions of MEWG members.	NA	This commitment will be implemented post PC approval
3	WWF-FWS 02	WWF	Corporate Environment	01 - November 2019 - Public Hearing	The NIRB has already initiated the development of the Mary River Monitoring Framework for attachment to Project Certificate 005, circulating a draft Appendix A Framework for public comment in 2017. Baffinland supports this initiative and will continue to participate in the development process following the completion of the Phase 2 reconsideration process.	NA	This commitment will be implemented post PC approval
2	WWF-FWS 04	WWF	Marine Environment	01 - November 2019 - Public Hearing	Baffinland commits to take part in a Marine Spatial Planning exercise, should an appropriate regional body lead the initiative.	NA	This commitment will be implemented post PC approval
1	WWF-FWS 08	WWF	Atmospheric Environment	01 - November 2019 - Public Hearing	Baffinland is committed to developing a comprehensive Climate Change Strategy. A critical component of this strategy will relate to the marine environment, where important developments are occurring at the international level that our world class fleet of vessels and ship contractors are poised to comply with, including the 2020 Sulphur Cap and a potential ban on Heavy Fuel Oil in the Arctic.	NA	This commitment will be implemented post PC approval
