## Hulilukaarutit

Inigiya	Hulilukaarut Qanurittuq	Nunannga Qanurittaakhaanik	Initurlinga qanuritpa	Initurlinga utuqqarnitat unaluuniit Ingilraaqnitat Uyarannguqtut akhuurninnga	Qanitqiyauyuq qanitqiamut nunallaat kitulluuniit ahiruqtailiyainnit nuna
Approximation of the travel routes we would like to use for our Skiing and Floe Edge trips. Actual route depends on ice conditions.	Tourism Activities	Crown	This is mostly land fast sea ice when we visit in the spring. We have travelled here for many seasons. Our Inuit guides in Pond Inlet consider these routes that safest and most commonly travelled routes on the ice. The exact route taken changes every year based on ice conditions.	This is a traditional hunting ground. Care is taken to not interfere with any traditional harvesting activities. There are archeological sites on Bylot that we are collaborating with Parks Canada to establish visitation protocols for.	This area is about 50 to 70 Kilometers East of Pond Inlet. The Bylot Island Migratory Bird Sanctuary extends on to the sea ice around Bylot Island. We like to camp in areas that are slightly sheltered from the wind, on the sea ice, within the new boundaries of the bird sanctuary. These sites are in close proximity to Sirmilik National Park, where we also will have permits to visit.
Approximate route a boat might take to drop hikers off on Bylot Island	Tourism Activities	Inuit Owned Surface Lands	We have hiked a route on Bylot Island in the past that travelled through a mix of Sirmilik National Park and Inuit Owned Lands. This route is a wilderness route with very little evidence of human activity. We practice leave no trace backpacking when we travel here.	Unknown, we have not observed any archeological sites in the area	This route travels from Pond Inlet to Bylot Island, approximately 25 kilometers. The route is in Sirmilik National Park, passes through the Bylot Island Migratory Bird Sanctuary marine area, and also traverses Inuit Owned Lands. We are pursuing applications with all relevant agencies for access.

Munariniqmut Ayuittiaqtuq	Angirutinga Qanurittuq	Tadja Qanurittaakhaanik	Ublua Tuniyauyuq/Uuktuqtuq	Umikvikhaa Ublua
Pulaarviit Kaanata	We applied to renew our permit to conduct guided commercial tourism activities in Sirmilik Park. Awaiting decision.	Applied, Decision Pending		
Qikiqtani Inuit Katimayit	We will apply for permission to access Inuit owned lands with the QIA.	Not Yet Applied		
Hunters and Trappers Associations/Organizations	We have requested a letter of support from the HTO in Pond Inlet. They have acknowledged our request but we await their decision.	Applied, Decision Pending		
Hamlets and Municipalities	We have requested a letter of support from the Hamlet of Pond Inlet for our tourism activities. They will not issue one until the HTO makes a recommendation.	Applied, Decision Pending		
Kaanatami Huradjat Munariniq	We are ready to submit our application to the CWS for access to the Bylot Island Migratory Bird Sanctuary. We are waiting for a letter of support from the Pond Inlet HTO to accompany our application, but we are considering applying without a letter of support because we are having difficulty obtaining one.	Not Yet Applied		

## Project transportation types

Transportation Type	Qanuq Atuqtauniarmangaa	Length of Use
Air	participants and some staff will arrive in Pond Inlet via scheduled air service	

Water	Participants on ski trip will ski on the frozen sea ice. Participants on the floe edge trips will snowmobile on sea ice, ski on sea ice and kayak on open ocean. Drinking water will be harvested from icebergs and melted for these trips. Hiking participants will get a boat ride over to Bylot and drink creek water.	
Land	Participants will walk or ski on land.	

### **Project accomodation types**

## **SECTION G2: Onland Exploration**

## **SECTION G3: Offshore Exploration**

## **SECTION G4: Rig**

## **SECTION H1: Vessel Use**

Any vessels to transport hikers will be chartered from local licensed operators, we usually use Tagak Outfitting for this trip

## **SECTION H2: Disposal At Sea**

None anticipated other than mentioned regarding ice camps.

## **SECTION I1: Municipal Development**

### **Qanurittuq Ittunik Avatinga: Avatingalluanga**

This is a wilderness environment. The sea ice changes annually and we practice leave no trace camping. Wildlife disturbance is our biggest risk and we manage it carefully. On the hiking trip the wilderness environment is delicate, and we follow all rules and guidelines issued by Parks Canada and other land managers, try to camp and travel on durable surfaces and practice leave no trace camping.

### **Qanurittuq Ittunik Avatinga: Inuuhimayunut Avatinga**

The Biological environment is an arctic wilderness landscape with seasonal changes. We strive to have minimal impact on the biological environment.

### **Qanurittuq Ittunik Avatinga: Inungit-maniliurutingit Avatinga**

The socioeconomic environment is that we operate out to the community of Pond Inlet and the trips are conducted on the traditional land and ice of the Inuit people who call this land home. We hire Inuit guides and bear monitors and have them lead our groups when out on the land. This ensures that cultural values are respected. We strive to use local businesses and pay above average wages to offer benefits to the community.

## **Miscellaneous Project Information**

It was requested that we describe our fuel storage in detail. Details on fuel storage can be found in the environmental impacts and mitigations document. On the floe edge trips fuel will be stored in Jerry cans, a 200L fuel drum, in 4L white gas metal containers that white gas is purchased in and in 30L propane gas cylinders. These fuel containers will be stored on plywood sheets, covered with a plastic impermeable liner inside an ice fishing shelter. Care will be taken to avoid spilling any liquid fuels. No smoking will be allowed near the fuel storage. A spill cleanup kit will be kept in the fuel storage area. On the Hiking and ski trips only white gas will be used. It will be stored in 1L MSR fuel bottles and will be carried in pulks or backpacks. It will be stored in the cooking tent at night.

## **Naunaiyainiq ukuninnga Ayurhautingit unalu Piumayaat Ikikliyuumiutinahuarutit**

See document in documents tab

## **Tamatkiumayunik Ihuikgutivaktunik**

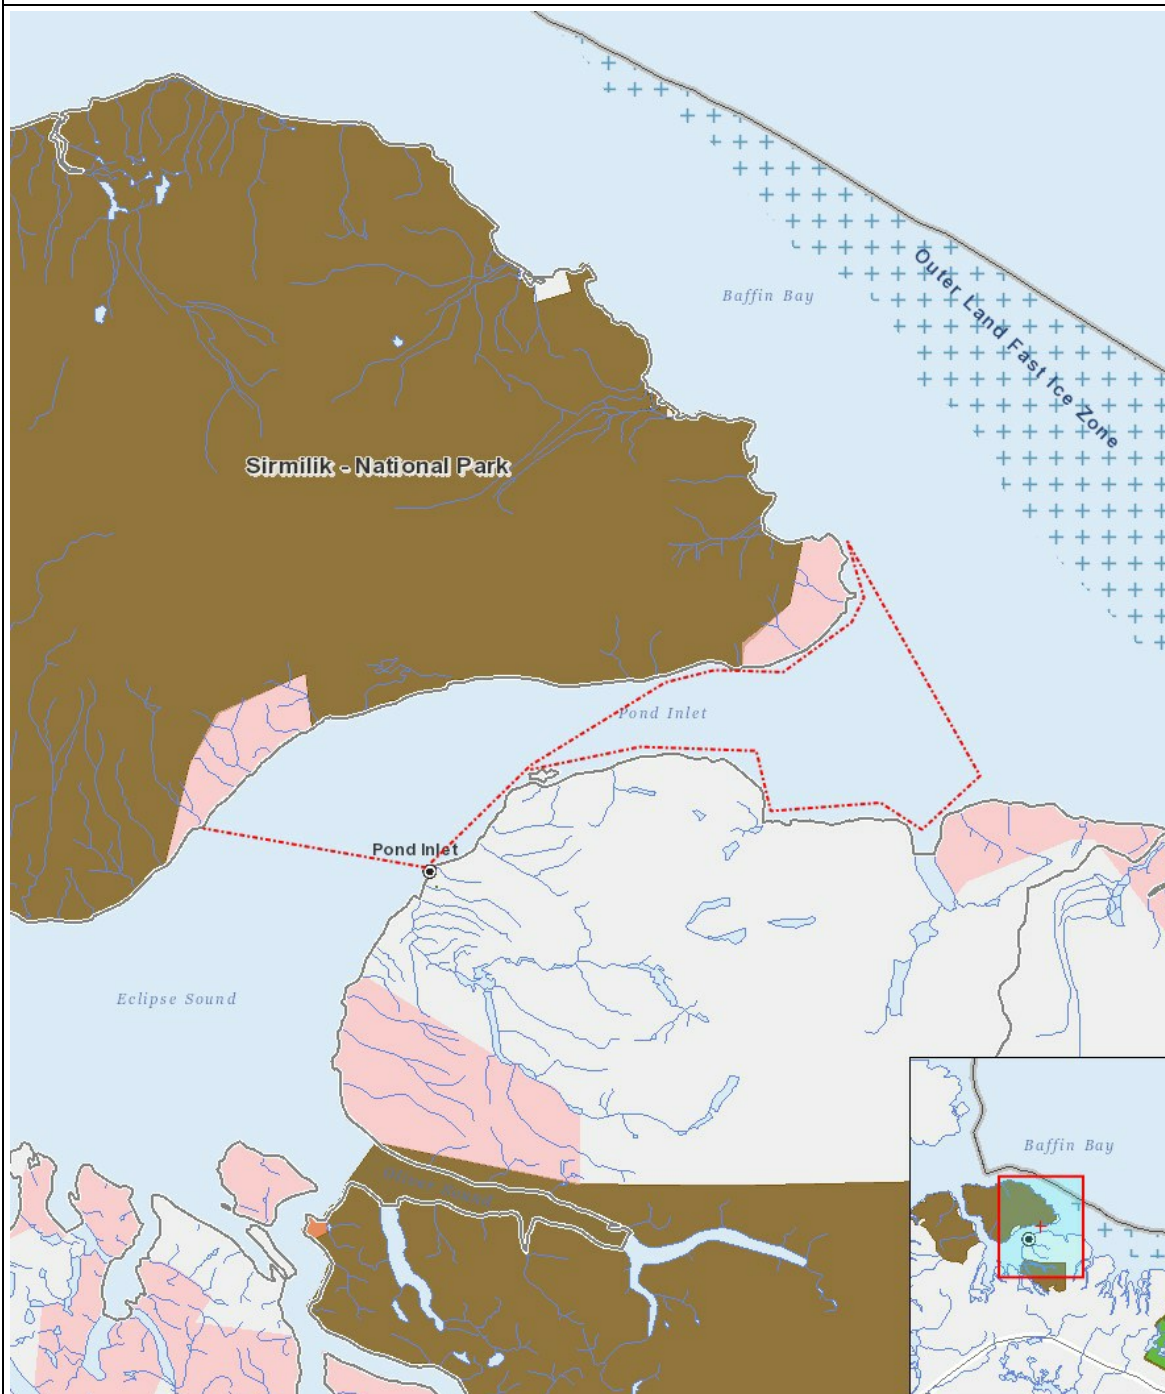

We do not envision our projects having cumulative environmental effects. We hope that our projects help build a sustainable tourism economy in Pond Inlet.
