TITLE: Investigating Scott Inlet seeps with autonomous underwater vehicles

OBJECTIVES OF RESEARCH:

The primary objectives of this multi-year project are to develop and characterize autonomous underwater technology to enhance marine robotics capability for oil spill response operation in the ocean. This project, with collaborations from domestic (International Submarine Engineering and Fugro Canada) sector partners, will improve data collection performance and efficiency of AUVs and provide short- and long-term benefits to Canada and local communities.

TERMS & CONDITIONS:

The holder of the licence will be bound by the terms and conditions of the Nunavut Impact Review Board Screening Decision Report and the Department of Culture & Heritage archaeological sites terms and conditions. These terms and conditions will form part of this licence.
