Dear Martyn,

Re: Letter of Support - Geothermal exploration in Resolute Bay

We are excited to write a letter of support for the Geothermal exploration in Resolute Bay. We know how important clean energy is in terms of helping Resolute Bay, Nunavut become a more self-sufficient community while protecting its environment.

This project will likely create local jobs while bringing innovation and helping the Nunavut economy. It will clearly utilize the natural resources in the community and supports their culture. We feel this project clearly fosters the best interest of all Nunavummiut in Resolute Bay.

We believe the geothermal exploration in Resolute Bay deserves the support from the funding organizations that align to the work being done.

Sincerely,

Mark Amarualik  
Mayor
