

## **NIRB Application for Screening #125788**

### **Baseline monitoring at Ninginganiq NWA**

**Application Type:** New

**Project Type:** Scientific Research

**Application Date:** 4/4/2023 2:36:02 PM

**Period of operation:** from 0001-01-01 to 0001-01-01

**Proposed Authorization:** from 0001-01-01 to 0001-01-01

**Project Proponent:** Shari Fox  
Ittaq Heritage and Research Centre

## DETAILS

## Non-technical project proposal description

English: The goal of this project is to run a pilot study to conduct baseline documentation of cultural sites in Ninginganiq NWA and explore what kinds of monitoring may be suitable to be conducted on a semi-regular basis by Inuit researchers and hunters from Clyde River, NU. Objectives include: 1) Collect baseline data about key environmental attributes and cultural sites in Ninginganiq NWA 2) Provide training and experience for Ittaq staff and community participants on how to collect high-quality environmental/cultural monitoring data. 3) Collect data for use in the development of a Ninginganiq NWA page in the Clyde River Atlas.

French: L'objectif de ce projet est de mener une étude pilote pour effectuer une documentation de base des sites culturels dans la RNF de Ninginganiq et explorer quels types de surveillance pourraient être effectués sur une base semi-régulière par des chercheurs et des chasseurs inuits de Clyde River, au Nunavut. Les objectifs sont les suivants :1) Recueillir des données de référence sur les principaux attributs environnementaux et sites culturels de la RNF de Ninginganiq2) Fournir une formation et de l'expérience au personnel d'Ittaq et aux participants de la communauté sur la façon de recueillir des données de surveillance environnementale / culturelle de haute qualité.3) Recueillir des données qui pourraient être utilisées dans l'élaboration d'une page sur la RNF de Ninginganiq dans l'Atlas de la rivière Clyde.

[illegible]

## Personnel

Personnel on site: 18

Days on site: 21

Total Person days: 378

Operations Phase: from 2023-05-01 to 2025-10-01

## Activities

Location	Activity Type	Land Status	Site history	Site archaeological or paleontological value	Proximity to the nearest communities and any protected areas
Anywhere within the Ninginganiq NWA	Researching	Marine	N/A	N/A	Within Nininganiq. Between Clyde River and Qikiqtarjuaq

## Community Involvement & Regional Benefits

Community	Name	Organization	Date Contacted
Clyde River	Shari Fox	Ittaq Heritage and Research Centre	2023-03-31
Clyde River	Danika Hogan	ACMC	2023-03-01

# Authorizations

Indicate the areas in which the project is located:

North Baffin

## Authorizations

Regulatory Authority	Authorization Description	Current Status	Date Issued / Applied	Expiry Date
Canadian Wildlife Service	NWA permit	Active		

## Project transportation types

Transportation Type	Proposed Use	Length of Use
Air	helicopter	
Land	skidoos	

## Project accomodation types

Temporary Camp

## Material Use

Equipment to be used (including drills, pumps, aircraft, vehicles, etc)

Equipment Type	Quantity	Size - Dimensions	Proposed Use
Skidoo	up to 10	n/a	Transport to the area
Skidoo, helicopter, drone	up to 12	n/a	Transport to the area. Depending on season and availability (ie. helicopter only if funding and if available) 1-2 Mavic 3 drones to take photos and videos of landscape, environment, cultural sites for baseline documentation Number of skidoos depends on number of participants in the project
Tent	4	8x8	sleeping
rifles	10	n/a	bear safety; hunting
Coleman stove	6	n/a	cooking; heat
Generator	1	n/a	charge drone batteries

### Detail Fuel and Hazardous Material Use

Detail fuel material use:	Fuel Type	Number of containers	Container Capacity	Total Amount	Units	Proposed Use
Gasoline	fuel	2	5	10	Gallons	Fuel for skidoos 10 gal per skidoo, 12 skidoos
None	hazardous	0	0	0	Cubic ft	n/a
Naptha	fuel	8	4	32	Liters	stove fuel

### Water Consumption

Daily amount (m3)	Proposed water retrieval methods	Proposed water retrieval location
0	Obtain from Lake water for camp purposes	Nearest lake or river that is useable

# Waste

## Waste Management

Project Activity	Type of Waste	Projected Amount Generated	Method of Disposal	Additional treatment procedures
Camp	Greywater	10 L/dat	Dispose of in upland area 100m away from water sources	N/A
Camp	Non-Combustible wastes	10 bags total	Pack out of NWA to nearest community	N/A
Camp	Sewage (human waste)	18 people	Individuals dig a hole and bury their waste at least 100m from nearest water source. Paper products will be packed out or burned.	N/A

## Environmental Impacts:

This project will have minimal impacts to wildlife, however, there is a chance that activities could disturb/modify behavior of any wildlife in the area. Helicopters may disturb animals when used to travel from point to point in the NWA. This disturbance will be minimized by flying high when going from point to point (and safe to do so), and by avoiding landing near animals whenever possible; the helicopter will not chase any wildlife. Travel over land may disturb animals and make them flee the area. This disturbance will be short-lived and monitors will not chase animals while traveling. When taking photographs or drone footage drone operators will follow guidelines specified by the ACMC and as described below. Drones will be used to image cultural sites, landscapes, not wildlife directly. We will be camping in the NWA for up to 3 weeks with up to 18 people (number depends on number of students that sign up for training program). All lead participants have experience with camping on the land and safe camp practices regarding wildlife and will take necessary precautions to avoid human-wildlife conflict, however, we will be carrying firearms for wildlife protection and will use these if absolutely required to keep people safe from threatening wildlife (e.g. bears). This could result in death of nuisance wildlife. We will have non-lethal deterrents available for use in any human-wildlife conflicts. Polar Bear, peregrine falcons, Ivory Gull, Ross' Gull, and Red Knots potentially occur or are known to occur in the NWA and are listed under schedule 1 of SARA. Monitors could potentially disturb individuals of these species, and in the unlikely event of an accident, conveyances could potentially disturb/detroy habitat of these species. These potential risks will be mitigated as described above.

# **Additional Information**

**SECTION A1: Project Info**

**SECTION A2: Allweather Road**

**SECTION A3: Winter Road**

**SECTION B1: Project Info**

**SECTION B2: Exploration Activity**

**SECTION B3: Geosciences**

**SECTION B4: Drilling**

**SECTION B5: Stripping**
