Hi Emily,

Thanks for reaching out. The mapping activity and sampling will not occur with the Iqalugaarjuup Park. We will be only mapping along the Raptor Shear zone, a structure located ca. 60-100km north of Rankin (blue structure in Figure 1 attached to this email).

Please do not hesitate to contact me if you require any further information.

All the best,

Daniele

Hi Daniele,

I am just reaching out for a clarification on the “Geological Mapping of Boundary Structures” project

proposal. The proposed study area (depicted in the project map) includes Iqalugaarjuup Nunanga Territorial Park outside of Rankin Inlet, however the sampling area is 60-100km north/northwest of Rankin Inlet, so I wanted to confirm that sampling is not occurring within the territorial park.

Thank you,

Emily Koide
