TITLE: Installation of Meteorological Tower (MET) in Sanirajak, Nunavut

**OBJECTIVES OF RESEARCH:**

The Sanirak MET Tower project includes an installation of a meteorological tower (MET Tower), collecting wind data for a period of 18-24 months, periodic site visits for tower maintenance, and dismantling and removing of mast and all materials/equipment from the site at the end of the project duration. Erection of the MET tower is necessary to support the wind monitoring instruments. The purpose of this project is to collect wind data to assess the potential for wind energy generation. There is no intrusive or extensive on-site research for this project. The method for collecting wind data will be through the instrumentation supported on the MET Tower. The instruments will gather continuous data that will periodically generate and send reports via satellite. Due to the non-intrusive nature of this project, detailed mitigation plans are not required.

**TERMS & CONDITIONS:**

The holder of the licence will be bound by the terms and conditions of the Nunavut Impact Review Board Screening Decision Report and the Department of Culture & Heritage archaeological sites terms and conditions. These terms and conditions will form part of this licence.

**DATA COLLECTION IN NU:**

DATES: January 17, 2024 to December 31, 2024

LOCATION: Hall Beach

Scientific Research License 02 018 24R-M expires on December 31, 2024

Issued at Iqaluit, NU on January 17, 2024
