Annual Report

2) The Proponent shall submit a comprehensive annual report with copies provided to the Nunavut Impact Review Board and Government of Nunavut – Department of Environment, by March 31st of each year of permitted activities beginning March 31, 2017. The annual report must contain at least the following information:

a) A summary of activities undertaken for the year, including:

i) a map showing the approximate location of drill sites;

No exploration activities were conducted in the area covered by this decision, but 4 tent units that remained at the Parker Lake exploration camp site were transported to Baker Lake during the winter 2023 using a tracked tractor. A final visit of the area is planned to be conducted during the summer 2024, using a helicopter, to ensure that no material remains on site.

ii) a map showing the location of the fuel caches;

- *No fuel caches remain in the area covered by this screening decision. The exploration camp has been dismantled and backhauled.*

iii) a description of local hires, contracting opportunities and initiatives;

- *Peter Expediting Limited, based in Baker Lake, transported the remaining material from the Parker Lake exploration camp site to Baker Lake.*

iv) flight altitudes, frequency of flights and anticipated flight routes;

- *No exploration activities were conducted in 2023 in the area covered by this screening decision.*

v) site photos;

- *Picture of remaining material that was backhauled from Parker Lake Exploration camp site during the winter 2023.*

Picture summer 2022

b) A summary of the overview assessment conducted of the exploration areas;

- *Archaeologists conducted field visits in summer 2016 and 2017 to ensure archaeological site protection during exploration activities. Reports were*

submitted to the Government of Nunavut by the archaeologists. No additional external assessment was conducted.

c) A work plan for the following year, including any progressive reclamation work undertaken;

- *No exploration activities are planned in 2024 in the area covered by this screening decision. A final visit of the exploration camp site area is planned to be conducted during the summer 2024, using a helicopter, to ensure that no material remains on site.*

Figure 1, Winter Access and camp site locations

d) A summary of community consultations undertaken throughout the year, providing copy of materials presented to community members, a description of issues and concerns raised, discussions with community members and advice offered to the company as well as any follow-up actions that were required or taken to resolve any concerns expressed about the project proposal;

- *No consultation summary to present, no exploration activities were conducted in 2023 in the area covered by this screening decision.*

e) A log of instances in which community residents occupy or transit through the project area for the purpose of traditional land use or harvesting. This log should include the location and number of people encountered, activity being undertaken (e.g. berry picking, fishing, hunting, camping, etc.), date and time; and any mitigation measures or adaptive management undertaken to prevent disturbance;

- *No log to present, no exploration activities were conducted in 2023 in the area covered by this screening decision.*

f) A discussion of issues related to wildlife and environmental monitoring, including the number of cease-work orders required as a result of proximity to caribou;

- *No issues to discuss, no exploration activities were conducted in 2023 in the area covered by this screening decision.*

g) A brief summary of Wildlife Monitoring and Mitigation Plan (WMMP) results as well as any mitigation actions that were undertaken. In addition, the Proponent shall maintain a record of wildlife observations while operating within the project area and include it as part of the summary report. The summary report based on wildlife observations should include the following:

1. Locations (i.e., latitude and longitude), species, number of animals, a description of the animal activity, and a description of the gender and age of animals if possible.

- *No summary to present, no exploration activities were conducted in 2023 in the area covered by this screening decision.*

2. Prior to conducting project activities, the Proponent should map the location of any sensitive wildlife sites such as denning sites, calving areas, caribou crossing sites, and raptor nests in the project area, and identify the timing of critical life history events (i.e., calving, mating, denning and nesting).

- *No exploration activities were conducted in 2023.*

- h) An analysis of the effectiveness of mitigation measures for wildlife as proposed in the WMMP;
- *No analysis to present, no exploration activities were conducted in 2023 in the area covered by this screening decision.*
- i) Summary of any heritage sites encountered during the exploration activities, any follow-up action or reporting required as a result and how project activities were modified to mitigate impacts on the heritage sites;
- *No summary to present, no exploration activities were conducted in 2023 in the area covered by this screening decision.*
- j) Summary of its knowledge of Inuit land use in/near the project area and explain how project activities were modified to mitigate impacts on Inuit land use; and
- *No summary to present, no exploration activities were conducted in 2023 in the area covered by this screening decision.*
- k) A summary of how the Proponent has complied with conditions contained within this Screening Decision, and all conditions as required by other authorizations associated with the project proposal.
- *No summary to present, no exploration activities were conducted in 2023 in the area covered by this screening decision.*
