CAUTIONARY STATEMENTS

equipment, such as cars and mobile telephone, mobile and computer equipment, and the expense of travel, with contractors, third parties and senior partners. The fact that our partners may be owners, relatives or family members of clients, may also give rise to conflicts of interest. The dependence of our personnel and their loyalty to us may also represent a potential risk that can compromise the quality of our services and the nature of our operations from time to time, particularly since some of our partners are involved in other professional activities, which may affect our financial results as well as the quality of our services. Our partners and senior partners may have an impact on the results of the Company's business, as well as the interests of our shareholders. In addition, we are not in a position to evaluate and describe in more detail the risks resulting from the fact that our partners and senior partners are also engaged in other professional activities.

TUKHIQTAUHIMAJUT TUTQUUMAVIKHAA

BACK RIVER ENERGY CENTRE PROJECT

The Back River Project Energy Centre, a wind generation facility, solar panel array and Battery Energy Storage System, capable of supplying clean energy to the Back River Project Mine.

Up to 13 planned Wind Turbine Generators

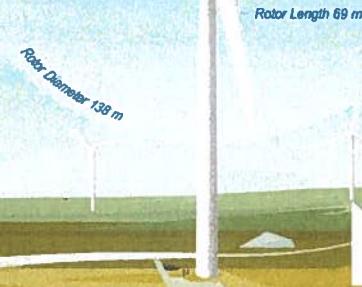

Between 4.0 and 4.5 MW power capacity per wind turbine giving the system a generation capacity of approximately 55 MW of electricity, which is sufficient to cleanly power the Back River Project Mine.

Solar Array and Electrical Station
will be located near the Diesel Power Plant

Electrical transmission lines will be laid directly on the tundra and/or laid directly adjacent to the access roads and covered with aggregate

Solar panels may also be added

Additional electricity generated by the wind turbines and solar array will be stored by the Battery Energy Storage System. The Battery Energy Storage System consists of lithium-ion batteries stored in a seacan on an aggregate pad and will be capable of storing energy to be used at times when wind and solar energy is not available

Approximately 500 m between wind turbines
