**Re: 2010 & 2011 NWB Annual Reports for the Storm Project on Behalf of
Commander Resources Ltd.**

Dear Ms. Beaulieu,

No field activities were carried out at the Storm project during 2010. Attached is email correspondence between Commander Resources and the NWB confirming that no work was planned for the 2010 season.

Field work in 2011 was comprised solely of an airborne geophysical survey. The nature of this type of survey meant that no water was used for domestic or other purposes, and no wastes were created. Furthermore, to date no camp has been constructed or operated by Commander Resources at the Storm project. Attached is a completed NWB Annual Reporting Form for the 2011 work at the Storm project.

Please do not hesitate to contact me if you require any additional information.

Best Regards,

Christopher Livingstone
Geologist
