• Despite all attempts to get this presentation translated by a professional translator, limitations of available people to complete the translation resulted in the only available option being a translation program. While this is not ideal to the NIRB’s goals, it was the only available option to ensure the NIRB meets its expectations to provide language support at meetings.

• As a result, we are open to feedback on the translation and will try to communicate any updates or clarifications as they come to our attention.

OBJECTIVES

OF THIS

MEETING

•Minister directed NIRB host a Cumulative Effects
Assessment Framework Workshop for the Mary River project
•February 2024 workshop with parties and communities
•NIRB issued report on parties' contributions and
opportunities to develop a Framework

2024

•Minister considered the NIRB’s report and provided
further direction to the NIRB that:

•Framework development NIRB-led, guided by Steering
Committee, and involve parties and communities
•Steering Committee established process and
expectations – www.nirb.ca
•Opportunities for a Framework initiated through a
discussion paper

2025

•May-September: community updates, public comment period, and workshop summarized through preliminary
findings report
•October: Preliminary findings report discussed at
Workshop in Iqaluit with follow-up comment period

2026

•February 2027: NIRB issues final report on Framework
Development

2027

ᑕᒫᓃᑉᐳᒍᑦ ᓲᖃᐃᒻᒪ ᓄᓇᓕᐅᖃᑕᐅᒐᔅᓯ ᓄᓇᕗᒻᒥ ᐊᕙᑎᓕᕆᔨᒃᑯᑦ ᑲᑎᒪᔨᖏᓐᓄᑦ ᐱᓕᕆᑎᓪᓗᒋᑦ ᓄᓘᔮᖕᓂ ᐱᓕᕆᐊᖑᔪᒧᑦ

We are here to continue your involvement in the development of a Cumulative Effects

Assessment Framework

DEFINITIONS

ᐱᓕᕆᐊᒧᑦ

ᑐᕌᖓᔪᑦ
ᐊᒃᑐᐃᔾᔪᑎᑦ PROJECT SPECIFIC EFFECTS

Direct Effects - refer to changes in the environmental components that result

from direct cause-effect consequences of interactions between the project activities and the environment. For example the construction of a quarry site may see direct loss of local
vegetation and disturbance to soils and aquatic environments.

Indirect Effects – result from cause- effect consequences of interactions

between the environment and indirect impacts. For example, the effect of pollution may not only be seen directly in the loss of local vegetation, but indirectly as a degradation of the health, culture and social structure of the local people.

Effects vs. Impacts – while often used somewhat interchangeably, the term “effect” is used to refer to the
immediate result or outcome of an action, event, etc. while the term
“impact” should be used to describe the consequences of the action, event, etc. Construction of a quarry site
causes a direct effect of loss of
vegetation and a direct impact on local vegetation health and abundance.

Monitoring work

• Proponent has obligations to
monitor the project under the Project Certificate and other

regulatory authorizations – were predictions accurate?
• Check effectiveness of

mitigation – did the mitigation work?
• Track cumulative effects with
other regulators – are there
other explanations for
increased effects?

• Role of Inuit Qaujimajatuqangit
and community knowledge in cumulative effects monitoring

ᑐᕌᒐᖓ ᐱᕙᓪᓕᐊᑎᑦᑎᓂᕐᒧᑦ ᑲᑎᑉᐸᓪᓕᐊᔪᓂᒃ ᐊᒃᑐᐃᔪᓂᒃ ᖃᐅᔨᓴᖅᓯᓂᕐᒧᑦ ᐱᓕᕆᔾᔪᑕᐅᓂᐊᖅᑐᒥᒃ GOAL FOR DEVELOPING THE CUMULATIVE EFFECTS ASSESSMENT FRAMEWORK

What clarity is helpful for
communities to hear
about cumulative
effects?

What could the
Framework achieve?

What do you want to
know about the process
and opportunities?

What would help you
participate in the
discussion of cumulative
effects assessment or
monitoring?
