TITLE: Tallurutiup Imanga NMCA Research & Monitoring Pilot Project

OBJECTIVES OF RESEARCH:

As part of the establishment of the Tallurutiup Imanga National Marine Conservation Area (TINMCA), a Research and Monitoring Strategy is being co-developed with Parks Canada, the Qikiqtani Inuit Association, Fisheries and Oceans Canada, and Transport Canada, in collaboration with the five communities adjacent to the protected area (Arctic Bay, Clyde River, Grise Fiord, Pond Inlet, and Resolute Bay). This monitoring program is intended to be implemented incrementally over the next several years, with the goal of addressing Inuit priorities, needs and concerns identified through in-person engagement with community members since 2023. The monitoring will focus on indicators aligned with Inuit priorities and needs, helping assess the state of the NMCA and informing decision-making for its management. The Interim Management Plan and the Research and Monitoring Strategy for TINMCA are in the final stages of completion and will provide guidance for the monitoring program.

TERMS & CONDITIONS:

The holder of the licence will be bound by the terms and conditions of the Nunavut Impact Review Board Screening Decision Report (NIRB File # 26YN042) and the Department of Culture & Heritage archaeological sites terms and conditions. These terms and conditions will form part of this licence.

DATA COLLECTION IN NU:

DATES: August 16, 2026-August 30, 2026

LOCATION: Pond Inlet & Bylot Island

Scientific Research License 02 027 26N-A expires on December 31, 2026

Issued at Iqaluit, NU on July 07, 2026
