

Request For Proposals

INITIATIVE: Socio-economic Impact Assessment Toolkit for Proponents

PROPOSALS RECEIVED UNTIL: 5:00 pm EST on January 31, 2023

1. Scope of Work

The Nunavut Impact Review Board (NIRB or Board) is seeking proposals from qualified individuals or firms to develop a Socio-economic Impact Assessment (SEIA) Toolkit to support proponents in conducting SEIA for screening, review, monitoring, and reconsideration level impact assessment processes and provide all parties with an understanding of these requirements.

The Contractor will be engaged to provide input into the NIRB's socio-economic requirements and to develop a SEIA Toolkit built on the requirements of the NIRB processes. The Toolkit must be reflective of Inuit Qaujimajatuqangit and recognized scientific methods and include scaling of strategic environmental impact assessment. While it is expected that Inuit Qaujimajatuqangit is referenced throughout the Toolkit and the Toolkit aligns with the principles and the importance of Inuit Qaujimajatuqangit in developing an SEIA, a separate Inuit Qaujimajatuqangit Guidance Document will be developed through a separate process.

Contractor Responsibilities

- Providing a plan with timeline for each component.
- Conducting these components with input from NIRB staff within the designated timeframe.
- Gathering input from community members.
- Providing updates to NIRB staff on an agreed upon basis.
- The Contractor shall report immediately any problems to NIRB staff so the appropriate action can be taken to ensure the contract can be completed within the contract period.

NIRB Staff Responsibilities

- Approving plans and components of the work.
- Providing timely review of work plans, draft reports, and final reports.
- Providing suggestions for community contacts.
- Translations.

Objectives of the Socio-Economic Impact Assessment Toolkit

The purpose and objectives of the SEIA Toolkit is to support Proponents in conducting SEIA for the development of their project proposals at the screening level, Impact Statements at the review level, and at the monitoring level:

- to inform the NIRB's Draft Standard SEA Guidelines
- to clarify objectives of SEIA for all parties to the NIRB's processes

Inputs to include, but not be limited to:

- The NIRB's legislative requirements
- The Board's experience in impact assessment
- NIRB Draft Standard Guidelines
- Current best practices and other policies, guidelines, and practices including those of other impact assessment and resource management organizations and academia
- Comments and feedbacks from parties, particularly community members, shared through the NIRB's processes
- The selected consultant's expertise and knowledge
- Input from NIRB staff
- Community feedback on what should be included in such a toolkit

2. Background Information

The primary objectives, responsibilities, jurisdiction, and functions of the NIRB are established through the Agreement Between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in right of Canada (Nunavut Agreement) and further defined by the Nunavut Planning and Project Assessment Act (NuPPAA). The NIRB is an institution of public government and the sole permanent body in Nunavut responsible for conducting impact assessments in the Nunavut Settlement Area. The NIRB also has the ability to establish monitoring programs to monitor compliance with terms and conditions and evaluate project effects. A key requirement of proponents is to undertake a SEIA of potential impacts to the socio-economic environment, well-being, and culture of potentially affected individuals and communities.

The NIRB utilizes both Inuit Qaujimajatuqangit and recognized scientific methods to gauge and assess the biophysical and socio-economic impacts of proposed projects and makes recommendations to the Government of Canada about which projects should be allowed to proceed and under what terms and conditions. The NIRB takes a holistic view and considers all parts of the environment as interconnected. The components of the Earth are a complex web of inter-relationships between the living and non-living

components which sustain all life on earth, including the social, cultural, and health aspects of human group existence. Socio-economic components include but are not limited to: well-being, cultural identify and practices, Inuit Qaujimajatuqangit, food security, health, employment, economic development and opportunities, education and training, contracting and business opportunities, non-traditional land use and resource use, heritage resources, and community infrastructure and public services.

Screening:	The initial impact assessment of a proposed project.
Review ¹ :	Assessments are referred by a responsible Minister if a proposed project may have significant adverse ecosystemic or socio-economic impacts or significant adverse impacts on wildlife habitat or Inuit harvesting activities; will cause significant public concern; or involves technology of which the effects are unknown. Proponents (those proposing to carry out a project) are responsible for preparing a project proposal at the screening level and an IS at the review level. Proponents are required to assess the potential socio-economic impacts of proposed projects at both levels and have further responsibilities to engage with potentially impacted communities.
Reconsideration:	Similar to Review assessments, however, are scalable based on the significance of the change being requested, and concerns of community members surrounding the proposed changes.
Monitoring:	The Board monitors the impact of projects that have previously been screened or reviewed and approved to proceed. Proponents' monitoring obligations include reporting on effects and compliance of terms and conditions. Proponents are required to use <i>Inuit Qaujimajatuqangit</i> shared at all levels of the impact assessment process.

3. Instructions to respondents

Submission

The submission should include the following:

- Proposed approach, assumptions, and any limitations to fulfilling the RFP;
- Consultant Requirements

¹ The NIRB is concurrently developing general IS Guidelines for Proponents during a Review process, which place a strong focus on community engagement, *Inuit Qaujimajatuqangit*, and the interconnectedness of components of the environment.

- Company description, experience, and qualifications as relates to the requirements as stated within this RFP and listing of project team with profiles and related experience;
- Costing Submission;
- o Inuit Content;
- Proposed Scope of Work;
- Proposed alternative approach to meeting the objectives of the SEIA Toolkit as stated in this RFP, including deliverables, if applicable; and
- Ability to meet the proposed timelines as established.

Costing Submission

The proposal should include a clearly identified costing submission and a service contract template. The costing submission should include a firm 'not to exceed' Total Fixed Fee with GST shown separately. Disbursements will be considered to be part of the Total Fixed Fee. At no time shall the Total Fixed Fee be exceeded without prior written authorization from the NIRB.

The costing submission shall include a breakdown of the total project cost in the form of a Fee Schedule that sets out the project tasks, project personnel responsible for completing the task, the hourly rate of the project personnel completing the tasks, an estimate of the time required to complete the project tasks, and the disbursements relating to each task.

Disbursements will be reimbursed at cost and must be job related; operating and overhead expenses will not be considered as a valid disbursement. Acceptable disbursements include printing, copying and telecommunications costs. Unacceptable disbursements include computer and equipment charges (unless expressly identified in the quote with the rationale for inclusion as an acceptable disbursement).

Terms and Conditions

- 1.1.1 This RFP is issued on behalf of the NIRB, who is the sole point of contact during the procurement process and subsequent work.
- 1.1.2 It is the responsibility of the respondent to familiarize themselves with all identified terms and conditions of this RFP prior to submission of a proposal. Any proposal not supported by the information requested in the RFP, or not complying with the RFP requirements, may not be considered.
- 1.1.3 Any deviations and exceptions from the terms and conditions shall be described fully on the respondent's letterhead. In the absence of such a statement, the proposal shall be accepted in strict compliance with all terms and conditions.

- 1.1.4 All proposed services and results must comply with all applicable laws and standards in Canada.
- 1.1.5 The length of the contract is expected to be approximately six (6) months, commencing in December 2022 and ending June 30, 2023. eight (8) months, commencing February 2022 and ending October 30, 2023.
- 1.1.6 This RFP does NOT constitute an offer. The NIRB does not bind itself to accept any quote or other response to the RFP, and is not obligated to accept any quote, including the lowest priced quote submitted by a respondent.
- 1.1.7 The NIRB will not reimburse a respondent or make any payments for the preparation of a response to this RFP, and any and all costs incurred by respondents associated with responding to this RFP are solely the responsibility of the respondent.
- 1.1.8 The NIRB has the right to cancel this RFP at any time and to reissue it for any reason whatsoever, without incurring any liability and no party will have any claim against the NIRB as a result of the cancellation or reissuing of the RFP.
- 1.1.9 If a contract is awarded as a result of this RFP, it will be awarded to the respondent, who, in the NIRB's sole opinion, provides the best potential value to the NIRB and/or to the respondent that is most capable, in all respects, to meet the NIRB's requirements.
- 1.1.10 If the NIRB awards a contract as a result of this RFP, the successful respondent will be notified of the intent to award in writing, and the subsequent execution of a written agreement shall constitute the making of a contract. Respondents will not acquire any legal or equitable rights or privileges whatsoever until the contract is signed by both parties and if there is any inconsistency between this RFP, and the ensuing contract, the contract shall govern.
- 1.1.11 While the Executive Director will be the principal contact for the successful respondent while completing this scope, if a contract is awarded as a result of this RFP, the successful respondent will be expected to work closely with designated NIRB staff contacts.
- 1.1.12 The quotes received will be evaluated as soon as practical after the closing time. Although the NIRB may disclose the number of quotes received and the names of the parties providing quotes, the specific details of the quotes received will not be made public.
- 1.1.13 The NIRB reserves the right to request any additional information that it deems necessary in order to make a decision on any proposal.

EVALUATION CRITERIA

The following criteria will be used to evaluate all submissions to the RFP:

	Evaluation Criteria
1	Describe your company's experience with conducting guidance for socio-economic impact assessment that is reflective of Inuit Qaujimajatuqangit and recognized scientific methods.
2	Familiarity with the unique socio-economic environment of the Canadian Arctic.
3	Discuss your familiarity with the NIRB's role within Nunavut's regulatory framework.
4	Outline how you intend to meet the objectives as outlined in this RFP.
5	Provide a draft contract with approach for a socio-economic impact assessment toolkit and detailed cost breakdown.
6	Is your company a Nunavut registered business and/or a registered Inuit firm? If so, provide proof of registration. (up to 14% bid adjustment)
